

SEND ME A SHAMROCK.

Send me a shamrock, my dearest heart, From the old green land where I used to play; I will know it has been a tiny part Of the emerald cloak she wears to-day.

Send me a shamrock, fresh and green, From the tender breast of my native earth, And my fancy will paint the peaceful scene Where the little spring has had its birth.

Send me a shamrock, and I will know It has spread its leaves to the tender light, It has held the waters that softly flow, And let the kiss of the stars at night.

Send me a shamrock, and when I gaze On the tiny part from my native land, And again I will wash your faithful hand, It will seem to me like a fairy bond.

Send me a shamrock, and on its tips I may kiss, dear, sweet and true, And when I press it unto my lips, I will feel the kiss that has come from you.

Send me a shamrock, and I will know It has spread its leaves to the tender light, It has held the waters that softly flow, And let the kiss of the stars at night.

MARY MAGDALEN FORRESTER.

THE OPORTO THEATRE FIRE.

LISBON, March 22.—No one yet knows how many lives have been lost in the calamity at Oporto. The latest advices state that upward of a hundred bodies or fragments of bodies have been recovered. It is believed that all the people in the upper galleries, which held over 200, were killed.

The bodies of sixty-six victims of the theatre fire were exposed for identification to-day. Many heartrending scenes were witnessed. Beside the bodies were also 53 heads of unrecognizable remains. Several projects have been organized for the relief of the families of the poor victims.

The Chamber of Deputies at Lisbon to-day sent a telegram of condolence to the municipal authorities of Oporto and then adjourned as a mark of respect for the memory of the victims. It is reported that some Americans and Englishmen were burned. Electric lights have been provided to enable the archers to work without interruption.

The originator of the blowing of an unextinguished gas jet against the scenery. The scene shifter saw the fire and rushed to lower the curtain, but before he could reach it the blowing scenery fell on the stage. There was a panic immediately. In the cheaper part of the house the attendance was principally of the rougher classes, including many sailors and dock porters, who pitilessly slashed down the weaker people in their flight for the doors, using their fists, shoes and knives and mercilessly shooting their way to the front. Girls, children and women were literally butchered. The house was crowded, an attractive benefit programme being presented. All the actresses wore their best jewels for the grand occasion. Their necklaces and earrings were destroyed. The company consisted of Spaniards and was playing "A Grand Via," a popular piece depicting Spanish customs, which had run 500 nights in Madrid. The principal actress saved herself by jumping from a window. The other members of the company found an easy way out of the street. The burned theatre, which was formerly a circus, was constructed of wood. The authorities are blamed because a building had been condemned.

MURDERER'S ATTEMPTED ESCAPE. CHARLOTTETOWN, P. E. I., March 22.—William Millman, the condemned murderer of Mary Tappin, made a bold attempt to escape from jail last night, after he had heard that the Governor General refused to interfere with the death sentence. About 9 o'clock, head jailer Harvey took the prisoner's supper into his cell and was about placing a basket on the floor when Millman seized him on the head with a bottle that had been sent to him filled with milk. The prisoner was stunned, and Millman, making use of the door, tried to fasten Harvey in the cell. Harvey, however, recovered and presented this. Millman then started for the yard. A general alarm was given and the separate youth was captured and taken back to prison. To-day he was put in irons. In answer to a question by a reporter, Millman said he did not eat or sleep well.

HE BRING THE QUARTER OF A MILLION. LOUISVILLE, Ky., March 22.—The books of a State Treasurer's office show extreme carelessness and neglect, and it will be weeks before order can be brought out of the existing chaos. Where the money went is still as much a mystery as ever; that Mr. Tate accommodated his friends at all times is admitted, but that he loaned at all sum as this is fully believed. His private papers have not as yet been looked into. Mr. Thum, of this city, arrived home from Canada last night, and says he saw Mr. Tate in Canada. It is likely Andrew Hewitt will be impeached for neglect of duty in the matter. It is now believed Tate's deficits reach a quarter of a million.

MYSTERIOUS DISAPPEARANCE. NEW YORK, March 22.—Miss Beatrice Lion, a young lady about eighteen years of age, left home on No. 81 East Tenth street on Monday morning, intending to call at a friend on East Tenth street, and thence to visit three Catholic churches on the west side. She reached the laundry, but nothing has been seen of her since. Her mother is now so distracted at her disappearance, and yesterday requested the authorities at Police headquarters to search for her. Miss Allison is short and of slender build, light complexion, eyes, brown hair, banged in front and parted down the back. At the time of her disappearance she wore a gray dress, seal and moque, black felt hat with black ribbon and black ostrich feather.

THE FISHERIES TREATY BEFORE THE SENATE. WASHINGTON, March 22.—The President has transmitted to the Senate to-day a treaty for a resolution introduced by Senator Bayard on the 16th inst. requesting the President to transmit to the Senate copies of the

minutes and daily protocols of the meetings of the Commissioners who negotiated the Fisheries Treaty with Great Britain. He enclosed a copy of a letter from the Secretary of State, and he hoped information therein would prove a satisfactory answer to the resolution. Secretary Bayard, in his letter, says the Senate has already been furnished with a complete documentary history of the whole matter. As to the minutes and daily protocols called for, Mr. Bayard says that in conformity with the invariable course pursued in previous negotiations, when the conference met it was agreed that an honorable confidence should be maintained in its deliberations and that only results should be announced and such other matters as joint plenipotentiaries sign under direction of plenipotentiaries. With this understanding no minutes or daily protocols were agreed upon and signed other than those already transmitted to the Senate. Every point was covered by papers sent to the Senate except the question of damages sustained by our fishermen, which is being met by a counter claim for damages to British vessels in Behring Sea, and this point was left for future settlement.

MOTHERS! Castoria is recommended by physicians for children teething. It is a purely vegetable preparation, its ingredients are published around each bottle. It is pleasant to taste and absolutely harmless. It relieves constipation, regulates the bowels, quiets pain, cures diarrhoea and wind colic, allays feverishness, destroys worms, prevents eruptions, soothes the child and gives it refreshing and natural sleep. Castoria is the children's panacea—the mothers' friend. 35 doses, 35 cents.

REFINING SUGAR BY ELECTRICITY

A REPORTED DISCOVERY THAT MAY GREATLY AFFECT THE MARKET. A new company claims to possess the secret of refining sugar by electricity. The samples seen show a sugar evidently made by an entirely different process than any known refinery uses. The enterprise thus far partakes of the mysterious, in that its secret is known only to the discoverer and his wife (a prudent woman, it appears), and in that a number of confiding stockholders have parted with sufficient money to equip an electrical refinery on the most liberal scale. Everything except the secret machinery, which is inclosed in a sort of burglar-proof safe on a large scale, is open for inspection, and facilities can be seen for filling 3,000 to 4,000 barrels of refined sugar per day, a capacity almost equal to the largest of our present refineries. It is said that in the course of a month or two we shall see cargoes of raw sugar dumped into a hopper, and after passing through the mysterious and safe process of an electrical refinery, refined sugar, and having lost in the process less than one per cent of its crystallizable contents, the whole time required for refining being about two hours. The cost of producing sufficient electricity to accomplish the result is placed at a remarkably low figure, which, if realized, will greatly affect the whole sugar refining business. In this age of wonders it will not do to pooh-pooh at anything electricity is claimed to be capable of, and the sugar trade waits with anxious, not to say excited interest, says a recent sugar circular, the developments of the next few months. Its success would so cheapen sugar to the consumer that consumption would enormously increase, and we nearly all like a "little sugar in ours."—Electrical Review.

HOW HE MADE LUCKY JOHN TRIMBLE TREMBLE.

John Trimble, No. 34 S. Broadway, is the most contented man in Aurora Ill., for he has in the bank \$1,935, the profits of his investment of \$1 in the Louisiana State Lottery. He was a regular in the lottery, and he says that he had received the above amount and that it was his intention to use the money, he having lately purchased the cut stone business of Isaac Edwards. The ticket which drew the \$50,000 prize was number 73,185.—Aurora (Ill.) Express, Jan. 30.

CANADA'S NEW GOVERNOR GENERAL.

LORD STANLEY'S ADDRESS BEFORE THE IMPERIAL FEDERATION LEAGUE. TORONTO, March 22.—The following special cable appears in this morning's Mail:—LONDON, March 22.—Earl Roseberry presided at the third annual meeting of the Imperial Federation League to-day. He stated that the League would be the bond uniting the Empire and dividing the world, but that they were never so strong as now. What the Federation aimed at was the closest union between all the states of the Empire, and the idea must be carried out to the furthest limit. Their energies should not be wasted in framing new constitutions. This would come when wanted and not before. They must keep their eyes on the requirements of the Empire outside of Britain and facilitate inter-communication between the different parts of the Empire, and that the Colonial interests were not neglected. The new Governor General of Canada was a guest of the League at the banquet in the evening. Lord Roseberry presided over the distinguished company. He said Lord Stanley went to Canada with the means of the most ancient and most honored name in England and with a high and honorable reputation of his own. He went with a long Cabinet experience and in both houses all recognized the honest sturdy work he had done for the interests of the State. In bidding him God speed in his high imperial mission they had no doubt, he understood the requirements of the Empire and the Secretary of State spoke of the program which Imperial Federation had made, and said there should be something approaching direct or indirect representation of the Colonial interest in the Imperial Parliament (cheers). He was so speaking of one House alone; it was by and by the various elements of the Empire. In a short time he would go forth as the representative of the Sovereign and as one of the links, he hoped, that would connect Canada and the mother country. Though not a member of the League, he strongly sympathized with the motives which actuated its members, and he believed they would, he hoped, never forget the Imperium of which they were all proud.

Mr. Dobell, Mr. Holbrook (New West minister) and Mr. Sebright Green represented Canada, together with the Assistant High Commissioner in London.

UNCOVERED.

We will print your name and address in this Directory for only 15 cents in postage stamps, you will receive greater number of inquiries, and more orders for your goods. These names are in this Directory often receive that which is purchased, and you will receive the agency business. These names are in this Directory often receive that which is purchased, and you will receive the agency business. THE FISHERIES TREATY BEFORE THE SENATE.

WASHINGTON, March 22.—The President has transmitted to the Senate to-day a treaty for a resolution introduced by Senator Bayard on the 16th inst. requesting the President to transmit to the Senate copies of the minutes and daily protocols of the meetings of the Commissioners who negotiated the Fisheries Treaty with Great Britain. He enclosed a copy of a letter from the Secretary of State, and he hoped information therein would prove a satisfactory answer to the resolution. Secretary Bayard, in his letter, says the Senate has already been furnished with a complete documentary history of the whole matter. As to the minutes and daily protocols called for, Mr. Bayard says that in conformity with the invariable course pursued in previous negotiations, when the conference met it was agreed that an honorable confidence should be maintained in its deliberations and that only results should be announced and such other matters as joint plenipotentiaries sign under direction of plenipotentiaries.

CASTORIA for Infants and Children. "Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. Acheson, M. D., 111 So. Oxford St., Brooklyn, N. Y.

BRITISH POLITICAL NOTES. LOCAL GOVERNMENT FOR IRELAND DISCUSSED.—THE FARMERS' FAIR AND HONORABLE FIGHT. LONDON, March 22.—Lord Hartington, speaking at Carlsruhe last night, said Mr. Ritchie's Local Government Bill was, in the best sense of the word, a Home Rule Bill, and would satisfy the aspirations of the English people. He also said that it ought to satisfy the Scotch and Irish. He had not the smallest objection to the extension of the same so as to include Ireland, and such a proceeding seemed to him simply a question of expediency, time and circumstances, and his hearers had the right to enquire in what spirit such a measure was asked for, in what temper it would be received, and what would be the probable result. He did not deny the capacity of the Irish for self government, and did not ask them to renounce their idea of a distinct nationality. All he asserted was that it was not necessary, for the satisfaction of that idea, there should be an Irish government and parliament. The Imperial Parliament, before it assented to the extension of popular bodies to Ireland, should see that the executive in that country retained the power to enforce order and justice. Sir G. O. Trevelyan, in a speech at Cirencester, deprecated the virulent and furious attacks that were being made upon the Farnellites, whose opposition, he said, in conjunction with that of the Gladstonians, was carried on by fair and honorable means. In regard to Ritchie's local Government bill, he said it was the duty of Liberals, without regard to party, to support the measure. Sir Michael Hicks Beach, speaking at Whitechapel, said it was useless to think of returning to a protective policy. "We must look," he said, "to an extension of our markets for the bettering of our business."

THE IMPERIAL FEDERATION LEAGUE gave a banquet last night in honor of Lord Stanley of Preston, the new Governor-General of Canada. Lord Roseberry, who presided, said that in bidding Lord Stanley God-speed they could have no doubt regarding, or doubting, as to the result of his appointment. Lord Stanley said his endeavor would be to bring about, between Canada and the Mother Country, the closest and most intimate relations. Mr. Dobell, of Canada, said the first principle by which Canadians were guided was loyalty to England, and he ridiculed the proposals for a "Canadian independence." The honor conferred to Mr. Chamberlain, and declined by him, was that of the Grand Cross of the Order of the Bath.

A WOMAN'S NOVEL EMPLOYMENT.

A UNIQUE MANNER OF MAKING A COMFORTABLE LIVING. A New York lady who had made her father's dinners famous by their elegance and perfection, was left penniless. She knew that many ladies refrained from dinner giving because they were unequal to the ordeal, but are quite willing to pay any one who can relieve them of the responsibility and worry. An old friend of social position to whom she unfolded her plan of dinner superintendence agreed at once to employ her, and influenced her wealthy friends to try the novel plan. It worked admirably, and she probably earns more than any lady teacher in the city. Her plan is to go to the dinner giver as soon as the invitations are sent out, and discuss the course, etc. She knows just what is in season, and does the marketing, and the hostess is willing to expand for flowers, menus, etc., and buy them for her, taking great pains to get novel and artistic designs. The afternoon of the dinner she sees that the table is properly laid, inspects the polish of the silver and the lustre of the glass, makes sure that the changes of plates, etc., are ready on the sideboard, and attends to the finger-bowls, and arranges the shades on the candles to secure that soft radiance that ladies find so becoming. She foresees every probable emergency and provides for all contingencies that may arise.—Harper's Bazar.

A PRETTY CHIEFTESS.

A YOUNG, BEAUTIFUL AND ACCOMPLISHED GIRL LEADER OF A GANG OF THIEVES. KANSAS CITY, Mo., March 21.—For some weeks burglaries had been frequent at Columbus and other points in Southern Kansas. Last Friday night the safe in the railway depot at that place was blown open. The next night the Sheriff and Constable David Gordon set to work to watch the house of suspected persons. Saturday morning Constable Gordon's dead body, riddled with buckshot, was found near the house of a family named Blacklock. The condition of the shrubbery showed that the shots were fired from the Blacklock yard, and the father, mother and daughters were arrested, but the boys had disappeared. It was announced that Clara Blacklock, the oldest daughter, had confessed everything. The girl, a handsome brunette, twenty years of age, had graduated at the head of her class at the Columbus High School last spring, and had been appointed a teacher in the First Ward School last fall. She had the respect of all classes and was regarded as one of the most promising young girls in town. Therefore, the surprise was the greater when she confessed that she saw her brothers John and William get their guns, steal from the house to the shrubbery, where William took careful aim and murdered the constable in cold blood. When the boys returned to the house she and her mother fixed them up for escape, and made arrangements to supply them with food and ammunition until they could safely return.

All this was told in the coolest matter-of-fact way. Search of the Blacklock house was made Sunday, and a secret recess under the roof was found, in which a mail sack, chickens, steel guns, including a revolver, were also found in a barrel, and jewelry. There was also found a box containing a vast amount of correspondence, showing that Clara Blacklock, the teacher, was secretary and treasurer of an extensive gang of burglars, and had received and divided the spoils as well as arranged many of the details. She was then searched, and letters were found sewed in her dress giving the location of several stolen horses, and telling her who to send for them. The same day the boys were arrested while hiding in the garret of a school-house. Other members of the gang are also under arrest.

DO NOT YOT KNOW. That you cannot afford to neglect that catarrh? Don't you know that it may lead to consumption, to insanity, to death? Don't you know that it can be easily cured? Don't you know that while the thousand and one nostrums you have tried have utterly failed that Dr. Sage's Catarrh Remedy is a certain cure? It has stood the test of years, and there are hundreds of thousands of grateful men and women in all parts of the country who can testify to its efficacy. All druggists.

No one should confide in his own wisdom, and a "yot" moreover, who does not learn without a doubt, that by God's wise decree he finally falls into dire misfortune, since the confidence is more distinctive when influencing him than when left to its own folly.

WHAT WALS YOU?

Do you feel dull, languid, low-spirited, lifeless, and indifferently miserable, both physically and mentally; experience a sense of fullness or bloating after eating, or of "grogginess," or emptiness of stomach in the morning, or a sense of heat, or a sense of cold, or a sense of dryness, or a sense of itching, or a sense of burning, or a sense of stinging, or a sense of tingling, or a sense of numbness, or a sense of weakness, or a sense of heaviness, or a sense of soreness, or a sense of pain, or a sense of distress, or a sense of uneasiness, or a sense of discomfort, or a sense of annoyance, or a sense of irritation, or a sense of inflammation, or a sense of suppuration, or a sense of ulceration, or a sense of necrosis, or a sense of gangrene, or a sense of cancer, or a sense of syphilis, or a sense of leprosy, or a sense of cholera, or a sense of typhoid, or a sense of diphtheria, or a sense of scarlet fever, or a sense of measles, or a sense of mumps, or a sense of whooping cough, or a sense of pertussis, or a sense of influenza, or a sense of pneumonia, or a sense of pleurisy, or a sense of emphysema, or a sense of asthma, or a sense of bronchitis, or a sense of laryngitis, or a sense of tracheitis, or a sense of pharyngitis, or a sense of tonsillitis, or a sense of otitis, or a sense of ophthalmia, or a sense of conjunctivitis, or a sense of keratitis, or a sense of glaucoma, or a sense of cataract, or a sense of strabismus, or a sense of myopia, or a sense of hyperopia, or a sense of presbyopia, or a sense of astigmatism, or a sense of amblyopia, or a sense of anisometropia, or a sense of asthenopia, or a sense of strabismic amblyopia, or a sense of refractive amblyopia, or a sense of functional amblyopia, or a sense of organic amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of partial amblyopia, or a sense of total amblyopia, or a sense of unilateral amblyopia, or a sense of bilateral amblyopia, or a sense of alternating amblyopia, or a sense of constant amblyopia, or a sense of intermittent amblyopia, or a sense of latent amblyopia, or a sense of manifest amblyopia, or a sense of simple amblyopia, or a sense of complex amblyopia, or a sense of mixed amblyopia, or a sense of congenital amblyopia, or a sense of acquired amblyopia, or a sense of
