

THE START OF A SANATORIUM. Medical Society Recommends Establishment of One. Committee Presented Full Report Last Night. Doctors Decide to Raise Fees for Insurance Examination.

The afternoon session of the New Brunswick Medical Society was largely taken up with a discussion on what should be changed by medical practitioners of the province in making medical examinations for the insurance companies and in considering the report made by the committee appointed to acquire information concerning the establishment of a sanatorium for the treatment of tuberculosis.

BABY'S OWN SOAP. A Safe Soap for a TENDER SKIN. Albert Toilet Soap Co., Mrs. MONTREAL. There is no other just as good.

Previous to the main discussions the following papers were read: Paper by Dr. A. B. Atherton, Fredericton, N. B., "Dermoid Cyst of Ovary with Unusual Features."

FREDERICTON, July 18.—The Hon. F. P. Thompson and W. T. Whitehead, M. P. P., have been appointed delegates by the board of trade to proceed to Ottawa to urge the construction of the Grand Trunk down the valley of the St. John. The board has also requested this city and the county to appoint delegates to go along with their representatives.

The following should be added to the list of those who have passed the professional examinations on June 1st and are entitled to have their names registered in the Medical Register: B. W. Robertson, St. John; D. C. MacIntosh, Hartland; S. O. McKenzie, Montreal.

A pretty wedding took place at St. Dunstan's church this morning when Catherine Boyd became the wife of Albion Gilles of Summerside, P. E. I. The Rev. Father Carney tied the nuptial knot, and the happy couple left by the 9:20 train for their future home on the Island.

The report of the committee on the sanatorium question was read by the chairman, Dr. G. A. B. Addy. It states that in Canada last year there were 45,000 cases, with 8,000 deaths. That the committee recognizes that voyages and trips to better climates are impossible for the majority of the sufferers, and that therefore the first thing to be done is to add another to the grand list of institutions which are doing such grand work, but one far different from those now existing.

What Men Want. They Must Have Nerve in Order to be Happy—Now Free to All.

It should be expressly built for the poor sufferers pining for fresh air, peace, rest and soothing surroundings. It should be in the country, it should face the sunny south, and in some pleasant spot where a range of high hills should shelter it from the chilly breeze of the sea, and where the high grounds would ward off the cutting, biting and killing breezes of the east, and where the high and well grown woodland should be ready to soften rays of the hot too boisterous western gales.

REASONING BY DEDUCTION. (Harper's Weekly.)—George Ade, not long ago, was speaking of the curious ideas some children have of the most ordinary things. Ade then said the story he was about to tell actually occurred in Indiana, his native state.

1st. Hygienic—This treatment teaches the patient how to take care of himself, the food and drink he is to take, and the time for taking it. It regulates the hours to be spent out of doors, the amount of sleep, and the things to do, and those not to do. It is apt to be resented by the patient, as the popular idea seems to be in opposition to this treatment.

ESCAPED AN OPERATION. "I had itching piles for six years, and the doctors told me there was no cure for me unless an operation. Dr. Chase's Ointment completely cured me in one week. As that was six months ago, and there had been no return of the old trouble I believe that the cure is a permanent one."—Mr. J. Mawer, Roden, Man.

2nd. Climatic—The climate of New Brunswick is very much the same as that of the Catskills, Adirondacks, or even Colorado, and patients who go to the south do not improve nearly as much as they do here in our stimulating, cold, crisp winter weather.

REV. MR. CALDER'S CASE. His Mental Condition to be Examined. SYDNEY, N. S., July 19.—Under an order from the lieutenant governor in council, Rev. Wm. R. Calder was removed today from the county jail at Sydney to the Nova Scotia hospital, Halifax, for examination as to his mental condition.

3rd. Dietetic—The forced feeding with milk and eggs is practically more essential than the climatic open-air life, but of course patients could never take about 700 quarts of milk and 1,600 eggs yearly outside their regular meals, if it were not for the stimulating effect of the out door life.

WILSON'S FLY PADS. WILL CLEAR THEM OUT. BEWARE OF SUBSTITUTES.

4th. Medicinal—There is a wide difference of opinion as to what extent drugs should be used advantageously. 5th. Sanatorium—The committee commend the adoption of the pavilion and cottage plan, which is universally recognized as the best plan of hospital construction ever devised. Each patient is provided with separate sleeping apartment.

Where Men Get Hurt. Sackville. SACKVILLE, July 19.—Rev. S. T. Baillie, who has been here for the past month in the interests of the Royal Templars of Temperance, leaves this week for Amherst, where after spending two weeks he will proceed to Florence.

IN PARLIAMENT. Prorogation will Likely Take Place Today. Senate Passed Trading Stamp Bill After much Discussion—Sir Wilfrid Reconciled Matters.

OTTAWA, June 18.—The autonomy session was finished at 4 o'clock today, just six months and a week from its opening on January 11 last. The business of the day was largely routine. After a discussion of the fast mail service trial by the steamer Virginian, the house put through the bill for increased seasonal allowances and increased salaries for the judiciary, and then attended to routine. Prorogation now awaits the pleasure of the senate, who are talking out the autonomy bill. The commons adjourned pending the senate's conclusion.

SURPRISE SOAP. A PURE SOAP. HARD. You Can Use "SURPRISE" Soap in any and every way, but we recommend a trial of the "SURPRISE" way, without boiling or scalding the clothes.

DROWNED AT DIGBY. Thomas Hardwick Lost and His Brother Rescued Just in Time. DIGBY, N. S., July 19.—Last evening at five o'clock Thomas Hardwick of Parker's Cove, Annapolis Co., Bay of Fundy side, was drowned in Digby Gut near Victoria beach. Thomas and his brother Richard left Parker's Cove yesterday in their fishing boat for some point in Digby Basin for bait, when ever it could be found. The boat was turned down by a sudden squall which threw the men out. Richard clung to the boat, but was unable to reach her and clung to a barrel floating near him. In one of the fatal swirls in that locality he sank. Several boats put off from Grandville and rescued Richard, who is now being moved to the Capt. John S. Hayden and is recovering from his prostration. Thomas had one hundred dollars in his pocket. The body has not yet been recovered. It is believed that the boat was again seen when lost in the Gut. The deceased was aged 27 and leaves a wife and two children. The rescued is 25 years old.

NURSES MUST REGISTER. Registration System Favored by Medical Society at Closing Meeting Yesterday—Next Meeting at Fredericton. The last session of the annual meeting of the New Brunswick Medical Society was held yesterday morning, when Dr. E. T. Gaudet, of St. Joseph, N. B., the new president took the chair.

POLLOCK PLENTIFUL IN PASSAMAQUODDY BAY. Dog-Fish Are Reported Scarce—Quoddy Boatmen Reaping a Harvest. EASTPORT, Me., July 18.—The schools of small pollock were unusually plentiful in different parts of Passamaquoddy bay during the latter part of the week and many of the Quoddy boatmen were out securing what they could as the fish are in demand, even if small, but of course they are a number of large pollock in the lots caught. Some of the boatmen who thought little fishing to slow for quick returns, tried grafting with some success and Saturday morning dynamite was used by several and the explosions were heard in this city at frequent intervals. It is generally understood that there is a law on this side of the water, as among our Canadian neighbors, in regard to using such explosives in the killing of pollock or in fact any kind of fish that are caught in and about the bay. Those who were engaged in the practice Saturday were evidently afraid, and they managed to gather in some fish, but of course only a small part of those killed by dynamite are ever found on the water by the boatmen. Up to the present time no one has been heard of the old enemy of all fish, the porcupine dogfish that usually put in their unco appearance during the sardine canning season, when there is a rush for many of them are about this season as was the case during the last few years. There would probably be no legal action by the government over dogfish as they are of no use to anyone, excepting perhaps for fertilizer, and then they are not desired.

Is Bound for the North With Commander Peary. Dr. Louie J. Wolf Talks Entertainingly to the Sun About the Trip to Find the North Pole on Which He is Now Starting.

"Yes, I am going to Sydney to join the Arctic explorer Robert E. Peary on board his ship Roosevelt to go into the northern wilds for at least a year and one-half and possibly for two years." The speaker was Dr. Louie J. Wolfe of Silvertown, Oregon, a young and bronzed graduate of the Cooper Medical Institute, San Francisco, who has been selected by Peary as the surgeon to accompany him on his explorations.

EASTPORT, Me., July 18.—The schools of small pollock were unusually plentiful in different parts of Passamaquoddy bay during the latter part of the week and many of the Quoddy boatmen were out securing what they could as the fish are in demand, even if small, but of course they are a number of large pollock in the lots caught.

"This is my first dive into the wilds" said Dr. Wolfe, "so that I cannot say the 'lure of the wilds' draws me. It is a vague thing that does not happen to every man, certainly, and while there will be much hardship, I have no fear as to the results of the trip. There never was a fitter boat put forth on a voyage of exploration to either Arctic or Antarctic regions. A sturdy ship with out rigging and it is not a pleasure trip we are bound upon."
