HUNTING SEASON
PROMISES WELL

Game is Plentiful, so
Reports All Say

OPENS TOMORROW
Ground is Soft and Hard to
Traverse—Calling Will be
Later Than Usual

From information he has gained upon trips over the I. C. R. and the C. P. R. within the province and from the opinions given him by guides and other experts in the lore of the chase, Douglas W. Clinch, secretary of the New Brunswick Fish, Forest, and Game Protective Association, predicts a hunting season which will be a record for the number of heads captured and their size.

Mr. Clinch bases his opinions upon the record of the past two years in regard to temperature. Both summers have been warm, both winters open, which is regarded as a sure indication of a large growth of antlers. The effect of the summer warmth and dryness of severity in the preceding winter was evident last shooting season in the number of successful hunters and the quality of the heads which they brought down.

The reports Secretary Clinch has so far received from the various sections of the province are to the effect that the number of moose, deer and other animals is unprecedented. Dwellers in the wood districts seldom rise without seeing one or more deer in the vicinity of their houses, and bears have been very bold during the summer.

Both weather conditions and actual observation of the birds give to the experts the assurance that this is also to be a notable season for partridge shooting.

Only one discordant note is struck in the hopeful song of the runner. This is occasioned by the dampness of the season. Summer and fall have both been wet in the hunting districts, although St. John has been fortunate in escaping rain in any great quantity. Much more rain falls the woods will be in such a condition that travelling will be difficult.

The calling season for moose will not be at its height this year until a rather later date than usual, owing to the warmth of the summer and the month of September. Calling cannot be successfully accomplished until after the first frost, and it is expected that the real big game season will hardly open until the first of October, and will not be at its height until the middle of that month.

OFFERED \$3,000
FOR HIS VOTE

MONTREAL, Sept. 12.—The declaration under oath by Ald. Clearthuis, that Mr. Mark Workman, a heavy share holder, had offered him \$3,000 to vote for the Montreal Heat and Power Company's contract, caused a sensation before the Royal Commission this afternoon.

"I gave that man such a tongue thrashing that he was ashamed of himself," declared Ald. Clearthuis referring to Mr. Workman. The alderman added that Mr. Workman asked during the interview not to mention any names, and Ald. Clearthuis said he agreed to keep silence unless forced to reveal the name.

There could be no mistake about the interview, Ald. Clearthuis said. He had been approached at the time by two men. The first was Mr. A. D. Porchereau who offered him shares in the company, and that did not work, and then Mr. Workman interviewed him, and said there was \$3,000 if he voted the right way.

It was about this offer that Ald. Clearthuis said he made a statement in council one afternoon to the effect that he had been offered money. Since then the power company had entered action against him, but had not pressed the suit.

"These are the people that stand up and malign us," declared Ald. Clearthuis referring to the evidence given by W. McLean Walbank, vice-president of the company, who testified that aldermen came to him looking for graft.

What Ladies Will Wear
ON THEIR HEADS THIS YEAR

Tomorrow will mark the millinery opening for the fall and preparations have been made in order that the opening might be an unrivalled success. St. John is now recognized as one of the leading millinery centres.

Brook and Patterson, London House, wholesale, and M.R.A. Limited, have excellent displays ready for the opening. The new colors in millinery are Catwaba, Taupa, Wisteria, Gendarme, and a combination of Paris Black and White. It is expected, however, that the bright hues will be stylish for but a short time, and when the novelty wears off, green will in all likelihood become practically the sole fashionable color in this season's millinery.

Note.—In reply to the above letter I would say that the conversation about the crate of berries is correct, but as to being saucy and insulting to the public, as Mr. Gale's letter indicates, it is false, and I will just leave this matter with the public in general to decide. Thanking you for the space in your valuable columns, I am, Sir, yours truly,
