Twelfth,
1924.

W. D. Lawrence, Esq.,
Superintending Engineer,
McGill University.

Dear Mr. Lawrence,-

I believe that Dr. Shaw has already spoken to you over the telephone about smoke and sparks entering the basement of the Physics Building when the rink men thawed out their pipes; and I understand that you were good enough to tell him that this trouble would not occur again. Thank you for your kind attention to this matter.

Yours very sincerely,

(Signed) A. S. EVE.

Director of Physics.
