Safer to drink than milk

"Rich, fresh milk about equals Regal Lager in nourishing power for grown folks. But milk is probably not so good for you to drink.

"Milk, as we get it in the cities, is oftener impure and unsafe than clean and safe. Germs thrive in milk. Some doctors think tuberculosis is carried in milk.

"But Regal Lager is as pure as any product made by man. No germ can exist in it. Uncleanliness is impossible in a Regal Lager bottle. It is brewed by the most modern methods, in surroundings of positive hygiene, from the choicest barley-malt, the finest hops that grow, and water thrice-purified. Even the air is filtered in the lagering rooms.

"Regal Lager is not only a clean beverage, and a safe and wholesome one. It is a food-drink. It equals rich milk in nutrients, and it makes your digestion get more good out of your food.

"Drink Regal Lager with your dinner every day, and you will need less meat and get more vigor."
