A Streak of Rich Iron Oxides Met in the Syphon.

LIES NEAR BLUE'S MILL

Good Ore From the Oregon Near Waterloo-Big Returns From the Vancouver Group-Force on the Good Friday Increased to 25.

One of the biggest assays received lately was obtained Thursday by E. W. Liljegran, who is looking after the development of the Syphon Fraction, between the Big Trout and the Blue Elephant, on the south slope of Red mountain, near Blue's sawmill. It returned values of \$712 per ton in gold, Telegraph company was Thursday sumand 3 per cent copper. The sample was a brown iron oxide, of which a streak take charge of the work of stretching an from two to six inches wide was un- additional wire between Revelstoke and covered by a surface cutting. The out- Vancouver. This will be the fifth wire crop has been uncovered for a width of on this line and will be put in principally

since it comes from a vicinity which had stretched at the rate of 10 miles a day produced no extraordinary values, al- the task will occupy about 30 days. though iron oxides giving fair returns Mr. Harrington reports that there will are met with frequently in the vicinity not be so many interruptions of the teleof the Syphon. The discovery has con- graph service between here and Revelsiderably encouraged the holders of stoke as was formerly the case. For property in that vicinity, which, for the some time past he has been engaged in most part, has been little worked.

assays ranging into the thousands, but the way, is what is known as a "tree values above \$500 in any other ore found line;" that is, the wires are attached to in the camp are unusual, although arms of wood which are fastened to the quartz and iron from the Le Roi has re- trunks of trees. In stormy weather turned \$1,200.

Work on the Oregon Group. Saturday from Waterloo, where they to the ground is often formed, and hence have been doing development work on the wires work poorly or get out of order the Oregon group, one of the promising transmitted over them. At other times properties in that camp. A shaft was trees are felled by the wind, and falling sunk on the Oregon at two different across the wires, break them. In cases points. The greatest depth reached was like these there is a complete interrup-26 feet, at which point the ledge was tion of the telegraphic service. Mr. found well mineralized clear across the Harrington cleared 28 miles of the right bottom of the shaft, and a paystreak of of way lying between Nakusp and a point 18 inches was encountered. Mr. Wolfe two miles north of the Halcyon Hot brought down a quantity of the ore, which he will exhibit and have assayed. Springs. The snow finally became so deep that the further carrying on of the work fine looking galena and good work could not be done to advantage. in all values being \$51.80, of which a fair will be resumed, as the determination is is located three and a half miles north- the breaks will be reduced to a minieast of Waterloo and one and a half mum. miles south of the Kootenay river.

Ten Miles of Wire Rope. The Dominion Wire Rope company, limited, of Montreal, whose British Columbia agent is James D. Sword of Rossland, has just closed a contract with the Hall Mines of Nelson for 10 miles of wire rope for its cableway at Nelson. The rope is of a special kind of cast steel known as Lang's Lay, which is especially Northport Thursday it was learned that adapted for the work required, having a maximum of strength and pliability. Its weight is about 40 tons and it will be This is the second rope of this length supplied by this company, it having furnished one to the Hall Mines last year. A larger order for wire rope has never been placed in Canada.

HAVE KLONDIKE FEVER.

A Large Number of Miners Intend to Go North.

C. C. Woodhouse, Jr., is back from a visit to Slocan, where he has been for the past week. The mines of the Slocan, he says, are yielding well, and those who are interested in them are more than satisfied with the results which they are attaining. The merchants and business money with the intention of proceeding to the Klondike. This has a tendency to restrict the volume of business and to make times dull among the traders. Mr. Woodhouse further stated that it was astonishing to learn that so many of the Slocan miners are going to the Klondike. They are mostly of the floating class. All who are doing well in business will remain where they are, but there will be quite a number of the workers who will seek their fortune this year in the new Eldorado.

Primrose Company Meets. The annual meeting of the shareholders of the Primrose Gold Mining company was held at the office of Harris, dren, was embarking, leaving his family Kennedy & Co. Friday. From the behind. The wife seemed no less crazed report of the president, J. M. Miller, than her husband with the gold fever, who has had charge of the development and begged the passengers and bystandwork on the company's property (the ers to give her money enough to buy a and often take astounding "headers," to under the estimate. Seattle and Denmark claims on the passage. As her pleadings were unavailNorth Fork of Salmon river) it was deing she offered to sell her two little chiland discomfiture to the man of dignity.

lead 44.5 per cent per ton, returning a net value of \$95.45 per ton or \$3,739.25 for the two carloads. The quotation for silver was 56% and for lead 3.55. It was also ascertained from Mr. Hill that the company now has six more carloads

on the road to the smelter. The Vancouver Group Mining company is a Vancouver organization, of which Edward Mahon, of Mahon, Mc-Farland & Mahon, is president. It owns a group of seven adjoining claims, four of which are on the lead from which the ore shipped as above was taken. The ore occurs in chutes in a vein that varies from three to six feet in width. Mining on this group, like so many others in the Slocan, is by tunnelling. The tunnel on the Vancouver claim is already in about 400 feet, and it is being extended right along. The company has a valuable property in this group from which it is confidently anticipated frequent shipments will be made.

TELEGRAPH BETTERMENTS.

An Additional Wire to Be Stretched from Revelstoke to Vancouver. E. Harrington of the Canadian Pacific moned by wire to go to Revelstoke to 30 feet, and the ledge matter gives for the purpose of accommodating the assays as high as \$8. The assay is unusually interesting, about 300 miles, and as the wire can be

clearing the right of way along the Tellurides from the Jumbo have given line. The line, for most part of the branches become weighted with snow and hang

down so as to touch the wires. When Con Wolfe and J. C. Cox returned there is considerable moisture a current assays have been received, the returns When the snow clears away the work per cent is gold and copper. This group to put the line in such condition that

> The C. P. R. Telegraph company also intends to stretch another copper wire from Ottawa to Vancouver. This is made necessary through the increase in
