	Page
I. INTRODUCTION	1
II. CLASSES OF ROCKS	4
Original or igneous rocks	6
Derived or sedimentary rocks	7
Altered and metamorphic rocks	8
III. TEXTURE OF ORIGINAL ROCKS	9
Analogy between these and furnace slags.....	9
Varieties of texture.....	11
Passages between these.....	13
Probable causes of these varieties.....	14
IV. THEIR CHEMICAL COMPOSITION	14
Essential and accidental components	15
Neutral rocks.....	16
Silicic rocks.....	18
Basic rocks.....	19
Siliceous and basous rocks	20
Table (I) of the composition of rock families	20
V. MINERALOGICAL CONSTITUTION	22
Rock minerals artificially produced	22
Essential constituents.....	24
Felspathic and basic constituents.....	25
Table (II) shewing the constitution of rock families	26
Table (III) shewing the constitution of the species.....	28
Passages among the species	29
VI. ACCESSORIAL CONSTITUENTS.....	30
Their distribution among original rocks.....	32
VII. DEVELOPEMENT OF ROCK CONSTITUENTS	35
Fractured crystals.....	35
Enclosure of minerals	36
Microscopical investigations.....	38
Order of the formation of constituents	40
