THE MIRROR TELLS THE STORY.

ANTI-PILL
REMOVES THE CAUSE.

When the tongue is coated or the breath tainted, when an out-of-sorts feeling, as of burning or feverish stomach, dizziness and aching of back or hips, there is trouble in the stomach which may develop in malaria or other severe sickness. If you have Dr. Leonard's Anti-Pill at hand, one at night

and one in the morning will remove the trouble. It is the world's greatest system treatment. It is a guaranteed cure for dyspepsia, biliousness, or constipation. If you want to prove its merit, write WILSON & FLETCHER, Niagara Falls, Ont., for free sample. Sold by druggists. 50 cents per box.

Could scarcely get up or down without help.

Had a severe pain in the small of the back.

as treated in the Hotel Dieu, Kingston, but not cured.

Kidney trouble was the trouble.

Doan's
Kidney Pills

Cured Mr. George Graves, Pitts Ferry, Ont., of a very bad case of kidney trouble.

He tells about the cure in the following words: "I cannot recommend Doan's Kidney Pills too highly. I never took anything that did me so much good. I had a severe pain in the small of my back and could scarcely get up or down without help. I could hardly urinate, but when I did the pain was terrible. I was in the Hotel Dieu, Kingston, last winter and when I came out I was much better but not cured. It was then I saw Doan's Kidney Pills advertised. Since taking them I have been completely cured and have not had any trouble with my kidneys since."

Doan's Kidney Pills, 50 cts. per box or 3 for \$1.25, all dealers or
THE DOAN KIDNEY PILL CO., TORO TO, ONT.

TRUE NOBILITY.

The true nobility is fidelity wherever we are situated. An illustrious example is given in the following account: A Duke went to the home of Sir Matthew Hale, one of England's greatest judges, and told him he was engaged in a law suit which would come before Hale for judgment in a few days. He said he wanted to give Hale a statement of the case so that he might understand it when it came into the court. The great jurist reproved him sharply. "Not one word," he said, "will I hear. I will listen to the case in open court, and decide it on merits." The Duke said that the plaintiff was "only a common farmer." "That makes no difference," Hale said; "when a man comes into court, it is his case, not his rank, that I consider." The Duke still protested. He wanted to acquaint the judge with certain facts that it would not be pleasant to mention in open court. Hale answered that if his visitor persisted, and did not leave the house at once, he would commit him to prison. The Duke left and went to the King to complain. The King heard his story and laughed. "With," he said, "I think you are lucky. I wonder he did not send you to prison. I verily believe he would not hesitate to commit me to prison if he thought I was trying to get him to help me do some one a wrong."

STOMACH TROUBLES.

A disordered stomach may cause no end of trouble. When the stomach fails to perform its functions the bowels become deranged, the liver and kidneys congested, causing numerous diseases, the most fatal of which are painless and therefore the more to be dreaded. The important thing is to restore the stomach and liver to a healthy condition, and for this purpose no better preparation can be used than Chamberlain's Stomach and Liver Tablets. For sale by all druggists.

SOMEWHERE.

'Tis always morning somewhere, little heart;
Somewhere the sky is ever so fair and blue;
No night can wrap in darkness all the world;
Some rift the sun is always shining through.
There's always happiness, somewhere, dear heart;
Somewhere is always love and hope and cheer.
No sorrow can forever hide God's smile,
No grief is toil and grief from birth to bier.

Look up and bide with patience, then, true,
Beyond the cloud a glad new day is near;
The sacred promise of the dawn is shall rise,
And what of joy is yours will come to you.

What was your greatest trial, Judge? asked the young lawyer.
Getting my seven daughters married off, replied the scanty-haired jurist.

Vacuum.
The space above the mercury in a thermometer is not a perfect vacuum. It is not infrequently a small portion of air left in such space, and there is always an atmosphere of the vapor of mercury. Physically speaking, it is perhaps impossible to procure a vacuum. It is most likely that even if a real vacuum could be procured for an instant air or other vapor would at once begin to be disseminated from the sides of the vessel in which it was made, and it would thus instantly cease to exist.

It is true that Dextartes denied the very possibility of a vacuum and says, "If a vacuum could be effected in a vessel the sides would be pressed into contact," but it is hardly correct to say, "Scientists say that a vacuum cannot exist." What scientists do say is what Galilei said, "Nature abhors a vacuum." As the statement of a fact is true, Nature does, to the best of our knowledge, abhor a vacuum. She never suffers it to exist to the extent of allowing any space which is perceptible to our senses to be vacuum. Vacuum, in scientific speech, simply means a space from which air has been expelled.

A Dance Without a Smile.
They have a singular kind of dance conducted on the greens of country villages in Russia. The dancers stand apart, a knot of young men here, a knot of maidens there, each sex by itself, and silent as a crowd of mutes. A piper breaks into a tune, a youth pulls off his cap and challenges his girl with a wave and a bow. If the girl is willing, she waves her handkerchief in token of assent. The youth advances, takes a corner of the handkerchief in his hand and leads his lassie round and round.

No word is spoken, and no laugh is heard. Stiff with cords and rich with braids the girl moves heavily by herself, going round and round, and never allowing her partner to touch her hand. The pipe goes droning on for hours in the same sad key and measure and the prize of merit in this "circeling," as the dance is called, is given by spectators to the lassie who in all that summer revelry has never spoken and never smiled.

Studies That Are Workrooms.

All of the artists' studios in New York have not the magnificent interiors that romance suggests. On the contrary, a great many of the most effective pictures are turned out from rooms that are absolutely destitute of furniture, except for the working tools of the artist himself. Costly draperies, beautiful objects of art, often take the attention of the painter from his work, and there are quite a number of the most successful artists in the city whose studios are bare and comfortless as far as decorations are concerned. They are regarded by the painter as workrooms pure and simple, and aestheticism is confined to the imagination of the painter himself.

Under a New Title.

The Washington Post credits a white haired matron of that city with a clever musical joke. She was listening, in company with a young man from the state department, to the music of a pianist.

The selections were all new to the young man till the "Wedding March" of Mendelssohn began.
"That's familiar," said he. "I'm not strong on music, but I know I've heard that before. What is it?"
The matron's eyes twinkled with mischief. "That," said she, "is the 'Maiden's Prayer.'"

The Bluetongue.

There is conclusive evidence to show that in one unbroken nocturnal flight the European bird known as the northern bluetongue passes from central Africa to the German sea, a distance of 1,600 miles, making the journey in nine hours. From its winter home in Africa observations have determined that it starts after sunset, arriving at its far northern summer haunts before dawn on the next morning.

The All Powerful Hat.

"Now, my dear," said the indulgent husband, "I have managed to save up enough money to justify us in building a new home. But, first, I am going to give you a choice between that and the new fall hat you so much desire."
"Well," said the beautiful wife, "you know I can't wear the house on my head."

Woman.

They put the interrogation to Thomas De Quincey, "Why are there more women than men in the world?" and he answered them: "It is in conformity with the arrangement of nature. We always see more of heaven than of earth."

Her Advice.

"Ah," he said as he led her back to her seat after the waltz, "I just love dancing."
"Well," she replied as she attempted to repair a torn dounce, "you're not too old to learn."

Made It Warm.

"I got a cold supper when I went home tonight, and you bet I kicked about it."
"Did that do any good?"
"Well, my wife made it warm for me."

Well Matched.

Fred—Retribution has finally overtaken that talkative Miss Chattington.
Joe—Indeed! How, pray?
Fred—She married Winkles, the barber.

Platonic Love.

"Pa, what's platonic love?"
"It's generally a bunch of trouble in disguise."—Exchange.

The Deadly Trail

Of disease is often the trail marked by a woman's gown. A recent investigation showed a horde of microbes, including those of influenza, consumption and a dozen other varieties, gathered in the trail of a woman's dress.

The microbes are everywhere, but its prey are the weak and feeble people whose blood is "poor" and digestion "weak." Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition and purifies the blood.

It strengthens the body by increased nutrition to resist or throw off disease.
"Please accept my thanks for the good Dr. Pierce's Golden Medical Discovery. I have done for me," writes Mrs. N. Chesley, Cleveland, Ohio. "I was troubled for over a year with what the doctor pronounced indigestion. I had nervous headaches, an unpleasant taste in my mouth in the morning, and my blood was very poor. I tried different medicines but to no avail. My parents insisted on my taking Dr. Pierce's Golden Medical Discovery. I did so, and in a few days I felt better, and in a month I was well. I cannot speak too highly in its favor."

Dr. Pierce's Pleasant Pellets are easy and pleasant to take. A most effective laxative. They do not get the pill habit.

SHOULD HAVE LISTENED

An incident which illustrates the absolutism prevailing in all ranks of Russian authority appears in some anecdotes about Lezhitsky in the Century Magazine. Before the days of his great musical success Lezhitsky was instructor in the imperial institute for young women at Smolna.

Some of the pupils had complained of the food, and the complaint had reached the emperor. He ordered the Duke of Oldenburg, president of Smolna, to look into the matter.

The Duke was a tall, thin, quick man, of sour disposition and blinking sharp eyes; his nose was in everybody's business. He started for Smolna as soon as he received the emperor's order, and arrived at dinner time.

He stationed himself not far from the kitchen, and awaited the passage of the soldiers on duty in the dining-room—all Russian public institutions are under military regimen. Presently two soldiers went by, carrying a soup tureen.

"Set that down on the floor and fetch me a spoon!" thundered the Duke.

The soldiers looked up in surprise, but too well disciplined to reply, obeyed. The Duke, wearing a severely critical expression, dipped the spoon in the murky liquid. No sooner had he touched it to his lips than he angrily rejected it, shrieking, "It's dish water!"

"As your highness says," answered the soldiers.

So it was—dish water in a cast off soup tureen, used for washing the silver.

Uncle—Well, Bobbie, I hear you're learning to swim?

Bobbie—Yes, sir; so are you, ain't you, uncle?

Uncle—No, my lad. Why?

Bobbie—Oh, I heard father say yesterday that you had a hard job to keep your head above water!

Boils were so painful could not sleep at night.

APPEARED ON NECK, LEGS AND ARMS.

Burdock Blood Bitters CURED THEM.

It is well-known to all that bad blood is the direct cause of all skin diseases and it is necessary for the blood to be cleansed before the eruptions will disappear. For this purpose there is nothing to equal Burdock Blood Bitters as the thousands of testimonials we have on hand will testify.

Mr. Willard Thompson, McNeill's Mills, P.E.I., writes us as follows: "I wish to state to you what Burdock Blood Bitters has done for me. Some time ago my blood got out of order and many boils appeared on my neck, legs and arms. They were so painful that I could not sleep at night. After having tried many different remedies without any success, I finally decided, on the advice of a friend, to use Burdock Blood Bitters. Before I had quite used two bottles the boils had completely disappeared, and I wish to emphasize the fact that I think Burdock Blood Bitters the best blood purifier on the market to-day."

All reading notices of local announcements must be received at this office not later than noon of the day on which it is desired that they appear in The Planet.

Sources of Color.

An interesting enumeration has been given of the sources of color. From this it appears that the cochineal insects furnish the gorgeous carmine, crimson, scarlet carmine and purple lakes; the octopus gives sepia—that is, the inky fluid which the creature discharges in order to render the water opaque when attacked; the Indian yellow comes from the camel; ivory chips produce the ivory black and bone black; the exquisite Prussian blue comes from fusing horses' hoofs and pigs' blood; blue black comes from the charcoal of the vine stock; Turkey red is made from the madder plant, which grows in Hindoostan; the yellow sap of a Siamese tree produces gamboge; raw sienna is the natural earth from the neighborhood of Siena, Italy; raw umber is an earth found near Umbria; Indian ink is made from burned camphor; mastic is made from the gum of the mastic tree, which grows in the Grecian archipelago; bistre is the soot of wood ashes; very little ultramarine, obtained from the precious lapis lazuli, is found in the market.

Getting Rid of the Acid.

An exploring expedition in a remote part of China had a queer experience, which one of the party thus relates: "A large bottle of carbolic acid had been broken inside its wooden case. We exhausted our ingenuity in hopeless effort to unscrew the cover. We feared to carry it farther, as the burning tears distilled by it destroyed everything they touched. We dared not throw it aside lest the unsophisticated heathen should drink it as a cheering or medicinal beverage. We had no time to wait and empty it, as the fatal fluid would only trickle drop by drop through a chink which had been cautiously and laboriously excavated with a blunt hunting knife. What were we to do? Degrading as the confession must appear, we had to deposit the torpedo in the middle of the yard and throw bricks at it until it was smashed."

Opals of Various Degrees.

There are several varieties of opals and therefore several degrees of merit. The precious or noble or oriental opal is the supreme. This has all the colors, and when these colors are broken into spangles it is then called the harlequin opal. Then comes the fire opal, or girasole, with hyacinth red and yellow reflection. The former comes from Hungary and the latter from Mexico. The common, or semi-opal, are nonpareils. The hydropare, or opalus mundi, is nontransparent, but becomes so by immersion in water or any transparent fluid. The cachalot is nearly opaque and of a bluish white color. The hyalite is colorless, pellucid and white. The opal jasper, or wood opal, is the petrification of wood, opalescent, but without the coloring which makes the "noble" gem so precious.

Japanese Pastimes.

In Japan to get up parties to behold the freshly fallen snow or the cherry blossoms or the maple trees in their autumnal glory or to go to the flower shows is as de rigueur as are our dinners, cotillions and theater parties. Mushroom hunting is a fashionable pastime, while in the house harp playing, verse writing, embroidery and tea drinking are the most absorbing occupations. The most pretentious entertainment is the tea ceremony. It is very formal, and there is much elaborate performance connected with it difficult for a foreigner to comprehend.

Gum Chewing.

"To chew gum for five or ten minutes after a meal is absolutely beneficial," said a physician, "especially for hasty eaters, who do not half masticate their food, because the action of the jaws causes the gastric juices to flow, and that is good. But so few people can use and not abuse it. They get the gum in their mouths and keep at it till they fairly dry up the saliva supply, bring on a headache and get generally nervous. This will cause indigestion."

Wonderful Bird Flight.

The most wonderful bird flight noted is the migratory achievement of the Virginia plover, which leaves the northern haunts in North America and, taking a course down the Atlantic, usually from 400 to 500 miles east of the Bermudas, reaches the coast of Brazil in one unbroken flight of fifteen hours, covering a distance of 3,200 miles at the rate of four miles a minute.

Getting Back.

"Gee, no!" exclaimed the pretty cash girl. "I don't want nothin' to do with you. I wouldn't marry you if you was the last man on earth. Is that plain enough English for you?"
"It is certainly plain enough," said the mortified bookkeeper, "but it isn't English."

A Contrast.

A light supper, a good night's sleep and a fine morning have often made a hero of the same man who by indigestion, a restless night and a rainy morning would have proved a coward.—Chatterfield.

An Explanation.

Schoolmistress—Johnnie, who was it that prompted you then? I heard some one whisper that date to you.
Johnnie—Please, ma'am, I expect I was history repeatin' itself again.

A Back Number.

Defunct Barber—Where do you part your hair, sir?
Bald Headed and Irritable Customer—I parted with it twenty-seven years ago.—Chicago Tribune.

Man's recuperative power after an injury is in an inverse ratio to his social advancement.

More Goodness

Tillson's pan-dried Oats have a rich nutty flavor that no other breakfast food possesses. This excellence is due to both the grain and the milling. You can thank the careful milling for the fact that there are no hulls in it—it's free from black specks and dust. It is just the pure, meaty oat, milled to perfection. A food, not a fad.

Tillson's
Pan-dried Oats

Speeches of Men.

You may search through the annals of all time, and the speeches of men will tell the passions of the periods during which they flourished. The speeches of the ancients that have been preserved through the ages present to us our strongest and most important history of the past. They constitute the living sentiment of the literature of fame. In all the mighty tumults of war, the tranquil periods of peace and the convulsive shocks of revolution the orator stands in clear relief as impressive and enduring as the soldier. The great speeches of the great men of antiquity are in the mouth of the schoolboy. He cannot know Greece without Demosthenes. He cannot know Rome without Cicero. Still the stenographers of those centuries were unlike the stenographers of this, and so it will always remain a lasting regret that many of the most brilliant utterances of ancient oratory and wit have never been recorded.

A Cat and a Mouse.

Many, says a contributor, are distressed by the way in which a cat "plays" with a mouse before killing it. That the mouse does not suffer so much as might be expected is proved by certain facts told me by a friend a short time ago. Her cat after catching a mouse and "playing" with it for some time left it to go and eat some meat in a plate on the floor. To my friend's surprise, the mouse followed in spite of a broken leg and fed for awhile out of the same dish, the cat occasionally pushing the mouse aside when it came too close. When both had finished, the cat ate up his companion, who evidently feared death as little as the condemned murderers who, we are often told, "ate a hearty breakfast on the morning of their execution."

Clara—Do you think there's any chance of him asking me to marry him?

Maud—Yes; I never saw a man yet who wouldn't make a fool of himself.

"He's a good fellow," said the old man, "but he's a bit of a fool."

ALEX. CEDAR'S ADVENTURE WITH A GHOST.
