CONSOLIDATED PURIFIER CO'Y. 1 & 2 MYLES' DOCK, TORONTO.

STEAM USERS

Attending the Exhibitions at Montreal and Toronto desirous of Investigating how to

SAVE MONEY BY SAVING FUEL,

and at the same time secure

INCREASED CAPACITY OF STEAM POWER.

Are invited to call and see boilers in operation, set with the JARVIS system of furnace. Among others in Montreal are those at Jones & King Iron Works, 645 Craig St.; Char. Gault, East and Dye Works, 112 Queen St.; and Miller Bros. & Mitchell, Engineers and Machinists, 116 King St. and in Toronto at the extensive establishment of the West Printing Co. There are now over 1,000 boilers set this way in the United States and Canada. It is the same principle as the SIEMENS STEEL PROCESS—the waste gases utilized with hot air on top of the fire, which is the only way to obtain perfect combustion. Waste fuel used without blast; also scorchings, wet heat, wet hops, spent tan and dyewoods, &c.

BURNELL'S

FOUR-POINTED GALVANIZED STEEL BARB WIRE FENCING.

There are now before the public a number of Four-Pointed Barbs, which to the casual observer, are similar in appearance to the Burnell Barb which we are making, but a close examination of them will show the difference and their inferiority.

The Grand Trunk Railway Company of Canada give it a preference over all others, and have contracted with us for over one hundred tons of fencing for immediate delivery.

This Barb was patented in the United States in 1877, and is no infringement on any other patent, and we will defend dealers and consumers against the threats of pretended monopolists. We claim superiority for our Barb Wire over all others for the following reasons:

1st.—We use only the best quality of Galvanized Annealed Steel Wire.

2nd.—The two strands of No. 12 Wire are twisted together just enough to allow for the contraction and expansion of the metal, caused by heat and cold, and not so much as to injure the structure of the steel.

3rd.—The Barbs on our Wire are four-pointed, thus always presenting a Barb laterally or at a right angle, which is a great advantage over the Two Barb Wire, as cattle are unable to get against the fence to break it or push it down.

4th.—The Barbs are fastened to the Wire at intervals of 7 inches, in a manner entirely different from any other, being securely locked around and between both wires, so that they cannot slip or move toward each other, and they also prevent the untwisting of the cable should either wire get broken.

5th.—The machinery by which the Barbs are put on is so perfect that the Cable Wires are not injured or weakened by the process, as is the case with other Four-Pointed Barb Wire.

Manufactured by the CANADA WIRE COMPANY, Montreal. H. R. IVES, Manager

THE TORONTO

Medical and Electro-Therapeutic Institution,

Cor. Jarvis & Gerrard STREETS.

Opposite Jarvis Street BAPTIST CHURCH

Physicians: JAMES ALLEN, M.D., M.C.P.S.; Mrs. JENNY K. TRONN, M.D., M.C.P.S.; E. AMELIA TRIPP, M.D. assisted by educated electricians and nurses. This Institution has been several times enlarged since its opening, 3 years ago, and now offers unequalled advantages to the invalid of either sex. The Physicians confine themselves to no one system of treatment, but use whatever remedy promises the best result. Electricity, their great specialty, has in their hands wrought marvels. Baths of all kinds favorably known are employed, and medicines given as occasion may require. The diseases of women are treated by intelligent lady physicians. Terms for Board and Treatment, or for Treatment only, are exceedingly moderate, and the patient will find the Institute pleasant and homelike. Visitors to the Institute are cordially invited to call. Those desiring further information or references, will please address E. AMELIA TRIPP, or J. D. KIRBY, Business Manager, corner Jarvis and Gerrard Streets, Toronto. Carefully observe the address. Other irresponsible persons have closely copied our style and title.

TOBACCO!

New Brands for Smokers

I am now introducing the following NEW BRANDS of Tobacco throughout the whole Dominion. They are manufactured by an entirely new process, put up in neat packages, and are altogether unlike any brand in the market. I venture to say that each of them will be found a "Smoker's Paradise," and will win golden opinions from everyone capable of judging their undoubted merits over any other Tobacco.

THE "GLADSTONE" Cut Plug, made from the finest cultivated North Carolina Leaf, of medium strength, nice, natural flavor, bright color, just the thing for a thoroughly enjoyable smoke. Dose up to the nearest 10-pound packages in Canada.

THE "HUNTER" made from finest matured Virginia plug, of medium strength, naturally fragrant, burns sweet and a most pleasant companion.

THE "UNITED" Brand, made from No. 1 Solace, the merit of which is of world-wide reputation. Veteran smokers will have an eye to this brand.

THE "ROYAL MIXTURE" a combination of Cut Plug and Honey Dew, making an aromatic perfume particularly refreshing. Smokers with a taste for mixtures will like this and use no other. It does not burn the tongue like some mixtures.

THE "AERIAL" No. 1, Bright Navy Plug, 3 to a pound, put up in tin caddies—every plug bearing a shield with my initials, A. D. P., to ensure its genuineness. It is a magnificent article, of rather full strength, beautiful natural aroma, smokes easy, without heating the mouth, burns to white ash, and is in every respect suited to those who can appreciate such an extra good tobacco.

GIVE THESE BRANDS A TRIAL—YOU WILL SURELY LIKE THEM AND USE THEM

A. D. Forcheron,

Manufacturer, Canada Tobacco Works, Montreal.

McCOLL BROS. & Co.

TORONTO,

Were awarded the FIRST PRIZE for their LARDINE and other

MACHINE OILS

At the great Industrial Fair, Toronto, 1890, and

Four First Prizes and Gold Medal

At the Provincial Exhibition, Hamilton, 1880.

Their Lardine Machine Oil was used, by authority of the Association, on all the machinery at both Fairs during the four weeks, and proved a very superior oil.
