DRILLING THROUGH WALL PLUMBER TAPS WINE KEG

PITTSBURG—Every ray isn't a dull one for the plumber.

Thomas O'Brien, "pipe mechanic" was making a water connection in the cellar of a residence here. After he had bored a hole through a partition he shoved a pipe through when to his utter amazement a reddish liquid began to flow. It did not take him long to discover that he had tapped a wine barrel on the other side of the partition.

This was as much as I could stand, he told the magistrate after he had sobered up.

The City Council Lengthily Discusses the Situation

(Continued from page 1)

The Mayor said it was a mere matter of wages. Labor unions and politics have nothing to do with it. He knew nothing of those things.

Ald. Graves pursued the enquiry by asking what the situation was regarding the union.

Ald. Avery speaking from authority said the Independent Labor Party has no connection with organized labor. He didn't think the firemen were picketing. They were there merely as citizens watching what was about to happen. The city has recognized the firefighters' Union and consequently the officers have to be considered.

The firemen were not affiliated with the St. Catharines Trades and Labor Council. If they were there was a possibility of a sympathetic strike being called. Ald. Avery said.

Ald. Dakers said no question of unionism had come up hitherto, but he had to say he had heard the firemen in the hall say that if a certain young man were put on they would all walk out. Are those men going to boss the show and control the situation? He wanted to know. He was going to insist that men satisfactory to the council be appointed, not the firemen.

Ald. Graves wanted to know from the Mayor or someone else that the firemen were not going to walk out and leave the city in the lurch at 6 o'clock if there was any possibility of a settlement.

"I want to know this," said Ald. Graves.

Ald. Rose said they had sufficient men at noon to man the fire halls, but the Mayor had staved off the thing. Now he didn't know how many men were available. It was purely a question of wages. If the council cannot give the firemen 25 per cent increase then the only thing to do is to make arrangements to meet the situation. He objected to asking the firemen to stay on. The firemen absolutely demand 25 per cent increase. Is the council ready to grant it? He had men coming to the city to take charge of the department experienced men and he would have to go and meet them. It was a resignation, but to him it looked more like a strike.

Ald. Riffer said he was ready to vote on the report. "And if the crisis comes let us go and man the fire halls ourselves," he said. "I am ready to take my place there."

He added that if Ald. Avery had not spent sixty per cent of his time at the fire hall agitating, and if they had not given into the firemen in the first place they would not be having this trouble today.

Mayor Lovelace said he had acted really in his best judgment when he asked the committee not to go to the fire hall. He didn't think the labor unions were trying to run the city, and furthermore he had heard of drinking in the fire hall. He would make it his business to see that was stopped immediately.

Ald. Rose moved the council out of committee and the Mayor read the two reports the majority and minority reports.

The bonuses represented 25 per cent increase, the Mayor said.

Ald. Graves asked the Mayor what action he will take at the fire halls at 6 o'clock. Could the men be induced to stay until Friday noon?

The Mayor said he was uncertain. He had worked all day on it. It would do no good to go to the halls again. A special committee might be appointed.

"If you don't pass this minority report the men I expect will walk out at 6," said the Mayor.

Ald. Riffer asked for a showdown. He wanted to know who was boss of the situation.

Ald. Murphy wanted to know if there was a possibility of a settlement even if the thing is staved off till the morning.

Ald. Rose himself knew of firemen saying that day they would walk out if certain men were put on.

He didn't think the chief had control of the men.

Ald. Beattie said he had lost faith in the firemen. They had broken their word. He favored letting them go.

Only the majority report was voted on, the Mayor and Aldermen Avery and Murphy voting against.

Just before adjourning Ald. McLean moved the chief of the fire brigade take steps to protect the members of the fire brigade.

Ald. Rose said the matter had already been attended to.

Chief of Police Greene was present all through the meeting awaiting further instructions that might be given.

Ontario Teachers completed the organization of a Provincial Federation for the advancement of their claim to greater consideration than they at present receive.

THE SEA MUSSEL INDUSTRY

A novel industry which promises rapid expansion and great popularity is no less than the development of a substitute for the succulent but somewhat costly oyster. This is the sea mussel, found in vast quantities along the low tide mark of the Atlantic coast, chiefly in New Brunswick. The Dominion Government, with the co-operation of scientists, has conducted experiments to this end in Western University laboratories and it is now claimed that mussels can be produced commercially and sold profitably at 15 cents per quart, as compared with the \$1.00 per quart around which oyster prices hover.

The mussel is by no means a new article of diet to the people of Canada, and besides being used extensively in coast towns has found its way to the tables of inland cities in Central Canada. Its delicacy of flavor and high food value have been much advertised since the establishment of government investigation and experiment, and deserve to be much better known. There is yet much to be done in the line of research to ascertain conditions under which production would be most rapid and profitable, and to this end the Council of Industrial and Scientific Research is devoting its efforts.

A survey of the mussel beds of the St. Croix River, which constitutes the boundary between New Brunswick and Maine, has occupied the attention of a scientist of the council for three years now, and it is expected that this summer will see the satisfactory conclusion of the research. It is believed that the beds of mussels are practically unlimited, and the work occupying those engaged is merely the best conditions of development. It has also been determined that mussels become sweeter and more palatable the farther north they are found, and in this regard Canada has a distinct advantage over the mussel beds to the south of the Dominion. Those of the Hudson's Bay make particularly excellent eating.

The sea mussel cannot be produced in fresh waters so that there is no possibility of developing an industry in the Great Lakes. It is believed, however, that the development of fresh-water clams there and the Dominion Government at the instigation of the Ontario Fishermen's Association is conducting a series of experiments which will probably result in interesting developments.

There is no change in the situation following the firemen's walk-out of the previous night. The Chamber of Commerce, the Fire and Light Committee, the Vice President Dalphond and several business men are bringing about anything in the way of a settlement of the trouble, the Mayor and Labor Council met and decided to call a public meeting of the Chamber of Commerce, Fire and Light Committee, the Vice President Dalphond and several business men to meet tomorrow to protest against the action of the City Council with reference to the wages of the firemen. Last night saw no repetition of the previous night's lawlessness. There was only one alarm and that was at 7 o'clock last night by a fire in the city. The fire was at the corner of St. Paul and Queen streets. The firemen were out in a hurry and found no fire. All night long Chief Early and the volunteers were on hand ready to do anything that turned up but nothing did. It was one of the quietest nights the city has ever seen. In contrast over the previous night the members of the Fire and Light Committee say they have plenty of applications of men who want to take firemen's jobs but they are being the positions open to allow the old men to come back to work. One man who left has already returned and the Committee hopes to see others back before long. The Trades and Labor Council at the meeting of the Trades and Labor Council last night, President Dalphond who occupied the chair, in his opening remarks said he thought the Minister of Labor might have some advice from Labor's side, as well as the civic officials whether it was necessary to hope an investigation or not. He also stated that a few weeks ago members of the City Council exhibited a great turn of mind in order to settle differences between the N. S. & T. and its employees. It was now when a difference has arisen between the City Council and an important branch of its employees the City is hands off we will have no outside interference. Information was given by a delegate that men recently employed in the vacancies in the fire halls were ready granted more in wages than the former men asked for. Will Help Firemen It was unanimously agreed that the Trades Unionists of the city, be let an assessment to financially support the firemen and their families during the struggle for a living was a report was presented by Vice President J. A. Dalphond, of the International Firemen's Union who had been attending a get-together meeting of the representatives of the Firemen's Assoc., Chamber of Commerce and City Fire and Light Committee nothing tangible was offered from the latter body. The one odious suggestion was made
