accept the same and to pay the sums due thereon in terms of the prospectus, dated 12th June, 1872
Name..... Hon, ALEXANDER MACFARLANE, Senator, Wallace, Nova Scotia, President. ITEMS THEY HAVE EVER BEFORE SOLD IN THIS CITY. HON. ROBERT BARRY DICKEY, Senator, Amherst, N. S. CHARLES H. M. BLACK, Esq., Merchant, Halifax, N. S. STABLE AND ROAD LT. COL. CHARLES J. STEWART, Amherst, N. S. ALEXANDER ROBB, Esq., Proprietor Amherst Iron Foundry, Amherst, N. S. Now landing: TREASURER-JAMES S. HICKMAN, Esq., J. S. Hickman & Co., Merchants, Amhers', N. S. Also call special attention to their Stock of SECRETARY-WM. J. MOFFAT, Esq., Barrister, Amherst, N. S. Patent Waterproof Knee Duste's, Persons wishing to subscribe for Stock in the above Company, or those de B. NKERS-Bank of Nova Scotia, Amherst Branch; and Bank of New Brunswick, St. John, N. B. siring further information respecting the property, will please apply, by letter or in MOLASSES. SHAWLS A New Thing in this Market. OFFICE-Mr. W. J. MOFFATS Office, Amberst, N. S. E. N. SHARP, The Company have acquired, by purchase, three leases from Government of Nova Sc tia to Hon Alex. Macfarlane, of one square mile each, of the richest coal deposits in Canada, at Spring Hill, Cumberland County, Nova Scotia, renewable until August, 1926 Royalty 10 cents per ton of 2,240 lbs.

Five seams and upwards, of varying thickness from 2½ to 13 feet, are known to exfist within these areas, which comprehend (exclusive of a portion of the General Mining Association reserve) nearly all the coal yet discovered in this well known district. Of these, one, known as the 11 feet seam, has been opened, and several hundred tons raised by a slope sunk only 25 feet from the surface, and has been proved by test pits about 1½ mile at an average of 10 feet from the surface, and preserving a thickness of 10 feet for two thirds of that distance. The slope has lately been carried down to the depth of 95 feet, exhibiting a marked improvement in the quality of the coal, described by Sir Wm Logan, from specimens near the outcrop, as "an excellent coal, superior to any of this continent yet known." A moderate estimate of the quantity would give as the yield from this seam alone, half a million tons annually during the lease. The larger seam has been exposed by a trial pit within the areas; the smallest of 2½ feet, is believed to contain a valuable gas coal, and it is a fair geological inference that all these beds of coal will be found in their proper position. Thus several distinct colleries may be leased to individuals or companies. TOBACCO. At No. 23 Prince William Street. Linen Fancy Horse Dusters! Directly over the Office of Robert Marshall, Esq., General InsuranceAgent, Slightly soiled, at fire of Sept. last. From the nearness of the outcrop to the surface, and the seams lying on high and descending ground, securing easy drainage, it is considered that these seams may be most economically worked.

The state of the tent town the head of Bay Fundy to Boston or New York is about In Packages of Saddles, Bridles, Martingales, Switches, &c descending ground, securing easy drainage, it is considered that these seams may be most economically worked.

The freight of a ton from the head of Bay Fundy to Boston or New York is about 75 cents less than from Picton or Sydney—of itself a good profit, while the difference to St. John is fully \$1 00.

The Spring Hill coal is well adapted for house, steam and smelting purposes. Situated within 37 miles by rail of the lodes of brown hematite and micaceous iron ore of the richest quality, known as the Acadia iron ore, of Londonderry, it is difficult to assign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a coal unusually free from sulphur. The large proportion of carbon renders it eminently adapted for manufacturing coke, which, with the coal itself, must be extensively used in the iron and steel works at Londonderry, as well as the Machine shops being erected for the Government railways at Moncton.

The portion of the Intercolonial between Truro and Amherst is now being ballasted with engines driven by Spring Hill coal. It is understood that the line between Truro and Newcastle, if not the whole line to St. John, a distance of 280, miles will shortly and Newcastle, if not the whole line to St. John, a distance of 280, miles will shortly is steadily increasing. equal in quality to that produced by the first LONDON HOUSES, and never before imported to this country, for sale. 5 and 10 Gals. oach 41 King Street. Vessels bringing flour from the St. Lawrence to St. John, Yarmouth, and other lower ports, through the Bay Verte Canal, when completed, may have return cargoes of coal to Quebec, Montreal or Toronto.

From all these sources of traffic, in addition to the Western part of Nova Scotia, the New England ports and New York, it is assumed that an unlimited market will be efforded. Lamps. Lamps. afforded.

Additional means of shipment will be afforded by the contemplated railway to Parrsboro—a port open at least ten to eleven months in the year—for which the Nova Scotia Legislature have provided large subventions.

The estimated cost per ton for raising, handling, and putting on board ship, say at mouth of Maccan river, is about as follows: ALL EXCELLENT VALUE. T. R JONES & CO. Mrs. F. E. McLEAN.

 Cost on board...
 \$1.10

 Freight to St. John...
 1.20
 If Pictou and Sydney coal can be shipped to Boston and New York at paying prices. it cannot fail to be highly remunerative to send a better article from Spring Hill, with an advantage of 75 cents in freight. The local traffic would yield a high rate of

an advantage of 75 cents in Fields.

Taking the low average of only 80 cents per ton, inclusive of repairs of machinery, &c., and assuming only 100 000 tons as the annual production at first, we have a gain of 20 per cent. on the capital, which might be much augmented by the rent of other seams, as suggested. From the exceptionally high character of this coal, and the facilities for raising it cheaply, this quantity, it is confidently believed, might cre long be doubled or trebled, and a large rate of profit secured even with considerable increase

TIMONIALS.

Extracts from Reports of Messrs. Woodhouse and Jeffcock, Mining Engineers, London and Derby, G. B., (January 2, 1866) The Coal Field which we have carefully examined, and which the subject of this Report, is situate in the county of Cumberland, in the province of Nova Scotia. It is generally described as the "Springhill' Coal Field, but in reality it is a part of the great Cumberland Coal Field.

The first or upper seam we found to be a bed of remarkably goed coal, presenting a very june 15 J. & W. F. HARRISON.
