Output Failed to Attain Seven Company's Big Earnings Have Figures First Time in Three Weeks.

DECLINES FREQUENT

Bethlehem Steel, Opening Lower, Reached New High Record.

NEW YORK. Oct. 15 .- Perhaps the most significant feature of today's trade was the fact that dealings feli which the output failed to attain to the fiscal year in August it was drawseven figures, not to mention the ing interest on a big deposit instead of many days in which dealings ranged paying interest on a big bank loan, as from 1,200,000 to 1,700,000 shares.

There were further indications of an abatement of public interest, commission houses being far less pro-minent in the day's operations. The Bonds were firm at the outset, but eased off later, a feature being several small sales of Anglo-French notes at 97-7-8, a fraction under the subscription price. Total sales \$3,-848,000.

VARYING TENDENCIES

General Electric and Smelters Strong, But Other Issues More Irregular.

The Toronto stock market yesterday exhibited varying tendencies, with no defined trend except in specialties. Traders were inclined to watch the Wall street market for a lead, and the day afforded no really definite impression. In General Electric and pression. In General Electric and Smelters only was there any special emonstration of strength, the halance demonstration of strength, the halance of the market jockeying to and from in a narrow range. General Electric made a two and half point rise and later lost the larger portion. Smelters was up five points, and lost only one on the last sale of a broken lot. Tradition was prefix well spread over the ing was pretty well spread over the speculative list, and in some instances buyers were readily accommodated.
The market had no news, and price changes were made at the whim of

WORK PROGRESSES ON SILVER QUEEN

Work on the Silver Queen lease is progressing favorably, and ten men are being kept constantly employed at the property. High-grade ore is being taken out, and already some ten tons of a good grade have been ship-ped from this famous old mine. The work is under the direct supervision of Mr. Angus, manager of the Right of Way mine. The successful operation of the property, which has already been worked by several companies, is a great tribute to the skill and judgment of the present manager, who is getting remarkably good re-sults from the mine.—Cobalt Nugget.
