

BORDETTE'S HUMOR

A FUNNY MAN'S SOBER ADVICE TO A YOUNG MAN.

Which all Young Men Can Read and Profit By—The Jamboree of Inspiration—What the "Imagination of a Moment" will do for a Man—Girls and Marriage—Chasing a Train—A Quaker Parrot—A Paragon for Young Architects—How to Reach the Masses.

(Copyrighted, 1888.) My son, it is a comforting doctrine, and one that men often preach to each other, that a man has often credit for everything good that he does and for all the good that he is, but that somebody else is to blame for all the evil in him...

So you are going to be an architect, my son. Well, that is a good—what do you architects call it—profession. Whenever you call it, it is good. Now, if you want to be an architect, you would do well to be an architect. I would learn to build a house—you can place attention to that department of architecture, my son; learn to plan a house, and it will put money in your pocket. But all architects plan houses; that is what they do. Oh, no my son; oh, no—men have been planning and building houses ever since the invention of Eden, and they haven't succeeded in making a model yet. All the architectural genius in the world hasn't succeeded in designing a house that is perfectly satisfactory to anybody, and as to building a house that will fit everybody—why, there is the biggest business in Providence County waiting for the man who will give us that.

How shall we reach the masses? asks a religious paper. Dear brother, you can best reach them with a spoon. Go for them with a knife and fork. Humanity's tender point is its paunch. The conscience of man may be seared with a hot iron, but his maw is ever open to impression. His intellect may be stunted, but his appetite is a giant. Take him to the center of the theatre and he comes away to seek the nearest feeding place where he may gorge himself before he sleeps. The little struggling church that bankrupts itself still further by venturing on a lecture course, finally lifts itself clear out of debt by a series of suppers. A man who will not pay fifty cents for the most valuable one collared and fifty cents worth of dinner into his system. A picnic without ten parts of feed to one part of bread is a fit failure. When we "receive" a distinguished guest, we feed him; when we say "good-by" to a misent citizen, we give him something to eat. We have a feast for the wedding guest, luncheon for the waiter, and a high collared for the monkey. There are a thousand restaurants to one library, yea, more. By and by, if the principles of evolution be true, this world will be peopled by a race of stomachs with legs and arms. The legs will be needed to carry the stomach to the trough, and the arms to fill it up.

DEAD PEOPLE are walking around in our midst all the time; dead to ambition, enterprise and progress, they never get on, and live and go down in obscurity and poverty. Live people should write Stinson & Co., Portland, Maine, and learn how to make \$1 and upwards per hour. All free, and after learning all, should you conclude not to engage, no harm is done. You can live at home and do the work. Either as, all ages. A great reward awaits every worker. Write and see. Capital not needed, you are started free. All can do the work. No special ability required.

HOW ALLIGATORS ARE CAPTURED. The alligator is beset with dangers from the first, which probably accounts for his somewhat untidy disposition. The female finds a hole in the mud bank, exposed fully to the sun's rays, scoops out a hole two or three feet deep with her fore paws, lines it with old rubbish, grass, etc., and lays a layer of eggs from 25 to 200 at a time. These are carefully covered over to a height of three to four with grass, small sticks, etc. From the moment of laying the eggs, scores of enemies are in wait. The big sand crabs and eagles are not averse to a good meal of alligator's eggs, while bears, wild cats, and foxes take them as a great delicacy. Then comes the naturalist and curiosity hunter, and hundreds of eggs are gathered by these insatiable seekers. The old female is very fierce at this time, and lies in wait near by, and has been known to attack men even in the defence of her nest. Finally the young alligators are hatched by the sun's rays, and the mound seems alive with what look like young snakes. These young ones crawl smart and lively from the first. The old bull alligator, with a hole in his side, at this time, has been known to sit in the mud, and when the young ones get out, he has been known to take a good meal of infant alligator. Formerly they were plentiful in all the streams and lakes in Florida, but the indiscriminate shooting has scared them off into the most inaccessible parts. In the lower portion of the State they are hunted vigorously for their skins. Scores of hunters recur from 1,000 to 1,500 skins annually, and as they receive about five shillings each for them, they obtain what is to them a princely income. The best and most common mode to hunt alligators is by flashing their eyes at night. Two generally hunt together in a canoe: one sitting in the stern, paddling; the other standing at the bow with a bull's-eye lantern to his head. They move on cautiously, the one in front coaching the course by slow motions of his hand. His a warning hand is upraised; the motion of the paddle ceases, and the canoe glides on almost imperceptibly, the only sound heard. The one with the lantern raises his weapon, peering expectantly forward, now to one side, then another. Suddenly a gleam is seen ahead like the cone of fire shining through the darkness, and the alligator rises before them a stream of fire. A confused thrashing and, perhaps, a deep bellow follows; then all is still. If wounded the alligator makes off to deep water, and if dead he sinks at once. The hunters do not stop for their game, unless in shallow water, and the alligator is killed instantly, but go ahead and search for fresh victims. The next day they begin their look-out for their game. When killed the alligators sink at once, but the gases in the body bring them up in from six to eight hours. Hundreds are undoubtedly killed every year being wounded and dying in inaccessible

there and get on the train you'll find waiting there, run on to Middletown, get off and eat your dinner, and by the time you're ready for it the train you've just missed here will come on. All aboard! I was dumfounded, but I couldn't help believing a man who could sell that way as firmly as though he was a decision of the Supreme Court. We did just as he said; performed the feat of running across the country on two trains to head off the one we had missed, dined at Middletown, and by Jove! there came the train just on time together with a rain-coat that hasn't been equalled since Mark Twain invented "New England weather." If ever you get lost in Connecticut, telegraph to the officer on duty at the much-intended station at Hartford, and if he is feeling right-well, he can set you down in the place you want to be thirty minutes before the train gets there.

A QUAKER PARROT-GUN. A man down in Pennsylvania bought an intelligent parrot and taught it to whistle for the dog, call the police, and shout "Thieves! thieves! robbers in the house!" Then, feeling that he had a dead sure thing on the burglars, the family got together and every night the parrot was on guard shrieking with all his energy. One night at last burglars did come—and they kicked in the front door and carried off everything in that house worth taking away from the silver to the kitchen stove, while the parrot kept up such a racket that you couldn't hear it thunder.

So you are going to be an architect, my son. Well, that is a good—what do you architects call it—profession. Whenever you call it, it is good. Now, if you want to be an architect, you would do well to be an architect. I would learn to build a house—you can place attention to that department of architecture, my son; learn to plan a house, and it will put money in your pocket. But all architects plan houses; that is what they do. Oh, no my son; oh, no—men have been planning and building houses ever since the invention of Eden, and they haven't succeeded in making a model yet. All the architectural genius in the world hasn't succeeded in designing a house that is perfectly satisfactory to anybody, and as to building a house that will fit everybody—why, there is the biggest business in Providence County waiting for the man who will give us that.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCEDE, M.D., 111 So. Oxford St., Brooklyn, N. Y.

An obstinate man does not hold opinions, but they hold him.—Pope. These who can command themselves command others.—Hawlett. The Original PIERCE'S LITTLE PEASANT'S LIVER PURGATIVE PELLETS. BEWARE OF IMITATIONS. ALWAYS ASK FOR DR. PIERCE'S PELLETS, OR LITTLE SUGAR-COATED PELLETS. Being entirely vegetable, they operate without disturbance to the system, diet, or occupation. Put up in glass vials, hermetically sealed. Always fresh and reliable. Also a laxative, or alternative, or purgative, these little Pellets give the most perfect satisfaction.

SICK HEADACHE. Bilious Headache, Dizziness, Constipation, Indigestion, Bilious Attacks, and all general ailments arising from impure blood and bowels, are promptly relieved and permanently cured by the use of Dr. SAGE'S CATARRHIC REMEDY, or PURGATIVE PELLETS. In explanation of the remedial power of these Pellets over so great a variety of diseases, it may truly be said that they are a grand and simple escaping their sanative influence. Sold by druggists, 25 cents a vial. Manufactured by the Chemical Laboratory of WOOD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

\$500 REWARD is offered by the manufacturer, Dr. SAGE'S CATARRHIC REMEDY, for a case of Chronic Nasal Catarrh which they cannot cure. SYMPTOMS OF CATARRH.—Dull, heavy headache, obstruction of the nasal passages, discharge falling from the head into the throat, sometimes profuse, watery, and acid, at others, thick, tenacious, mucous, purulent, bloody and putrid. The throat is inflamed; there is ringing in the ears, deafness, hiccoughing or coughing to clear the throat, expectoration of offensive matter, tinged with scabs from ulcers; the breath is offensive; small and taste are impaired; there is a sensation of dizziness, with vertigo, and, by the effects of a permanent debility. Only a few of the above-named symptoms are likely to be present in any one case. Thousands of cases annually, without manifesting any of the above symptoms, result in consumption, and end in the grave. No disease is so common, more deceptive and dangerous, or less understood by physicians, as Catarrh of the Nose. Dr. SAGE'S CATARRHIC REMEDY cures the worst cases of Catarrh, "cold in the head," Croup, and all other ailments of the throat. Sold by druggists everywhere; 50 cents.

"Untold Agony from Catarrh." Prof. W. HAYSNER, the famous mesmerist, of Haverhill, N. Y., writes: "Seven or eight years ago I suffered from chronic nasal catarrh. My family physician gave me up as incurable, and said I must die. My case was such that I could scarcely get up, and when I did, my voice would become so hoarse I could barely speak above a whisper. In the morning my coughing and clearing of my throat would almost choke me, and by the effects of a permanent cure. "Constantly Hawking and Spitting." THOMAS J. RUSHING, Esq., 2903 Pine Street, St. Louis, Mo., writes: "I was a great sufferer from catarrh for three years. At times I could hardly breathe, and was constantly hawking and spitting, and at last I could not breathe through the nostrils. I thought nothing could be done for me. Luckily, I was advised to try Dr. SAGE'S CATARRHIC REMEDY, and in three months, I was a well man, and the cure has been permanent."

Three Bottles Cure Catarrh. L. L. ROBBINS, Ruyffgen P. O., Columbia Co., Pa., says: "My daughter, who had chronic nasal catarrh, was cured by Dr. SAGE'S CATARRHIC REMEDY, and procured a bottle for her, and soon saw that it helped her, and she is now a well man, and the cure is permanent."
