PREFACE

THE trees described in this volume are those indigenous to the region extending from the Atlantic Ocean to the Rocky Mountains and from Canada to the northern boundaries of the southern states; together with a few well-known and naturalized foreign trees such as the Horse-chestnut, Lombardy Poplar, Ailanthus and Sycamore Maple.

It is hoped that this book will commend itselt:

To amateur botanists who desire a more extended and accurate description of trees than is given by the botanical text-books in ordinary use.

To such of the general public as habitually live near fields and woods; or whose love of rural life has led them to summer homes in hill country or along the sea-shore; or whose daily walks lead them through our city parks and open commons.

To all those who feel that their enjoyment of out-door life would be distinctly increased were they able easily to determine the names of trees.

The author is glad to acknowledge her great indebtedness to the following books of reference; Sargent's "The Silva of North America," Michaux's "North American Sylva," Loudon's "Arboretum et Fruticetum Britannicum," Emerson's "Report on the Trees and Shrubs of Massachusetts," Sach's "Physiology of Plants," Sach's "Text-Book of Botany," Le Maout and Decaisne's "General System of Botany," Britton and Brown's "Illustrated Flora of the United States and Canada," Dawson's "Geological History of Plants," Hough's "American Woods," Gray's "Manual of Botany," sixth edi-
