Marshall, Spader & Co. G. G. Beaty, King Edward Hotel, reported the follows or other prices of fester shares in the near future. People below zero cheep plants. The spring stems and conpressing plants. The spring stems and control to the fol

must not be too impatient, as 40 degrees below zero often plays havoc with the steem and compressing plants. The spring time will see a wonderful expansion about the Foster dominions.

At Silver Leaf.

We then went over to have a look at the Silver Leaf Mine. Here all was activity and the manager reported conditions very satisfactory. Steady work is being carried on and the shaft is entering better ore one carload—is soon to be made, but just when, it is impossible to say. The Silver Leaf property looks to be a rich one and from what Cobalters say. Silver Leaf claim, is being closely guarded by three stalwarts, each unit gnarding three separate interests. The long-expected decision regarding the fate of this claim will be handed out by the privy council in England in a week or two. The property will then quickly find its way onto the market as a stock company.

The McKinley-Darragh-Savage Company, on the lower end of Cobalt Lake, is making satisfactory progress. Manager George McDonald was good enough to show us

population.

For all the business that is being done in the north building at the St. Lawrence market, it will not pay the city to keep it up. On an average the year round therewould not be more than a dozen farmers per day who use the market, and the city council and Commissioner Harris will come to the same conclusion if they will but visit the market daily.

-A SHIPPING MINE -A MAGNIFICENT VEIN.

-WONDERFUL SILVER VALUES. The company owns eight claims, five of which are located in the Cobalt

District, and described as follows: No 1-Is in the Kerr Lake section, and is now producing some of the most sensational values ever seen in the Cobalt. Assays from the vein run eleven thousand ounces per ton. Description of the claim: South half of the northwest quarter of the north half of lot one, concession three, Coleman Township, containing twenty acres, more or less, held under Brown Patent record in the Land Titles Office, and has the longest and probably the richest vein yet discovered in the entire camp, and in addition thereto there have been uncovered on it five other veins, which promise to be equally rich when developed to the same extent. On the first mentioned vein shaft has been sunk to a depth of 75 feet, and cross-cutting and drifting has been done for about 800 feet, and in the process of this work about three car loads of ore has been taken out. Native silver was first struck on this vein at the fortythree foot level, and at the seventy-five foot level, where the work is now progressing, it has developed an amazingly rich vein, running from eight to fourteen inches in width. It is the opinion of all experts that have examined the vein that it is not surpassed, if indeed equaled, by any vein in the entire camp. There is no doubt but that it will run at least thirty per cent. silver.

Upon the other vein a large amount of trenching has been done, and three other shafts, to a depth of twenty, thirty-five and forty feet respectively, have been sunk. The forty foot shaft is being worked night and day, and doubtless when the 75 foot level is reached equally as good ore will be found

as in the first mentioned vein. On the other two shafts work will be proceeded with as soon as the necessary machinery can be installed

Suitable buildings for operating the property have already been erected. Nos. 2 and 3—Consist of the east and west half of the southwest quarter of the south half of lot eleven, concession four, Coleman, locally known as the McDonald Claim, containing forty acres. This property has two very promising veins.

No. 4—Consists of the northwest quarter of the south half of lot three, second concession, Township of Bucke, forty acres, two veins each giving very satisfactory assays. This is three lots distant from the Green-Meehan. No. 5—Consists of the southwest quarter of the north half of lot eight, concession three, Township of Bucke; very good vein, showing fourteen

No. 6-In Abitibi Lake section; has twelve distinct yeins

7-Forty acres, lot one, concession four, Cook, forty acres. No. 8-South half of lot twelve, concession four, Township of Barnet, forty acres; has a ten-inch calcite vein, with twenty ounces of silver on the
