DURING the last two years, great improvements have been made in this Machine, and it now, more than ever before, challenges compari on for light and quiet running, ease of management, capacity for doing every kind of work required of a Sewing Machine, convenience of arrangement and elegance of style. We assure every lady, needing a machine, that she can better afford to buy a new Florence, even at the old high price, than to take any other Machine, for her daily work, as a gift. And in saying this, we thren 1 no disparagement to other machines; had the Florence never been invented, they would have been public blessings. It is only in comparison with the simple and effective Florence that they lose their value.
