DENNISTEEL LINE NOW LISTS LUPTON PRODUCTS

In view of the constantly increasing demand for all-steel products of every kind for factory, office, school, hotel, gymnasium and warehouse use, the Dennis firm has made arrangements to extend their field to embrace every item of such manufacture, and announce to the public that

they have secured the sole manufacturing and selling rights in Canada for the well-known Lupton line, produced in the United States by David Lupton's Sons Co., Philadelphia. With the nationally known Dennisteel line, which has been making sales records in the last year or two, this company now has the largest, best known and most complete range of all-steel equipment on the continent.

Western Fair Visitors

McClary's Extends You An Invitation

OUT-of-town visitors to the Exhibition are cordially invited, while in London, to make a thorough inspection of McClary's factories. Just call at McClary's offices and one of our officials will gladly escort you through the McClary foundry. You will enjoy the tour for its great interest and educational value.

McClary's also invites Western Fair visitors to see two splendid McClary's exhibits in Manufacturers' building. Here is being shown McClary's splendid ranges, heaters and furnaces—a complete line of heating and cooking systems using gas, electricity, coal and wood. Note also the attractive enamel-ware and cooking utensil display.

McClary's
