According to the Carnegie investigators, Johnston ran a great risk as he entered the manhole with only a handkerchief over the nose. He was overcome

James J. Houlihan, who almost lost his life at this time, was given a medal for his brave work in trying to rescue his companions. He made a valiant effort to bring Muldoon out, but failed. This was not the first experience of the kind that Houlihan had had, and owing to his experience, he was able to save his own life.

Peter J. Collins appears to have done noble work in trying to rescue the nen at this manhole on this same occasion, though he lost his own life. Mrs. Collins is awarded forty dollars a month for life, or as long as she remains single, and five dollars a month for each of her four children until they reach the age of 16 years. Excessive Devotion to Typewriting Caused Loss of Arm.

London, March 30.—What is said to be the first instance on record of articu-lar tuberculosis, caused by excessive devotion to typewriter work, is reported from Antwerp. A correspondence clerk in a wholesale business house there consulted a doctor recently about a pain in his right hand. Upon examination the doctor found the hand to be affected with tuberculosis, and needed amputation above the wrist.

The only reason that could be discovered for the existence of the disease was the abnormally heavy amount of typing work habitually done by the patient. The operation was successfully performed, and the clerk has retained his employment, having taught himself to rotion to typewriter work, is reported
