

\$5. INDELIBLE CHECK PERFORATOR. \$5.

It perforates and inks the holes; automatic and positive feed; indestructible; will last a life time; guaranteed for five years; endorsed by all banks; insures your bank account as long as you live; an ornament to any desk or library table; no dies or counter dies to wear out or become dull; contains all the advantages of the most expensive machines. Indelibly inks the perforations. The only perfect Check Protector ever made.

In view of the many cases of check raising which have occurred, even when punched with expensive machines, a demand has arisen for some method for the perfect protection of all papers having a monetary value and at a price within the reach of all. To meet this demand the **INDELIBLE CHECK PERFORATOR** has been placed on the market. It is the only machine made that perforates and inks the holes through the fibre of the paper with an **INDELIBLE ACID-PROOF** ink, which absolutely prevents any changes of figures.

THE INDELIBLE CHECK PERFORATOR is the smallest, simplest, best and cheapest machine ever devised for the purpose, and is endorsed by Banks, Express Companies, other leading corporations and firms, who realize the value of absolute protection of checks, drafts, money orders, and all other negotiable papers.

Sent prepaid anywhere in the U. S. on receipt of price. If after receiving the machine it is not satisfactory, it can be returned to us, and if in good condition, we will refund the amount paid, less express charges. Agents wanted.

DECISIONS OF COURTS. The Supreme Court, the United States Circuit Court, and the Court of Common Pleas, have rendered the following decisions:

"The maker of the Check is obliged to use all due diligence in protecting it; the omission to use the most effectual protection against alteration is evidence of neglect, which renders him responsible for the fraudulent amount, the Bank being responsible only for the genuineness of the signature and ordinary care in paying the check."

CAN I OBTAIN A PATENT? For a prompt answer and an honest opinion, write to **MUNN & CO.**, who have had nearly fifty years' experience in the patent business. Communications strictly confidential. A **Handbook of Information** concerning Patents and how to obtain them sent free. Also a catalogue of mechanical and scientific books sent free.

Patents taken through **Munn & Co.** receive special notice in the **Scientific American**, and thus are brought widely before the public without cost to the inventor. This splendid paper, issued weekly, elegantly illustrated, has by far the largest circulation of any scientific work in the world. \$3 a year. Sample copies sent free.

Building Edition, monthly, \$2.50 a year. Single copies, 25 cents. Every number contains beautiful plates, in colors, and photographs of new houses, with plans, enabling builders to show the latest designs and secure contracts. Address **MUNN & CO., NEW YORK, 361 BROADWAY.**

PERPETUAL INCOMES ASSURED.

Over 25 per cent. Yearly Profits from Prune Orchards.

Idaho is the very Eden for prunes, pears and apples which for size, beauty and flavour are unsurpassed. "Idaho's Fruit Exhibit at the World's Fair," says the Salt Lake Tribune, "has made her famous all over the earth. It is not only fine but in many respects it is the finest at the Fair."

We have 2000 acres of the richest and most productive fruit lands in Idaho, on both sides of the Union Pacific Railroad System, at Orchard, about 25 miles from Boise City, the capital of Idaho, which offers the best facilities for shipment to marketable points.

We will sell one acre or more with perpetual water-right for irrigation, and will clear, plough, harrow, level, fence and plant, in either prune plum, peach, apple or pear trees (as may be selected) and pay all charges and care for the orchard while being paid for, and will thereafter (if desired) continue the care of the orchard and the gathering, packing and sale of the fruit for non-residents, for a small percentage of the profits. We cultivate the orchards in large tracts, in which only the most modern and approved farming utensils and machinery are used, and only trained men in fruit culture are employed under the best fruit experts in America, and are thereby enabled to deliver an orchard for \$400, which would cost anybody else over \$300 with less results.

The prune orchards of Santa Clara, California are valued at \$1000 and upward per acre, and yield from \$100 to \$400 profit per annum. The California crop depends on rain, while at Orchard, in Idaho, with irrigation, the crop never fails. The mortality in the genial climate of Florida and Colorado is nearly three times greater, and in California nearly five times greater than in Idaho, as shown by Census Bureau. Price of one acre or more, planted and cared for as above, \$400 per acre, payable \$5 monthly for each. Purchasers remitting by mail will get best unsold selection. Call or address
