A GRAND OPPORTUNITY FOR WOMEN

IN A
CO-OPERATIVE ENTERPRISE

Owned, Managed and Operated by Women.

Owing to the unexpected demand, we have decided to offer another 5,000 shares of full-paid, non-assessable capital stock of our Company.

For sale

TO WOMEN ONLY

at par value—\$10.00 per share.

"IS IT SAFE?" "WILL IT PAY?"

Our business is firmly and safely established. Our paper, "THE HOUSE-KEEPER," in its subscription list, advertising patronage, and influence, stands in the front rank amongst the "Home" periodicals of the world. We have a large, miscellaneous publishing and printing equipment and business.

Present earnings warrant 10% yearly dividends.

A semi-annual dividend of 5% will be declared January 1, 1893.

All stock for which the purchasers have paid in full on or before December 31st, 1892, will participate in this dividend.

No other enterprise can be found, in which women have opportunity to become personally and actively interested, that offers such absolute safety and will pay such large dividends. This is unquestionably assured by the record of the business for the past sixteen years.

The co-operative plan of our business, details of which are given in our circulars, is an element of great strength in our Company. Through this co-operation earnings can be so increased as to give investors larger dividends or "interest" than it is possible to obtain from any other safe, well-secured investment.

PAYMENT BY INSTALMENTS.

If you want to buy on the instalment plan, let us know how many shares you wish, send \$1.00 per share to apply on the purchase price, and state what arrangements you desire to make for the payment of the remainder.

This being a Woman's Company, managed by women, for and in the interest of women, owning a great, Woman's Journal, the stock is meeting with great favor with women and is selling rapidly.

Our Officers and Directors

are women of pronounced ability and energy; all of them taking prominent parts in various fields of woman's activities.

Kate Buffington Davis, Minneapolis, (Editor of "The Housekeeper.") President. Member for Minnesota of the Advisory Council of the Woman's Branch of the Auxiliary Committee of the World's Columbian Exposition.

Mrs. Alice Houghton, Spokane, Wash. Member of the Board of Lady Managers of the World's Columbian Exposition. Also Superintendent of the Woman's Department of the State of Washington.

Corinne S. Brown, Chicago, Vice-President. Of the World's Congress Auxiliary of the World's Columbian Exposition.

Miss Mattie Twitchell, Director of the Minneapolis Froebel Institute for the training of teachers in Kindergarten and Schulgarten systems.

Louise Jewell Manning, Secretary. President and Director of the Manning School of Oratory, Minneapolis.

Sarah B. Vrooman, Kansas City, Kansas. Distinguished in Temperance and all Philanthropic movements.

Mary B. James, Minneapolis, Treasurer. A prominent and active member of the W. C. T. U.

SENT FREE! OUR PROSPECTUS, giving more complete information, and containing Portraits of Directors and Officers and Illustrations of the various departments of our business, will be sent free to any one; but if you wish to share in the semi-annual dividend of January 1st, 1893, you should send your order at once, for those only who have paid for stock prior to that date can participate in that dividend.

Address all correspondence, and make checks, drafts and money orders payable to

MISCELLANEOUS.

Cease to brag to me of America, and its model institutions and constitutions. America, too, will have to strain its energies, crack its sinews, and all but break its heart, as the rest of us have had to do, in thousand-fold wrestle with the Pythons and mud-demons, before it can become a habitation for the gods.—Carlyle.

"There is probably no better test of the political genius of a nation," said Mr. W. E. H. Lecky to a Birmingham audience, "than the power which it possesses of adapting old institutions to new wants; and it is in this skill and in this disposition that the political pre-eminence of the English people has been most conspicuously shown."

ROBT. GEO. WATTS, M. A., M. D., M. R. C. S., of Albion House, Quadrant Road, Canonbury N., London, England, writes: "I cannot refrain from testifying to the efficacy of St. Jacob's Oil in cases of chronic rheumatism, scia ica and neuralgia.

The benevolent work begun among the Zulus by the late Bishop Colenso, renowned alike for his heterodoxy and his arithmetic, is continued by his daughter. She has translated much of the Bible into the Zulu tongue, and has taught a number of the chiefs to speak English. It is to her intercession for Cetewayo and his people with the Queen and Mr. Gladstone that the former owe many concessions.—Harper's Bazar.

When a cold is neglected it frequently develops a condition bordering on consumption. No other remedy will so quickly relieve and cure cases of this dangerous kind as Dr. Wood's Norway Pine Syrup, because no other remedy possesses such perfect curative powers as does this prince of pectoral remedies.

In an article on the cruel method of foot-binding, to reduce the size of Chinese babies' feet, a writer in the Japan Weekly Mail, who witnessed the process, says:—When the ligatures were loosened and the shocking succession of breathless screams ended in long-drawn walls of exhaustion and misery, the listener turned almost sick with horror and sympathy. Yet a mother was the deliberate torturer of the poor baby.

WAR WELL WAGED.—What greater enemy of mankind than disease, and what nobler work than to fight against this death-dealing enemy of humanity. The most successful war against disease is being steadily carried on by Burdock Blood Bitters for dyspepsia, constipation, bad blood, biliousness, etc., cannot resist its powers.

Dr. W. A. Tilden discovered some months ago that Isoprene, which can be prepared from turpentine, under certain circumstances changes into what appears to be genuine India-rubber. Bouchardat had also found that the same change could be brought about by heat. The material so produced resembles pure Para rubber in every way, and whether it is genuine rubber or not, it may be equally good for all practical purposes. It vulcanises, for instance. It therefore seems possible that we may soon be able to make India-rubber commercially. If this is possible, a fortune awaits the inventor who can make good rubber from turpentine at a reasonable price. It is a subject well worthy of the devotion of prolonged labour.—Industries.

PRISONERS LIBERATED.—Many who have been confined to their beds for years by rheumatism, lame back and kidney complaints, have been liberated from their sad prisons by the wonderful regulating and purifying action of Burdock Blood Bitters, which drives out the acrid poison from the blood and restores health to the afflicted.

The year 1891 was certainly one of those in which new industrial applications of paper were most numerous. The idea of using paper in place of stone in the construction of houses is already old; but paper to take the place of glass in windows, of clay in flower-pots, of iron in railway rails, wagon-wheels, and horse-shoes, of porcelain in laboratory ware, of wood in barrels, it having already taken the place of that material in small boats, paper in pulleys, are applications as novel as bold. The manufacture of window-panes of paper was first tried in the United States. The panes have the appearance of milky glass, and the property of intercepting the light-rays while letting the heat-rays through, which makes them suitable for greenhouses. It is estimated that a paper window-pane ninety-four by sixty-three centimetres in dimensions in a wooden sash with iron appliances, will cost about eighty-five cents, and last on the average four years.—E. Ration, in The Popular Science Monthly for December.
