

K/36/4

THE PATENTEE.

A MONTHLY INTERNATIONAL PATENT JOURNAL.

Editor and Propr., A. HARVEY, C.E.
Vol. I.—No. 1.

OTTAWA, CANADA, JANUARY, 1887.

PRICE, 10 CENTS.
\$1.00 PER YEAR.

The Patentee.

Exclusively devoted to matters relating to patents for inventions, trade-marks, timber marks, designs, and copyrights. Guaranteed circulation, 6,000 copies among inventors, patentees, manufacturers, and capitalists, in Canada, United States, England, and Germany.

THE PATENTEE will contain notices and illustrated descriptions of new inventions, articles relating to patent, &c., laws, reports of legal decisions, articles of special interest to inventors and patentees, interesting notes and paragraphs, and patent statistics, making it the standard paper and champion of inventors and patentees. It will be the most effective advertising medium for reaching inventors, patentees, manufacturers, and capitalists.

One of the special, in fact the most important, objects of THE PATENTEE is, *the creation of a medium for placing before the public new inventions, with a view of inventor or patentees realizing substantial benefits from their inventions*, of which many valuable ones remain unremunerative at present. For this purpose it is necessary to have a paper having an extensive circulation among the right kind of people, and a paper that must be sufficiently interesting to be sought after and read. As regards the former, it will be conceded that a circulation of 6,000 is an excellent start, and as to the latter, the editor and proprietor will do his utmost to make it a success.

The standing of the editor and proprietor, a civil engineer of 23 years' experience among patents, and by no means new to journalism, is a fair guarantee that every promise will be faithfully carried out, and that talent and effort will not be wanting to make it a success in every respect.

ADVERTISING RATES.
