TO TRAVELLERS.

For the information of Travellers between Windsor and Parrsborough, &c.

THE Parrsborough packet sails regularly between Windsor and Parrsborough every week, from the first of April to Christmas, vizt: leaves Parrsborough on Monday, wind and weather permitting, so as to be at Windsor on Tuesday; and will sail from thence the first high water that happens at or after eight o'clock in the forenoon of that day: the packet frequently goes twice or three times a week, when business requires it.

The vessel is upwards of fifty tons burthen, and has very good accommodations for passengers; and likewise for carrying horses, neat cattle, and sheep.

ON CROWDED ROOMS.

TOO much cannot be said against the bad effects of crowded rooms. The continual discharge from the surface of the body, perspiration, sweat, breath, even of the most healthy person, are in a state not very remote from putrefaction; but in persons labouring under disease, are still of a more noxious nature. All physicians will tell you this. Of course, independent of catching cold, no person can be in a crowded Theatre or Ball Room without being in danger from contaminated air, and the more so if the disposition of the person is in a state to be susceptible of the noxious impression.
