

5. Recovery parachutes for guided missiles, drones or space vehicles;
6. Approach parachutes and landing deceleration parachutes;
7. Other military parachutes;
- i. Automatic piloting systems for parachuted loads; equipment specially designed or modified for military use for controlled opening jumps at any height, including oxygen equipment.

Notes:

1. Sub-item b. does not embargo "aircraft" designed or modified for military use which have been certified for civil use by the civil aviation authorities in a member country and which are equipped to international civilian standards, or specially designed components therefor.
2. Sub-item c. does not embargo:
 - a. Aero-engines designed or modified for military use which have been certified by civil aviation authorities in a member country for use in "civil aircraft", or specially designed components therefor;
 - b. Reciprocating engines or specially designed components therefor.
3. The embargo in sub-items b. and c. on specially designed components and related equipment for non-military "aircraft" or aero-engines modified for military use applies only to those military components and to military related equipment required for the modification to military use.

2011. Electronic equipment not embargoed elsewhere on this List specially designed for military use and specially designed components therefor:

Note:

This Item includes:

- a. Jamming and counter-jamming equipment, including electronic counter measure and electronic counter-counter measure equipment (i.e. equipment designed to introduce extraneous or erroneous signals into radar or radio communication receivers or otherwise hinder the reception, operation or effectiveness of adversary electronic receivers including their counter measure equipment);
- b. Frequency agile tubes;
- c. Electronic systems or equipment designed either for surveillance and monitoring of the electro-magnetic spectrum for military intelligence or security purposes or for counteracting such surveillance and monitoring;
- d. Underwater counter measure, including acoustic and magnetic jamming and decoy, equipment designed to introduce extraneous or erroneous signals into sonar receivers;
- e. Data processing security equipment, data security equipment and transmission and signalling line security equipment, using ciphering processes;
- f. Identification, authentication and keyloader equipment and key management, manufacturing and distribution equipment.

2013. Armoured or protective equipment and constructions, as follows:

- a. Armoured plate;
- b. Combinations and constructions of metallic and non-metallic materials specially designed to provide ballistic protection for military systems;
- c. Military helmets;
- d. Body armour, flak suits and specially designed components therefor.

Notes:

1. Sub-item b. includes combinations of metallic and non-metallic materials specially designed to form explosive reactive armour or to construct military shelters.
2. Sub-item c. does not embargo conventional steel helmets not equipped with, modified or designed to accept any type of accessory device.

2014. Specialised equipment for military training or for simulating military scenarios, specially designed components and accessories therefor:

Note:

1. The term 'specialised equipment for military training' includes military types of attack trainers, operational flight trainers, radar target trainers, radar target generators, gunnery training devices, anti-submarine warfare trainers, flight simulators (including human-rated centrifuges for pilot/astronaut training), radar trainers, instrument flight trainers, navigation trainers, missile launch trainers, target equipment, drone "aircraft", armament trainers, pilotless "aircraft" trainers and mobile training units.
2. This Item includes image generating and interactive environment systems for simulators when specially designed or modified for military use.

2015. Imaging or countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:

Note:

This Item does not embargo first generation image intensifier tubes.

- a. Recorders and image processing equipment;
- b. Cameras, photographic equipment and film processing equipment;
- c. Image intensifier equipment;
- d. Infrared or thermal imaging equipment;
- e. Imaging radar sensor equipment;
- f. Countermeasure or counter-countermeasure equipment for the equipment embargoed by sub-items a. to e.

(See also Category 1061.A.2.a.2. and 1061.A.2.b.)

Notes:

1. The term 'specially designed components' includes the following when specially designed for military use:
 - a. Infrared image converter tubes;
 - b. Image intensifier tubes (other than first generation);
 - c. Microchannel plates;
 - d. Low-light-level television camera tubes;
 - e. Detector arrays (including electronic interconnection or read out systems);
 - f. Pyroelectric television camera tubes;
 - g. Cooling systems for imaging systems;
 - h. Electrically triggered shutters of the photochromic or electro-optical type having a shutter speed of less than 100 μ s, except shutters which are an essential part of a high speed camera;
 - i. Fibre optic image inverters;
 - j. Compound semiconductor photocathodes.
2. Sub-item f. includes equipment designed to degrade the operation or effectiveness of military imaging systems or to minimize such degrading effects.

2016. Forgings, castings and semi-finished products specially designed for the products embargoed by Items 2001, 2002, 2003, 2004, 2006, 2010, 2023 or 2026 on this List.

2017. Miscellaneous equipment, materials and libraries, as follows, and specially designed components therefor:

- a. Self-contained diving and underwater swimming apparatus, as follows:
 1. Closed or semi-closed circuit (rebreathing) apparatus;
 2. Specially designed components for use in the conversion of open-circuit apparatus to military use;
 3. Articles designed exclusively for military use with self-contained diving and underwater swimming apparatus;
