

The CAPITAL Is the Cream Separator that will "Buy Itself" For You.

As soon as you have read this advertisement, sit down and write a post card for The Capital book—the book that not only tells the story of the easy-running, cream-saving separator, but that tells how you can put The Capital in your own dairy practically without costing you a cent.

The book also tells all about the wonderful Capital gears, about their perfect meshing and non-wearing qualities—how they run in oil—how an automatic clutch stops them running the minute you let go of the handle—and about how they give the light, three-and-a-half-pound bowl, 7,000 revolutions a minute.

It tells how and why The Capital skims closer—why The Capital wastes less than one-fifth the cream that other separators waste—and then explains how the machine can be made sweet and clean in two minutes after you are through using it.

This book is full of hard-and-fast facts—separator facts—which every dairyman owes it to himself to know; facts which will prove a revelation to the dairyman who is not familiar with The Capital.

Write for the book to-day—NOW.

THE NATIONAL MFG. CO., LIMITED.

Head Office: Ottawa.

Factories: Ottawa and Brockville.

Branch Offices:—Regina, Sask.; Edmonton, Alta.; Moncton, N.B.

MESSRS. HICKMAN & SCRUBY

Court Lodge, Egerton, Kent, England.

Export pedigree live stock of every description. Owing to rapid increase in business, Mr. L. C. Scruby has been taken into partnership. During the spring months the export of horses will be a specialty. We are at this business all the year round, and can do better for you than you can do for yourself, even if you do come over to do your own business. Send us your orders, and we will do the best we can for you. Nobody can do more.

HEREFORD BULLS

You can buy two right good, well-bred Hereford bulls cheaply if you write me quickly. Do it now.

H. D. SMITH, HAMILTON, ONT.
"Ingleside Farm."

Homestead Aberdeen-Angus

Bulls all sold, but must sell a number of cows, as I am short of grass. Will be priced low for quick sale. Come and see them before buying.

Wm. Ische, Sebringville, Ont.
Long-distance phone.

FOR SALE: SOME NICE YOUNG

Aberdeen-Angus Bulls

and some females of all ages. Also a first-class Clydesdale stallion. J. W. Burt, Coningsby, Ont.

ABERDEEN - ANGUS

Will sell both sexes; fair prices. Come and see them before buying. Drumbo station.

WALTER HALL, Washington, Ont.

Aberdeen-Angus Cattle

7 choice Aberdeen-Angus bulls for quick sale, from 9 to 10 months.

Geo. Davis & Sons, Alton, Ont.

SHORTHORNS

Choice young bulls and heifers, dark roans and reds. One white bull calf at a bargain. Dams all from a milking strain. A few Shropshire ewe lambs. Write for prices.

JOHN RACEY, Lennoxville, Que.

Brantford Roofing has two trade-marks

You cannot always judge a roofing by its price. Lower-grade roofings are often sold at about the same price as Brantford Roofing. So please be careful.

You can only make sure of lasting service by first making sure that you are getting the GENUINE Brantford Roofing. Remember that each roll of the genuine bears two trade-marks. One trade-mark is "a roof with a big letter B in the gable." The other is a "rooster" in the act of crowing.

Send right now for our big roofing book. It tells our reasons for making Brantford Roofing higher in quality than any other ready roofing. We believe you'll appreciate these reasons. It also tells why we make Brantford Roofing in THREE finishes—Asphalt, Rubber and Crystal.

BRANTFORD ROOFING COMPANY, LIMITED,
Brantford, Canada.

EUREKA SANITARY CHURN

There's no comparison between the ordinary wooden churn and the "EUREKA". Barrel is stoneware—top is clear glass. Besides being absolutely sanitary, the glass top enables you to see how the churning is coming along without opening the churn.

Also made with Aluminum top. The "EUREKA" is the easiest churn on the market to operate. By tilting back the frame until the weight rests on the wheels, the churn can be quickly and easily moved—while the barrel remains upright.

If your dealer does not handle the "EUREKA," do not take a substitute but write us for catalogue. EUREKA PLANTER CO. LIMITED, WOODSTOCK, ONT.

QUESTIONS AND ANSWERS. Miscellaneous.

POULTRY TRESPASS.

1. What would be the proper steps to take where a neighbor allows his poultry to run and destroy grain at seeding and harvesting time?

2. Is a man compelled to fence against poultry, on the back end of a hundred acres, one-half mile from our buildings?

A SUBSCRIBER.

Ans.—1. You may have the poultry impounded under Sec. 3 of the Act Respecting Pounds (Revised Statutes of Ontario, 1897, Chapter 272), or may serve your neighbor with notice in writing of their trespass, and, if thereafter he refuses or neglects to prevent the poultry from further trespassing on your premises, you may have him brought before a Justice of the Peace and fined.

2. No.

SPRUCE GALL-LOUSE.

I have a row of spruce trees six or seven years old. Last fall I noticed the leaves on one looking brown; thought little about it, but this spring it is dead. I can see it starting on others. It looks a little like black knot on a plum tree. Please tell me how to prevent it from killing them.

C. R.

Ans.—The trouble with your spruce trees is that they are attacked by a spruce gall-louse. Of these insects there are several species, and the same remedy will not always apply to each of these. If you will kindly forward a specimen to me at the Ontario Agricultural College, Guelph, I shall tell you which one it is that is troubling your trees. The remedy for the most common spruce gall-louse is to give your trees a thorough spraying before May, with either whale-oil soap (1 lb. to about 5 gallons of water), or with lime-sulphur of the regular spring strength used in orchards. If the lime-sulphur is the commercial variety, use it at the strength of 1 to 9 or 1 to 10. Either of these sprays will, at this time of the year, rid the trees of the pest, if thoroughly done. It is quite possible that there is also some other cause that is helping to weaken the trees that are badly attacked.

L. CAESAR.

RE TELEPHONE SERVICE.

I would like to get a little more information in reference to an article in your March 24th issue, by H. J. Davis, of Oxford Co., Ont.

I have been a subscriber on a rural Bell line for a term of three years, and must say got the best of service, but before the end of the term the Bell Co. sold the line to a stock company. By this time the farmers of the district—North Huron and South Bruce—were ready to use 'phones, but they wanted them at cost, so we organized as a mutual company, to put up our own system, and each pay alike—ten dollars a year until our system is paid for. Now, Mr. Davis says ten subscribers and himself built at a cost of \$80 a mile two miles of line, including 'phones, wire and erection.

The way I understand this, it would mean two miles of line and eleven 'phones for \$160. We would be very much obliged if we could get a detailed account of cost of line and 'phones.

C. JOHANN.

Ans.—I did not mean all the 'phones were on the line of two miles; there are three on the two miles we rent from the company. It is pretty hard to give figures accurately of a line like this. The poles cost 75c. for 30 ft., and 60c. for 25 ft. poles, f.o.b., Dundalk. They were drawn and erected by the subscribers. Each three-battery long-distance 'phone costs about \$13.00, with push buttons, wire, 3¢ cents per pound; glass and other fixings make the cost of each 'phone, if the residence is near the road, figure out about \$17. The better way for subscribers to do is to communicate with the head office of the Bell Co. at Montreal, who will send a man to give all estimates, and will give information free, and will put the contract in shape for signing; also, write the firms advertising in this paper for the supplies.

Oxford Co., Ont. H. J. DAVIS.
