We Can Save Money For Telephone Companies

Compare our telephones with others in quality and efficiency, and we will win out. Then in price we score again, and lead our competitors.

Our telephones are guaranteed against any defect in material or workmanship.

Some of our construction materials were contracted for before war conditions increased the prices. Our customers reap the benefit.

No independent local or municipal systems can afford to buy telephone materials before getting our prices. If you do you are throwing away good money.
