

230290

Ottawa May 18, 1910.

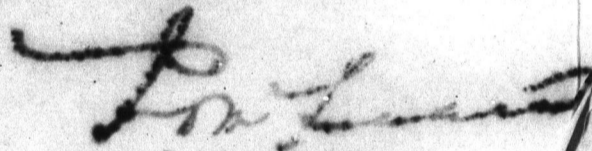

Sir,-

In your return showing farming operations upon White Bear's reserve for the season of 1909 which accompanied your letter of 30th of October last you enumerated in detail 103 1/2 acres as sown in oats but placed the total at 124 1/2 acres.

In your letter referred to you state that 22 Indians are farming whilst in the return only 21 names appear and in your agricultural and industrial statistics for the fiscal year ended 31st of March you report 124 1/2 acres as sown in oats.

And it is possible from the fact of only 21 Indians being shown in the return that the name and crop of one may have been omitted and as your statistical return is latest in date and should be perfectly reliable please state what the total acreage sown in oats was i.e. 103 acres as detailed or 124 1/2 as twice reported in the aggregate. A prompt reply is desired.

Your obedient servant

Secretary

Thomas Cory, Esq.
Carlyle,
