

DUTCH BULBS.

George Knowling

has just received direct from Holland a large shipment of finest quality matured Dutch Bulbs, as follows:

DOUBLE AND SINGLE BEDDING HYACINTHS.
HYACINTHS FOR GLASSES.
ROMAN HYACINTHS.
TULIPS, DOUBLE AND SINGLE, including such choice sorts as "Couronne d'or," "Murillo," "Tifan," "Vuurbaak," "Montresor," "Proserpine" and "Maas."

DARWIN TULIPS.
REMBRANDT TULIPS.
EARLY TULIPS—"Due Van Tholl."
POLYANTHUS NARCISSUS—in 10 varieties.
DAFFODILS—the most noted sorts as "Incomparable," "Orange Phoenix," "Sulphur Phoenix" and double "Van Sion."
TRUMPET DAFFODILS—"Bi-color Empress."
DOUBLE AND SINGLE JONQUILS.
ANEMONES—Double and Single.
SNOWDROPS.
SPANISH IRIS.
FRENCH LILIES.
NARCISSUS POETICUS—(the pheasant eyed Narcissus), etc., etc.

We can recommend these bulbs as choicest matured stock which with ordinary care will give a wealth of flowers unsurpassable for quality and luxuriance, and although

Sold at Our Usual Low Prices, nothing better can be obtained under any circumstances

GEO. KNOWLING.

POINTERS.

Another one of Sir Edward's death-bed repentances.

The very latest development in political circles to-day is that the Tory leader has at last secured a second man for Harbor Main District. The selected candidate, it is understood, is Mr. L. E. Emerson, solicitor, son of Judge Emerson.

What a cute pal he will make for Tipton Woodford.

Just imagine, electors, Morris going to represent a district such as Harbor Main, a "green" lawyer, who is barely old enough to vote. Why it's an insult to the intelligence of the people of Harbor Main.

The idea of choosing a school boy to represent such an important district as Mr. Main is causing immense fun around the city to-day.

What will Councilor Mullaly, who has been interesting himself in Mr. Main's late, say when he hears of the appointment.

The crowd say there will be war in the camp, as it is brewing already in other quarters.

"Pullet" Howley stated last night that he hoped his opponents would get fair play during the campaign. This announcement is identical (we don't think with the "Pullet's" secretary cries around Torbay and adjacent settlements.

Howley has expressed publicly that he doesn't care so long as he "wiggles" ahead of Howley when the ball is counted.

What a trio of traitors Howley, Higgins and Bartlett.

Who was it that during the campaign of the fall election, in 1908 would not allow a supporter of Gibbs to work on the premises where he was stevedores? Bartlett. He allowed last night to denounce the Liberal Party led by Sir Robert Bond, the greatest statesman the country ever produced.

It is currently reported that Pickett, notorious for "clapping the grip" on land properties, is not going to accept the colleagues that Morris has offered him to fight the election in the District of St. George, mainly because he wants two men with good principles from every standpoint and with good testimonials, not from the law-courts of course.

Harbor Grace is now solid Liberal.

At present it is generally conceded that the Tories will not get a man north of St. John's, while to the south the tidal wave is also with the Liberal Party. In fact all over the island, the opinion is that **ROAD CAN'T LOSE!**

Thick, Glossy Hair No More Dandruff

Girls! Beautify your hair! Make it soft, lustrous and luxuriant—Try the moist cloth.

Try as you will, after an application of Dandrine, you cannot find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A little Dandrine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Dandrine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy; and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of true hair health.

Get a 25 cent bottle of Knowlton's Dandrine from any drug store or toilet counter and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all.

Formation of the Grenfell Association.

(Continued from yesterday's Telegram.)

Two years ago a young doctor came from the College of Physicians and Surgeons down for the summer and went to Spotted Island where there were from two to three thousand people to look after; he told about it to his Christian Union and they agreed to take it over and put a doctor there. They built a boat there this year and have a motor boat; this will only be overlooked by the Mission, if they want things immediately such as vaccine and anti-toxine they can have them from the Mission. Spotted Island is about 30 miles from Battle Harbor and 120 miles from Indian Harbor.

Forteau was considered too small for a doctor and only had a nurse, but now it is enlarged and Dr. Wakefield is going there for the winter.

No one who has not spent a winter in the north end of the Island has any idea of the serenity of life as enjoyed there; it is very much like the lure which drives men like Professor Macmillan to come down there. Great many doctors come down there and gain the gratitude of assistance and everybody enjoys it.

Piley's Island hospital is only partially with the Mission. There was a doctor in Newfoundland between Twillingate and Bonne Bay, so deputations came down from Salvage, Wesleyville, Piley's Island and LaSalle, to try to get a hospital and a doctor there. We selected Piley's Island because the people were always saying that they would endeavor to help themselves. We provided them with a nurse for six months free, got a first class surgeon and a first class physician, and then two nurses who would stay with them for a year. We supplied fittings, motor boat, and the inhabitants pay as much as they can to keep the hospital running.

Harrington was founded at the invitation of a good many people along the coast who had no doctor between Battle and Quebec. The Canadians are quite willing to carry it, the Montreal committee undertook to carry it partially. The hospital has been enlarged and consequently there is more expenditure.

Any case that we have in our hospitals is recorded and we can turn it up in five minutes. When Mr. Cooker came down to St. Anthony he asked us to look up a case he had heard about, and we had all the facts in less than five minutes. When a man comes there he is treated well, and if his leg is to be saved we save it. With the hospital the place improves. One never hears of hunger in Canada, say since the Roddick Mill has been there, nor do we hear of any cases of starvation in and adjacent to St. Anthony.

It is almost impossible to get a person to realize what a hospital is if you could see a child coming in there a cripple and going away walking; a man who has a deformity and going away a new man. When you come to realize that it is a hospital being like yourself, and that you can do something for another man you derive real happiness. Our young men realize that, and they like the opportunity that is given them.

Only wish that more of the St. John's men would take an opportunity to see the work themselves, they would see what is being done.

Seeing that we have such excellent boats, I think that some of you might take a holiday and come down to see us.

The "Cluet" was given for the purpose for which we use it. It conveys our food supplies in a satisfactory and convenient way, but it has not quite paid for itself yet.

REMEMBER! I have had them six years and I have come to the conclusion that no one man can do that which took the resources of the American Government to make the Alaskan success. It is populating the wild interior and bringing up people who can take care of them. I get about enough with the small grant we get from the Canadian Government to pay the bills. We are after a piece where one day there will be proper opportunity. In order to further this influential scheme parties in New York are forming a company on a commercial basis.

With regard to other expenditures we should have to pay to provide for a deficiency in connection with running the Institute. It is no earning to the utmost of its capacity and yet everything is going steadily ahead and we are not confronted with this probability. No one wants to measure success by dollars and cents, but the Institute is a success financially and everywhere I hear the fishermen talking about the success of one of the steamers that he now has come down there twice a week for a shower bath. As regards the complete liquidation of the cost of the Institute Building and equipment, we are \$2,000 short, and we have got to meet it. I am going to the States to lecture and then to

England. In the hope something can be done thereby. Men whom I have mentioned this to felt that Newfoundland is appreciating the work that has been done, and it would be a very great help if some amount could be raised in the City of St. John's to finally close the Construction Account.

Dr. Grenfell mentioned the Annual Total Operating Expenditure now reaches \$50,000.

Mr. C. P. Ayre said: I have much pleasure in moving the following resolution:

"That this meeting hereby resolves to form and incorporate a Grenfell Association of Newfoundland for the purpose of electing and appointing two of its members to represent Newfoundland on the Council of the International Corporation now being incorporated to control and administer the affairs of the work originated by Dr. W. C. Grenfell, and as 'take such steps as may determine to secure financial assistance within the Colony to meet the expenditure authorized by the International Council, and that the Hon. W. C. Job and the Hon. Robert Watson are empowered to convene such subsequent meetings as will be necessary to carry this resolution into immediate effect."

Mr. W. Bains Grieve: The presence here of so many gentlemen is an earnest of the interest which they take in this philanthropic healthful work we have worked under the auspices of the R.N.M.D.S.E., but it appears that the old committee is going to be merged into a new one, the Corporation having as workers people in Canada and the United States, and the R.N.M.D.S.E. itself. I am sure that the work of Dr. Grenfell which has been done, and is being done, is a great work. He is not only curing the people of disease but he is taking care of the little waifs and strays. I think that probably we shall be able to reach a basis where the good work heretofore carried on will be continued for many years. I have great pleasure in seconding the resolution.

The resolution was passed unanimously.

Hon. W. C. Job: Before we part, I think it is the duty of this meeting to pass a resolution thanking Dr. Grenfell for the noble work that he has done this year. Never a year has so much been done. A present has been given to this Colony through the efforts of Dr. Grenfell, many of us do not realize that he has obtained a present of \$50,000. It is a fine fact that he has been doing his way. The activity of Mr. Sheard's distinctly of an expert nature, or his could not have been done. The attitude is no incubus on the community either. I beg to propose a vote of thanks to Dr. Grenfell.

Capt. Abram Keen: I have much pleasure in seconding the motion made by the Hon. W. C. Job. My work has brought me in connection with the work that has been done by Dr. Grenfell in Newfoundland, and maybe I can say something upon that matter. I think that if some of you see the work which I come in personal contact with, it cannot be estimated by dollars and cents. Many who have been treated and given up as hopeless have come down to Dr. Grenfell and been cured. I am very sorry to see that we have no representative from the Government present. A wharf has been started by Dr. Grenfell at St. Anthony at the expense of the Mission, and completion is necessary. We have never interrupted in landing freight of any kind, and it has been of immense value in the landing of sick passengers, and it will be a standing disgrace if something is not done by the Government of this Colony to assist in making it a really first-class wharf. I have seen young students take sick patients in their arms and carry them on shore, every attention has been given by the students, and Dr. Grenfell himself. I beg to second the motion made by the Hon. W. C. Job.

Hon. Robert Watson: One word in supporting the motion. I think that not only does the work that Dr. Grenfell has been doing in this Colony merit our warm approval, but the way in which he has aroused the enthusiasm in the United States and Canada. When I was in New York I had the pleasure of meeting some of the members of the Grenfell Association of America there, and was surprised at the enthusiasm of those men. They were indeed proud of their connection with the Association and of the work that was being done. Recently we have had the pleasure of meeting Mr. Herbert B. Ames, M.P. of Montreal, and Mr. V. C. Stirling, of Chicago. We owe a debt of gratitude to these men who are associated with Dr. Grenfell. His Excellency said we are proud of the original man—the man who sees the practical business side of the work, and we will gladly take a hand when our turn comes about, but now our thanks are given to the man who makes the wheels go round. We thank Dr. Grenfell very heartily indeed.

Hon. A. F. Goodridge: Proposed a vote of thanks to the doctors and nurses who help Dr. Grenfell in his work.

Doctor Grenfell acknowledged the vote and said this was done on previous occasions, and a little leaflet was printed and signed by the Governor and one or two of the members. It was decided this should be done again, and the Secretary of the Mission was authorized to do the needful.

Doctor Grenfell proposed a vote of thanks to His Excellency the Governor for so generously placing the ball-room at their disposal and his kindness in being Chairman of the meeting.

At the close of the meeting all those present enrolled themselves members of the Grenfell Association of Newfoundland.

VOTERS ATTENTION!—We want to inform the voters of St. John's and the outports that we have received the most select lot of overcoatings displayed. Order one, and you will get one of the best, stylish and most heavy coats that can be turned out on Water Street. We cater to the trade that know. Come in, and see them. SPURRILL BROS., 365 Water Street, next floor to Parker & Monro's.—sept 25, 1913.

The Nickel Theatre!

ALWAYS GOOD, RECOGNIZED THE BEST. TO-DAY 4 REELS 1.
