We estimate that about  $\pounds$  50 will defray the cost of young man's passage to the United States or Canad and provide him a good home with a year's practic instruction in Farming, as well as fair money remun ration for his work, certainly for most of that period.

To give him anything like a fair start on a Far. Li his friends should, at the end of a year,\* be prepared advance him from £100 to £150 more. With that can take a "Homestead," erect a few inexpensive bui It ings, and purchase the necessary implements, stock, & ables

"Farming on Shares" is practicable in sorough districts, and about the same amount of capital wor enable a young man to become a tenant-farmer on t she "Share" system.

The following Tables suppose a larger amount capital. Land is here taken at an average of  $\pounds I \downarrow$ acre, and a family of five persons is calculated for ont average. It might often be found convenient for t or more young men to join in the purchase of a Far thus reducing the necessary capital and hired help.

12

<sup>\*</sup>Our arrangements with Farmers cover a period of Twelve Mot only. In ordinary cases a sufficient practical knowledge of Fair will then have been acquired. But if, at the expiration of that perthe Pupil's youth or inexperience seems to disqualify him • Le starting on his own account, we shall be ready to arrange for juart remaining for a longer time without extra charge. "sec

<sup>†</sup> This estimate is based upon extended personal experience ightion our own, and is confirmed by those of Bishop Ireland, who the colonized large tracts of land in Minnesota, and of the princh acc Railway Companies it the States and Canada.
