*Quantities sold or shipped.

The production of cement in 1910 was derived from 22 operating plants with a total daily capacity of 25,835 barrels, the operating plants being distributed as follows: one in Nova Scotia using blast furnace slag; one in Manitoba making a natural Portland cement; one in British Columbia; two in Alberta and three in Quebec using limestone and clay; and fourteen in Ontario of which eleven used marl and three limestone. The Exshaw plant was not operated during the year nor was the Point Ann plant of the Canada Cement Company, in O . . o.

comparison of the principal cement statistics for 1909 and 1910, giving the increases or decreases, as the case may be, is shown in the next table.
