

they will lose the white spots and look more like the old one.

5. Wild deer live in the woods by day, and come out to feed by night. They will leap a high fence to eat young grass, wheat, oats, or corn.

6. When the days are hot, they like to stand in a brook, or bathe in a lake or a pond. They swim fast and with ease.

7. The meat of deer is nice food for man. Can you tell what things are made from the skin.
