been received in life-membership fees; and a considerable amount from those who have anolled as ordinary members. Applications for membership can be made to the secretary treasurer, Rev. W. Burns. The needs of the college are very great just now. There is, apart from the amount required for the current year, a deficit of about \$6,000 from last year. The ordinary membership fee in the association is devoted to the ordinary revenue, thus helping to reduce this debt. Life membership fees are massed to the endowment account. It is not intended that this effort should in any way interfere with the regular congregational collection, or contribution of the Missionary Association to the college funds. The classes are well attended. The new professors are doing good work and there is not likely to be much bodily ease or mental languor in Knox. The older members of the staff will be able to devote ruler attention to the special work allotted to them and it is hoped Knox has entered on an era of prosperity. American Consul for Rossland.

AN UNUSUAL PROCEEDING.

Mr. G. F. Wheeler, the eminent barrister and chief clerk of the Privy Council, in an interview on the subject of the probable composition of the Venezuelan arbitration tribunal, as far as Great Britain is concerned, informed a representative of the United Associated Presses to-day that it was an unusual thing for judges to sit on arbitration tribunals. It was more than likely, he thought, that eminent international jurists, such as Sir W. H. Anson, warden of All Souls' College, Oxford, and Lord Davey, Lord of Appeal in Ordinary, would be appointed, though the latter would possibly refuse to serve.

Col. W. T. Engledue has ordered a steam hoist and boiler from M. Beatty & Sons of Welland, Ont., for the Mikado mine, to be shipped in six weeks.

The Lake Harold mine is stated to have already produced \$7554 from development ore alone.

Mr. Alan C. Cameron of Toronto has secured mining location K. 244 and others north of Red Vermillion Lake, directly across the lake from the Randolph mine. The main vein on K. 244 is 24 feet or more in width, and gives an average assay of \$25. There are nime different pits on the property from 6 to 14 feet in depth. In all the pits the veins are strengthening as they go down.
