APRIL.—We have often protested against the shameful waste of manure visible in many parts of Canada. Increasing intelligence among our farmers is greatly diminishing the grounds of complaint, and we trust every farmer will be brought to see the great folly of wasting the very substances which produce growth and wealth. A valuable article appeared on this subject last year, in the "Canadian Agriculturist," published in Toronto. A careful attention to the advices and direction of the Editor would speedily add to the riches of Canada. Our limited foot-notes will not permit us to go extensively into the subject, but to awaken attention we shall devote two or three paragraphs to it.
