

7. CANADIAN SEAFOOD EXPORTS TO NEW ENGLAND

The time frame and the source of the following data do not exactly match with the 1986 survey referred to above, but general inferences might be made. For example, it might be estimated that some 65% of the New England imports in 1986 came from Canada (compare Canadian exports of C\$ 1,218 with New England's total imports of US\$ 1,392 in 1987).
