### **How to Use This Directory:**

The search for foreign suppliers that are able to help your company can sometimes be a time consuming and difficult task. However, this directory has been designed to allow the reader to easily identify and research Canadian suppliers of products that are of interest.

### **Alphabetical Company Listings:**

The directory lists each exporting Canadian company in alphabetical order by name. Each listing includes the address, telephone number, telex or Fax number, a marketing contact, and a brief company profile of strength and products.

### **Product Categories and Directory:**

Many companies manufacture a broad range of products in the swimming pool, spa/hot tub and accessories field. Listings of product groups indicating Canadian companies that manufacture that product are in the back of the directory. For information on the company, refer back to the alphabetical company listings and profile.
