

3.

of such capacity and depth as will assure a satisfactory supply at \$1.00 per foot, as quoted by you, with a suitable two way force pump for hand use.

The well to be suitably cased and to have a concrete or tile case in addition carried down 3 to 4 feet below surface to prevent weeds or other vermin entering well. A concrete platform and gutter to carry surplus water from well should also be built. This additional work should also be done as economically as possible to secure satisfactory results.

Your obedient servant,

P. L. D.

Asst. Deputy and Secretary.
