He admitted that he had attended the conference, but said that he had deen invited three times before he went. He said there was no thought of making any kind of a deal whatever, and if there was any thought of anything of the kind it was soon dissolved, as the meeting lasted only a few with the premier and colleagues told the member for St. Anns that the pertition would be carefully considered, and that their request for the appointment of an English-speaking gentleman would be looked into.

Animals Subjected to Terrible To tures by Vivisectionists.

NEW FORK, Dec. 27.—The Herald to-day says: Methods practised by several of the vivisectors and experimenters at the Rockefeller Institute for Medical Research in their inoculations of and operations on lower animals are made public in the form of an affidavit by a woman employed there as an assistant nurse.

Mrs. Mary L. Kennedy, the woman in question, who had excellent recommendations from officials of the institute when she left it a month or so ago, testifies before the New York Anti-Vivisection Society how dogs whose legs-had been freshly amputated were left to die on the operating table.

She describes the less and arrors for the tubes at the polls. To the charges his opponents had been making that he was only seek-ing office as a monument to his name, he admitted it frankly. What sincere and public-spirited man would not desire such a monument? It would also be a monument to the city, a social and moral monument.

The meeting was representative of about three hundred and fifty voters, with a substantial showing of ladies.

Controller Hocken's strongest supporter at the meeting was W. F. Maclean, M.P., who explained why the ratepayers of ward one should support the Bloor-street viaduct bylaw, the tubes and Controller Hocken. Dealing first with the viaduct, he pointed out that it meant prosperity to the northeast section of the city, just as that section around Gerrard-street developed when the Gerrard-street bridge was constructed. After showing that the city had grown in a westerly direction, he said:

The difference between a public owned railway and a private owned was also noted.

Mr. Maclean then said that Controller Hocken should be supported for mayor because he was the best exponent of public ownership.
