M., M. D., Graduate of McGill College; Francis W. Campbell, M.D., L.R.C.P., London.

For a sufficient test of merit we beg to state since the commencement of this old and reliable company in Canada, we have had the pleasure of insuring members of Parliament, some of the leading legal talent, and amongst numerous others, several of the leading merchants in this city.

This Company was the Pioneer Company of the non-forfeiture principle, and still takes the lead for every Policy it issues is non-forfeitable after one payment. The Company is now erecting new stone building, five stories in height, at the cost of \$10,000, similar to the Molson's Bank of this city, but of much larger capacity, having 75 feet front, and 110 feet depth, containing three Banks, some Express Offices, and the Post Office, yielding about \$8000 income, annually, all of which is the accumulating property of every Policy-hold.

The Company has issued nearly 2,000 Policies since the 1st January 1867, which is the largest number, in comparison to the expenses, of any Company in Europe or America.

Such are the Results of the Cash System.

Full particulars, history of the Company, Rates, &c., can be obtained at the Managing Office for the Canadas.

THURSDAY, MARCH 26, 1868.

**THE NEW INSURANCE ACT.**

The proposed changes in the law respecting Insurance Companies call for a more thorough examination from our legislators than is generally considered sufficient; for whatever affects the companies, whose object is to afford security against loss to the thrifty and prudent, must react upon those who partake, in the character of clients, of the benefits which the system of insurance affords. Insurance Companies are not the only sufferers by ill advised legislation; hence it is that the questions raised by the introduction of the new Act assume an importance worthy of the serious consideration of the community at large. Selfishness, if nothing else, should bring public opinion to bear on the subject, and thereby secure an equitable measure that will reinvigorate rather than retard, and encourage rather than destroy. Already representations made in the proper quarter have produced an expressed willingness on the part of the Finance Minister to modify the measure now before the House of Commons at Ottawa, and we are sure that an attentive ear will be given to suggestions for improvement, such as are supported by legitimate argument. If it can be shown that its provisions as they now stand will entail serious injury to the interests of the country, we believe that the amendments necessary to prevent such consequences will prevail.

Insurance business, like every other kind of business, has its interests promoted by a healthy competition. Not only is this the case, but the public interests likewise participate in the advantages that result from it. Now this Act, as at present framed, will undoubtedly cause a number of local Insurance Companies to close their doors and drive, at least half, the foreign companies out of the country. Is that an object to be desired? If the local companies be destroyed, a considerable amount of local capital will be utterly lost. If there be an exodus of foreign companies, the local ones being extinguished, the result will be, that the insurance business of the Dominion will be converted into a huge monopoly in the hands of a few wealthy corporations whose smallness of number will facilitate combination and consequent increase of rates.
