Blanks,

the mining exchanges to-day, the markets evidenced a greater scarcity of offerings than has been seen for some time. Cleveland Cobalt was the active feature of the day, the buying of these shares bringing about a further increase in the price. Professionals are still heavily short of the more active stocks, but are feeling much more nervous of their position than has hither to been the case. Poster, Trethewey, Silver Queen and Green-Meehan were steadily firm thruout to-day business and no concessions were necessary when actual stock was involved in the transfer. Traders are fighting any improvement in the market and are cautiously putting out new short lines. This class of trading has not been successful for several days now, but will only be reversed by the floor traders when they become convinced that the new buying is sufficiently good to absorb all offerings. The markets closed dull, but the undertone was steady and in spots quite firm.

REVIVAL OF SPECULATION

May Result by European Buying of Cleveland Cobalt Stocks.

An active demand for Cleveland Cobalt shares occurred both at Toronto beat shares occurred both at Toronto interiors. The class of trading has uncovered the more active steady and in spots quite firm.

REVIVAL OF SPECULATION

May Result by European Buying of Cobalt Stocks.

An active demand for Cleveland Cobalt was the active feature of the day. The more standard and start of the single state of the start of the single start of the sing offerings than has been seen for some time. Cleveland Cobalt was the active President of Silver Queen Visits the

LARDER LAKE NEWS. Recent Incident of the New Gold

H. C. Barber, in his weekly letter, gives the following items regarding the Larder Lake district, recently gathered by his representative at the camp: "The sensation of the week has feen the discovery of free gold a quarter of a mile from our office. Beyond this, and just over the hill, another find of free gold has shown up. Free gold has also been discovered on the north side of the lake, just east of the Narrows. J. E. Craft of Lima, O., a man who has had a large and varied experience in all the great mining camps of the world, is now at Larder, acting in the interest of a large firm of New York financiers. He tells us that his impression of the camp as a gold producer is equal to anything that he has yet seen. Capt. Magee of Utica, N.Y., has arrived in order to inspect claims, and he is as enthusiastic as Mr. Craft as regards

the future of the camp.

"Fred Fuller, in charge of the Larder Lake Proprietary Goldfields, Limited, reports discoveries of free gold on claims." claims Nos. 1885, 2024 and 2028. A splendid showing of free gold has also been discovered on the claim adjoining claim No. 2132 of the Proprietary Company. "Great discoveries are reported some way north of the lake (near the Margroup of claims), and a New Liskeard syndicate is commencing large operations there.
"The district round Barber Lake is

showing up very rich, and all the way round large masses of exposed rock reveal excellent quartz veins. This particular location is exceptionally promis-
