

# FROM OUTSIDE CAMPS

## THE SLOCAN.

Assessment work has been completed on the Starling and Mountain Chief claims near the Idaho.

The Cumberland opened up with five or six men and in all probability this mine will be worked all winter, not increasing the staff.

Ore shipments for the week ending October 24th from Slocan City are as follows: Arlington, 230; Enterprise, 20; Black Prince, 30; Bondholder, 3; Hampton, 6; a total of 289 tons.

A bond for \$35,000 on Wm. Vallentin's Four Mile property fell through last week. W. H. Sandford, the intending purchaser, dropped the deal. Mr. Valentine wanted \$500 more than the first payment called for.

Work has been resumed on the Dardanelles with a small force and soon small shipments will be made from the vein of dry ore now being developed. For the present no shipments will be made of the silver-lead ores.

The Mollie Hughes is to be opened up at once. An ore car, rails, steel and blacksmith's outfit are being taken to the mine, and when the blacksmith's shop is in readiness and the track laid work will go ahead rapidly. It is estimated that there is \$36,000 worth of ore blocked out.—Sandon Mining Review.

The shipments of ore over the Kaslo & Slocan railway through Kaslo for the month of October were as follows:

Tons.	
Whitewater, to Trail	558
Slocan Star, to Trail	502
Rambler, to San Francisco	371-2
American Boy, to Trail	165
Reco, to Nelson	106
Last Chance, to Kootenay Ore Co.	100
Washington, to Nelson	63-1-2
Sunset, to Trail	62
Bismark, to Nelson	16-1-2
Antoine, to Kootenay Ore Co.	15
Silver Gance, to Trail	10
Total	1,925 1-2

The shipments for the past week included a small shipment from the Bismark, a South Fork property belonging to G. E. Gardner and others. This property has not shipped for some time. The shipments for the week were:

Tons.	
Slocan Star to Trail	96
Whitewater, to Trail	83
Rambler, to San Francisco	44-1-2
American Boy, to Trail	41-1-2
Sunset, to San Francisco	21
Reco, to Nelson	45
Last Chance, to Kootenay Ore Co.	20
Bismark, to Nelson	16-1-2
Total	409 1-2

The value of the October shipments through Kaslo may be approximated at \$134,750.

## SOUTHEAST KOOTENAY

There is more activity on Wild Horse creek this season than for several years past. The placer mines are in active operation and a large output of yellow metal is expected. Quartz mining has been extensively carried on and the present year has witnessed great changes in the mining situation.

Messrs. Violet and Olson came down from the Star group of mines on Saturday last. Mr. Violet reports that work done on the property this year has been most satisfactory. The tunnel is now in about sixty feet, following a pay chute eight feet wide. A crosscut at this point shows that the ledge has a width of 62 feet, with a large pay chute in the centre and one on each wall. The ore is copper. The vein of ledge carries concentrating ore of a value of \$10.58. The pay chute will average about \$3.40 to the ton.

There is no possibility of a doubt but that the Kootenay King and Watson will be shipping mines in the near future. The properties are situated on Victoria gulch, a tributary of Wild Horse creek, about eight miles from Fort Steele. A large amount of development work has been done on the claims. No. 1 tunnel is in 60 feet, No. 2 tunnel is in 92 feet, No. 3 tunnel is in 100 feet, besides several cross drifts and open cuts.

The St. Eugene mine may well be said to be closed for the winter or until the new year at least. During the past week a number of men have been laid off, and nothing except prospecting is now being done at the mine. Mr. O'Kelly, who has been running the boarding house at the St. Eugene has left for Spokane, and the small force on the hill are now being cared for by Mr. Messers. Mr. Bissel, the superintendent, Mr. King, manager of the concentrator, and Mr. King, manager of the concentrator, are leaving for Spokane in a few days. Although so many men have been laid off, nearly all the married men are still employed, and about 60 are at work. The town is very quiet with a small payroll at the mine, yet, with two large sawmills in operation, Moyie will still have a substantial backing.—Fort Steele Prospector.

## CAMBORNE ORES.

A Fine Display Brought From the Lardeau Camp.

By far the best display of ore from any one camp ever brought to Rossland may be seen in the window of Messrs. B. Johnson & Co.'s office on Columbia avenue. The samples were brought from Camborne by Mr. H. S. Wallace, who spent yesterday in arranging and ticketing the exhibit. The specimens are so rich and varied that it is difficult to realize that they came from the same camp. They comprise free gold quartz, silver-lead, iron containing gold values, cube galena, containing copper, etc. Some of the galena samples shown assay as high as 500 ounces in silver, and the quartz shows free gold plainly visible. The samples from the Copper King are exceptionally rich looking specimens.

Among the properties represented are the Alma, Criterion, Imperial group, Rossland, Camborne group, Silver Dollar, Electric, Eclipse, Sunset and Mohawk group.

The exhibit is very tastefully arranged on a base of red cloth, which brings the different ores well in relief, and the background are shown some views of Fish river and Pool creek, near Camborne.

A great many prospectors and mining men were gathered around the window yesterday discussing and admiring the ores. A visit to the office of Messrs. Johnson & Co. is well repaid by a view of this fine collection.

## PORCUPINE.

The Placer Camp on the Northern Boundary Line.

Mr. J. Mackay, formerly of the News-Advertiser staff, but now holding the position of assistant mining recorder of the Porcupine district, British Columbia, arrived from the north recently. Mr. Mackay is down on a two months' vacation, after putting in a couple of years' steady work in the northern mining camps.

Porcupine is one of the newest placer mining sections in the Province, and is officially recorded as being in the Chilkat Mining Division. Speaking of the work in the district, Mr. Mackay remarked that the past summer had been an unfavorable one for the prospector and miner owing to the high water which prevailed throughout the greater part of the season. During the brief low-water intervals and towards the end of the season, however, when the frost came in and the water remained low, some very promising prospects were struck, the ground being found to be very rich, and the many claims taken up will probably be systematically worked next summer. Mr. Mackay also stated that there is every prospect of the mineral claims in the Rainy Hollow district being worked next year. Some excellent strikes of gold and copper were made during the past season and the assessment work done on the claims. The prospects are good and the holders of the properties intend developing them as early as possible.

Speaking generally of the district, Mr. Mackay stated that it was well timbered and the land capable of producing good crops. Wild raspberries and other fruit are very abundant in the early summer and large game is plentiful. Bear, caribou, mountain goat and sheep being comparatively easily secured, any camp possessing an average sportsman or rifle shot can always rely upon fresh meat.

Loss of appetite and general debility are quickly overcome by the use of a few bottles of "The D. & L." Emulsion of Cod Liver Oil. Manufactured by the Davis & Lawrence Co., Ltd.

# THE STOCK MARKET AS TO SILVER-LEAD

A SMALL AGGREGATE OF TRANSACTIONS DURING THE PAST WEEK.

TRADING WAS GENERALLY DULL AND PRICES SLIGHTLY LOWER.

The total of the sales for the past week, 46,500 shares, correctly indicates the character of the trading, and in general the tone of the market. On Tuesday the volume of transactions dropped down to 1,500, the lowest on record for a long time. On most of the days trading was within narrow limits, and generally the tone of the market was on the weak side. There was no very decided movement in stocks.

Winnipeg, as usual, scored the largest number of transactions, and during the week showed but little change in price. Sales were made on the first day at from 61-4 to 63-4, while yesterday the price was 6 for two lots of a thousand shares each.

Cariboo of Camp McKinney took a further tumble, selling as low as 15 during the week, and closing at 16 asked and 12 bid.

Rambler-Cariboo maintained its strength, the price in actual transactions not falling below 49-1-2. Very little of this stock was offered, and probably but for the uncertainty of the silver-lead situation generally its price would climb higher.

Centre Star scarcely appeared on the market, but one sale of 500 at 46 being recorded. It was weak at the close, the quotations being 41 asked and 38-1-2 bid.

Among the minor stocks Princess Maud was the only one to show much activity, selling at 13-4 and 2. Scattered transactions in other shares did not indicate any movement of interest.

The sales for the week were as follows:

Thursday	14,000
Friday	9,500
Saturday	4,000
Monday	12,500
Tuesday	1,500
Wednesday	5,000
Total	46,500

# SPORTS OF WINTER

THE QUESTION OF HOLDING A CARNIVAL UP FOR DISCUSSION.

REASONS WHY THE CUSTOM OF FORMER YEARS SHOULD PREVAIL.

Will Rossland have a winter carnival this year? This question is beginning to receive some attention, it being the opinion in some quarters that a decision should be arrived at as early as possible, so that in event of the celebration being held the management would have ample time to complete their arrangements and advertise the attraction as widely as possible.

The point is made in connection with the holding of the carnival that it has been an annual event in the history of the city for some years, and that to omit it this winter would be to display a want of confidence in the prosperity of the community that would deal the city's prestige a serious blow. Again it is stated that as Rossland has had nothing in the shape of a public demonstration during the entire year subscriptions, as has been the case in previous years, which would make the matter of raising funds are necessary to the making of the winter demonstration successful easier than if the community had been asked to subscribe for other celebrations during the year. The further point is made that the resumption of work at the mines and the immediate prospect of a completely restored pay roll justifies the city's name throughout the country.

There are indications that all the material for a successful celebration during the winter are not wanting. The local sporting organizations are, or are about to be, fully organized, and as such enthusiasm is being displayed as in any previous years. Outside the city by the lake and its hockey club will be strongly supported in view of the fact that last year's team carried off the championship in the Rossland tournament, while the city has had no sports of any magnitude during the summer season. It is reasonable, therefore, to look for a large attendance of Nelsonites if a carnival is held here.

Grand Forks is going in for winter sports on an extensive scale this winter. H. W. C. Jackson, who has received communication from the smelter trust asking for particulars of the Rossland rink, and stating that a rink was to be built at the Forks for skaters, curlers and hockeyists. The Grand Forks people are in for a novelty with marked enthusiasm, and if Rossland holds a carnival it would probably draw largely from that source.

Phoenix will have a fast hockey club, probably one of the strongest in the proposed league. The hockey events on a carnival programme would add to the interest of the community. The city bringing a strong delegation from the business and professional classes.

Steps are likely to be taken shortly to bring matters to a head in connection with the celebration. To make the celebration the success it should be to justify the outlay, it will be essential that the management have ample time to push the attraction, hence the advisability of determining at an early date exactly what is to be done in the matter.

AT GRAND FORKS.

Customs Revenue—Smelter Accident—City Assessment.

GRAND FORKS, Nov. 4.—The customs revenue from imports at this city last month was \$4,744.

Chas. Smith, an employe of the Granby smelter, stumbled and fell backwards into a pot of molten matte a few days ago. He is doing well at the hospital and Dr. Northrop states that he will recover.

The assessment of Grand Forks real estate and improvements this year was \$1,108,900, as compared with \$275,143 in 1898. This is exclusive of the Granby smelter, which is situated outside of the city limits.

J. H. Wardner, of this city, has secured the contract for hauling six tons of ore daily from the Alabama group, near Nelson, Wash., to the Granby smelter. He makes a round trip every day.

Track-laying on the Grand Forks and Republic Railway is progressing rapidly under the direction of J. S. C. Percival. The company's first locomotive has reached here from Chicago.

The Columbia Telephone Company's local exchange has been closed.

B. C. Ribble, the Nelson, B. C., hydraulic engineer, has completed an inspection of the new addition to the power house of the Granby smelter.

Despite the lateness of the season there are 23 dwellings and office buildings now under construction.

The quickest passage from Europe to Australia is now made by a line of French steamers sailing from Marseilles. The trip consumes 34 days.

A GOOD SHOWING—The city of Rossland has made a specially good showing in the matter of taxes this year. Although the business conditions for a couple of months during the summer were such as to seriously disturb the equilibrium of trade, the improvement since the mines resumed has been substantial and the outlook is now bright. The effect has been very apparent on the taxes. At an earlier date it was feared that much difficulty would be experienced in getting in the city's revenue for the year, but the outcome proves that the fear was unfounded. The total collections for the year, including arrears, have been \$23,626.10. The current year has \$4,300, and the amount outstanding for 1901 is \$29,000. All licenses and water rates are, of course, constantly up to date or paid in advance. The amount outstanding is small as compared with the situation in Nelson, where, owing to an exchange, the city has \$35,000 of taxes unpaid.

WILL SOON SHIP—Word is to hand from Phoenix camp that work has been resumed on the property of the Golden Crown Mines, Limited, and that active development is under way. It is expected that ore will be shipped from the mine in the course of a month or two.

Highest Honors, World's Fair Gold Medal, Midwinter Fair

Avoid Baking Powders containing alum. They are injurious to health.

THE RAILWAY WORK

CONSTRUCTION OF THE V. V. & E. SPURS AT GRAND FORKS TO BEGIN.

PROGRESS OF THE TWO ROADS NOW HEADING FOR REPUBLIC.

GRAND FORKS, Nov. 4.—(Special.)—The construction of the V. V. & E. railway spur from Carson into the site of the proposed depot grounds here and the sub-spur to the Granby smelter will be commenced immediately and rushed to completion. There are in all about six miles of road to build. The work will occupy about four months, and will give employment to a large force of men. There will be considerable rock cutting around the base of Observation mountain, within the city limits.

Track laying on the Republic and Grand Forks railway is making good progress. A new 70-ton locomotive to be used on the line reached here today and will go into service immediately.

Peter Siems and L. E. Shields of St. Paul, who sub-let the contract for the construction of the Great Northern railway from Marcus, Wash., up the Kettle River valley to Grand Forks and Republic, have just completed an inspection of the work now in progress. Mr. Siems stated that trains will not be running into Republic before April 1st.

AFTER HORSES—Thomas W. Lillis, chief of the Nelson fire department, is in the city today. He is looking at a team of horses that has been offered to the city of Nelson for the use of the fire department.

BOARD OF TRADE—JUDGE LEAMY HERE—His Honor Judge Leamy arrived in the city last night from Greenwood and will remain in the city till Friday at least. Such legal business as arises in the meantime will be attended to. His Honor is accompanied by Mrs. Leamy, and is registered at the Hotel Allan.

CERTIFICATE OF IMPROVEMENTS. Notice.

B. X. mineral claim, situated in the Trail Creek Mining Division of West Kootenay district. Where located: On Lake mountain, adjoining the Elba mineral claim, lot 1814, G. 1.

Take notice that J. H. P. Renwick, acting as agent for James G. Morrison, Esq., files miner's certificate No. B. 4288, intend, sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this Twentieth day of September, 1901.

H. P. RENWICK.

Soft Harness

You can make your harness as soft as a feather by using EUREKA Harness Oil.

EUREKA Harness Oil

Makes a poor looking harness like new. Made of pure heavy bodied oil, especially prepared to withstand wear.

Sold everywhere in one-half sizes.

Made by IMPERIAL OIL COMPANY.

Okanogan Gold Mines, Ltd.

STOCKHOLDERS WHO HAVE NOT EXCHANGED THEIR SHARES IN ABOVE COMPANY FOR SHARES IN THE OKANOGAN MINES, LIMITED, ARE HEREBY NOTIFIED THAT SUCH STOCK IS NOW DELINQUENT AND LIABLE TO FORFEITURE TO THE TREASURY IN ACCORDANCE WITH THE ARTICLES OF ASSOCIATION.

INTEREST AT THE RATE OF 10 PER CENT WILL BE CHARGED ON ALL ARREARS.

THE PUBLIC IS WARNED AGAINST THE PURCHASE OF FORFEITED SHARES.

S. THORNTON LANGLEY, SECRETARY, ROSSLAND, B. C.

Two Dollars a Year

CHANGE AT NORTHPO

Circumstances Which

Mr. Labarthe Resign.

Oscar Szontagh to Charge of Works in Few Days.

In order to ascertain what exact situation at the smelter and the causes which led to the withdrawal of Mr. Labarthe from the position of manager, a reporter interviewed Mr. P. at the Le Roi offices yesterday and asked him to explain matters. Mr. Labarthe said: "The employees of the smelter union men gained the impression that the men whom Mr. Labarthe had down to Northport with his union sympathizers, and felt that would result in filing the smelter men in jeopardy. It was disheartened the men from holding their position that such intention was certainly no part of the program of Mr. Labarthe, who simply was available.

"The situation thus created a bitter fight there has been at Northport—a most serious one, and I have stuck so manfully to the end during its trouble were not every consideration. Mr. Labarthe recognized this also, and at great sacrifice decided not to accept a position which might engender further trouble—more so than he believed that any such whether well-grounded or not, that the union is to have any operation of the smelter, mental to the interests of the company is prepared to extend would be extended on their side. The men returned instantly work in the best of spirit.

"I wired to Mr. Oscar of San Francisco, a well-known metallurgist who enjoys a high reputation as a metallurgist and whom I had previously for the position of manager have his reply notifying me that he has accepted the position of manager of the works at Northport."

LEDGE OF IRON

PROSPECTORS MAKE WHAT BE AN IMPORTANT DISCOVERY.

THE FIND ON LARD CLAIM, NOT FAR FROM THE CITY.

An interesting strike in a large body of high grade iron ore has been made in the immediate vicinity of Rossland. A ledge of 40 feet of hematite or magnetic iron ore located on the Lard Road, bounded on the north by the Lard Road, from the Columbia river, one mile south of the Heather party. Samples of the ore were analyzed and found to contain 64 per cent iron and 4.40 per cent phosphorus. The average of the ledge is about 64 per cent iron and 4.40 per cent phosphorus. The ledge is bounded during the summer by Thomas Shaughnessy and owned by the Canadian Pacific.

The Lord Roberts is owned by Colm McIver and Sam Fox, well known pioneers in the camp. The work done in the ledge is largely confined to face, but seems to indicate lead is continuous and through the summit of the ledge. It is quite possible that the ledge may be of considerable extent. Iron ore of a good quality is in demand at all the leading smelting purposes, and the fact that the Lord Roberts is owned by Colm McIver and Sam Fox, well known pioneers in the camp, makes it of extra value. This is believed in by the owners and it is probable that an extensive ledge will eventually be established. Lord Roberts seems to be in great demand. The owners are quite anxious to have an extensive ledge and it is probable that an additional ledge will be discovered. Several prospectors have been engaged to inspect the ledge and to make a report on its value.

THREE MORE CAPTIVES IN KANSAS CITY, Mo. Several prisoners last week escaped from the workhouse at Kansas City, Mo., and were captured by the police.
