Deadly They crowd into cars, swarm thickly in the shops, and at the picture theatres, and it is only when some poor unfor-

tunate receives a horrible disfigurement of eye or face that the menace of the hatpint is realized. Enough protest, in fact, has never been made n this country against the protruding hatpin. For years we have dodged the sharp points extending two, and often three, inches from each side of th hat, and instead of endeavoring to bring about the banishment of the protuding point, have tolerated it as

necessary evil. Such is not the case in Germany In many cities there police officials have the authority to arrest any wo-men travelling in public with long hat-pins in her headgear, unless the points are protected by the little cases sold for the purpose. This law also holds good in the larger cities of Australia, and in some parts of the

United States, The vogue for the small hat has increased rather than lessened the danger, as many women still use the same hat-pins which they wore in hats of broader rim, with the result that the points protrude further than ever. If a woman desires to make the same pins do duty, she should have them shortened, so that they will not project; and the point sharpened.

Several stores in London ca a stock of the little metal tips, which may be Tips 5c. adjusted upon the point of the pin, and form a perfect protection to the eyes and flesh of one's neighbor in a crush.
