

Local and Other Matter.

Gordon Memorial Presbyterian Church, Sunday, Dec. 1st. No service. Sunday School at 2 p. m.

The Bridgeport Brass Band purposes giving a Concert about the 10th of next month. Particulars next issue.

It was reported here yesterday that the Rev. H. D. DeBilis had sold his house and grounds at Annapolis to Mr. George Harris, late of Vancouver.

A magnificent 16 page edition of the St. John Evening Gazette reached us yesterday. The paper shows us that it is brimful of interesting matter. It is from the pen of a plume excels anything hitherto produced in former endeavors. It deserves the success it has already obtained, and will deserve greater.

ACCIDENTS IN REED'S FACTORY.—On the forenoon of Monday last Mr. Thomas Shaw, who was superintending a planing machine in the establishment, had his left hand come in contact with it, suffering severe injury, by means of which the amputation of his little finger became necessary. The next finger also sustained considerable injury. A few days before Mr. William M. Manthorpe, operating on the same machine, lost a portion of his thumb in a similar manner. Both the injured men are doing as well as could be expected, and in a short time will be able to resume their duties in the factory.

NARROW ESCAPE.—A three year old child of Mr. G. W. Lantz, who owns what was formerly known as the Bruce mill, and who has been recently employed in repairing the mill and dam, a few days ago accidentally fell into the mill pond. A man named Joseph Neave, caught, jumped into the water to rescue the child, but being unable to swim would himself have been drowned, had not Mr. Urban Lantz come to the rescue of both and succeeded in saving them.

CHANGE OF PASTORATE.—We learn with mingled feelings of pleasure and regret that the Rev. G. F. Mainwaring has accepted the call to the pastorate of the Baptist Church at Kentville. We note the fact with pleasure in regard to his better prospects in his new field of labor, with regret that the people over whom he has had pastoral charge since the future is deprived of his faithful services. They will not easily cease the services of a man who has labored so long and so faithfully in their midst.

AN ECCENTRIC MILLIONAIRE NOVA SCOTIA.—The following paragraph appears in the last number of the New Glasgow Enterprise, and we wonder it to our own minds because of the compliment it pays to Rev. John McMillan, who has so recently paid a visit to our town.

William Miller of Murdoch nephew was Halifax, who is said to be worth \$15,000,000, is an enthusiastic supporter of the Y. M. C. A. and of the same in a similar manner recently contributed \$10,000 to the work in England. Mr. Miller is eccentric, but he is generous and generous men can always afford to be eccentric. By the way the millionaire recently remarked in public, that the best and most practical sermon he had heard preached in Halifax was that of Rev. John McMillan, pastor of Chalmers Church. Of course, Mr. McMillan is a Platonist!

DOLL DRESSMAKERS.—The young misses of St. James' Sunday School have formed a Sewing Circle, would respectfully solicit orders for Doll's Clothing, which they can assure their patrons will be made in a neat and tasteful manner. Doll's coats, capes, bonnets, dresses and undergarments, or full outfits, furnished at reasonable prices. Other small articles suitable for Christmas presents, as bags, aprons, washcloths, etc., made to order. Orders may be left with Miss Madge Morse or Miss Nellie Hoyt.

A BIG GALE IN ENGLAND.—London, Nov. 25th.—A gale prevails along the southwest coast of England. Much damage has been done by wind. Telegraph wires are blown down, and a number of minor casualties are reported.

ANOTHER ASYLUM HOLOGRAST.—The Blackford Asylum, Nov. 25th.—The territorial asylum was burned this morning. 57 of 65 inmates were rescued. Four are known to have perished. Four others are missing—it is feared burned to death. Loss \$30,000.

LOST.—Messrs. Bonnell and Cowan, owners of the schooner C. E. White, fear that that vessel has been lost at sea while on a trip from Digby to Antigonish. The vessel sailed from Digby on August 21st, since which time no tidings have been received of her.—C. Gazette.

We wish to say to the public that we guarantee there is nothing sold in this store that will cure or prevent rheumatism, sciatica, gout, sore throat, common coughs, inflammation, lumbago, colic in men and women, and all other ailments. One bottle cured my horse this summer that was about gone with colic in less than fifteen minutes. Try it and you will see no other. For sale at Whitman's, Lawrenceville; Randolph's, Dominion's, and where it is manufactured, Bridgetown; and all over the province.

FROM THE JAWS OF DEATH.—A remarkable escape from death is reported from Jefferson Park. On Thursday last George Davidson, a 10 year old boy, was playing along the Northwestern Railway tracks when a freight train came along. The child's hat fell off and blew between the tracks. In attempting to recover it he fell, lying lengthwise between the two tracks.

Before she could rise the train of thirty-three cars passed over her. The little one, realizing her danger, remained quiet until she thought the last car had passed. Then she raised her head and was struck by a break beam from the caboose. The train stopped, and conductor "Billy" Costello went back to recover, as he supposed the remains. The child was without fear, opened her eyes, walked a short distance and then fainted. It was found the blow on the head caused a slight fracture of the skull, but nothing serious, and the child has since recovered. The engine was what is known as a "hog engine," being elevated more than the ordinary locomotive.

The December number of *Outing* is one of the best ever published. It is a wealth of illustrations of a high grade. Some of Henry Sandham's best work is shown, and sterling articles by George H. Hobbes, have furnished most beautiful wood engravings. The opening article, Waban Among, by F. Houghton, is a clear description of a tour in the region of the Great Lakes, beautifully illustrated. Another very noteworthy article is the Merits and Demerits of the National Guard, by the eminent authority Lieut. W. R. Hamilton. The criticism will assuredly call forth much discussion. We note further the Game of Curling, by James Reddy; Whodunnit, through the Land of Evangeline; Game Protection; a very interesting illustrated article by W. L. Lincoln; and on Instinctive Photography; Women and their Gains; The Yale Stroke, Alligator Shooting in Florida and Na-na-go-go, a fishing sketch. Our Yuletide Sculpture, the Age of Sail, and A Skating Interlude, are poems of much merit. The editorial departments present attractive and original questions of the day, while the records show what has been accomplished in the various pastimes.

DEATHS BY VIOLENCE.—This City, Minn., November 25.—William Brooker yesterday shot and killed Wm. P. Coombs and wife and escaped.

Butte, Mont., November 25.—Joseph A. Smith, who killed Tom Marshall Williams, of Trenton, two weeks since was taken from the jail by a mob last night and killed. He was insane.

Butte, Mont., November 25.—At Anacosta, yesterday, J. F. Holditz was shot and killed by his son, who afterwards committed suicide. He was insane.

News, Notes and Telegrams.

A correspondent of the Salt Lake City Tribune, after a visit to Nova Scotia writes: There is not on the North American continent a richer land and sea than this province. There is no territory between the Rocky Mountains and the Atlantic so rich and varied in its resources as the Nova Scotia. It has lands more fertile than any in the Union. I have been shown in this province that has yielded a harvest of wheat, corn, and other crops. It produces the finest apples in the world and its meadows yield the stoutest woads of timothy I have ever seen. Its hills contain gold, silver, copper and iron, and the latter equal to the Swedish iron. Its coal mines are one of the wonders of the world.

For one, then, I hail the brighter auspices that this narrow peninsula will lead our representatives in Congress to raise against her an unkind hand. Free trade with Canada will be nothing from the treasury of the United States in comparison with what it will put in circulation among the people of the sister State.

ON THE WINDS OF FRIDAY.—The Windsor Tribune of Friday last, contained an ad. of the loss of a sum of money, in the vicinity of Windsor, and stated that the finder would be rewarded on leaving it at this office. The next morning Mr. Jerry Parsons came into the office accompanied by his niece, Mrs. E. B. Jones, a child eight years of age, who lives on Gerrish street. Mr. Parsons produced the money, \$44, and said that the finder of the money was the site the Baptist Church on Tuesday afternoon, took it to her aunt, Mrs. Stephen Jones, who brought her to him. They went out and it was not advertised as lost, they would then advertise the finding of it. On seeing the ad. in the Tribune, they once brought it to this office. The loser, Mr. John Hart, of Chester Road, who had lost the money, was very anxious to have it restored to him; and rewarded the finder, as he promised. The little girl who found the money, who was about 10 years of age, and whose name was a great boon; so their honesty in returning it is the more commendable.

HE FOUND THE THREE.—It happened in Woodstock. Wood, that is good hard wood, fit for the cook stove is high here at this time of year, and a good one will measure about six feet. To have such an expensive luxury deliberately perished without an attempt to detect the criminal was more than most would willingly put up with, so boring holes in two sticks, carefully charging them with powder, he placed them where they would likely be the first to be used. As he was sitting by his stove next day, during a lull in business and pleasantly meditating on the certain success of his plan, he saw a flash, heard a crash and—Well, he got some new pipe, patched up the holes in the wall and went on his way.

S. S. PRATT TAKES IN CALIFORNIA.—Messrs. E. R. Clarke & Co., Nurserymen, of this place, shipped by express last Saturday, 10th inst., a consignment of apple trees, which were to be sent to Mr. Dwight Whitman, of Oakland, California. Mr. Whitman is the son of Thos. S. Whitman, Esq., of Annapolis, and is a resident of the latter place. The trees which have a ready and ever increasing sale in all parts of the Maritime provinces.

NEARLY A FIRE.—On Wednesday evening a lamp, which had been lit in a room by one of Mr. A. M. King's young ladies, fell on the bed, and a fire broke out. The fire was fortunately prevented. Oil that had exploded can hardly have been more dangerous. The fire was caused by a lamp which had been lit in a room by one of Mr. A. M. King's young ladies, and fell on the bed, and a fire broke out. The fire was fortunately prevented.

LOSS OF THE MARY ALICE.—Capt. B. King has given us a graphic description of the Mary Alice, off Cape Beaulieu last week. Schooner left Parrsboro on Tuesday 12th, coal laden for St. John. On Wednesday morning when about 9 miles from Cape Sable the vessel began to leak and they put off for Quaco harbor, which they intended to enter at high water. As there was no wind, they could not get into the harbor, and before the next tide a gale sprang up from the eastward and the vessel was leaking badly, they were compelled to wait until the tide was high to enter the harbor, but before they could get in the vessel had parted chains. The crew took to the boats and landed on the beach leaving the vessel to the rocks where she went to pieces in less than half an hour. The crew were kindly taken care of by Mr. Bradshaw, of Fog whistle, and Mr. Morrison, Capt. King being in the highest terms of the kindness of the people of Quaco, who rendered them all the assistance in their power.

THE WEST INDIA SERVICE.—The steamship line from this port to the West Indies will call at St. Kitts, Guadeloupe, Martinique, San Lucia, Barbados and Trinidad on their regular voyage to Demerara. There is no doubt that a large trade with these islands and with Demerara can be established by means of this line. Last year Barbados imported \$175,000 worth of flour, \$460,000 worth of flour, \$280,000 worth of fish, \$190,000 worth of lumber and \$190,000 worth of coal. Trinidad imported \$200,000 worth of fish, \$250,000 worth of meat, \$640,000 worth of flour, \$200,000 worth of lumber and \$250,000 worth of coal. Demerara imported \$110,000 worth of flour, \$400,000 worth of coal, \$550,000 worth of flour, \$250,000 worth of coal, \$100,000 worth of lumber and \$270,000 worth of pork. These figures will serve to show the extent of the trade in our own waters, and how much can be done with the West Indies when this new line of steamships, giving regular and rapid communication, is established.—Evening Gazette.

BERNARD ACCOMMODATION FOR TRAVELERS.—The C. P. R. are making important provision for the better accommodation and comfort of travellers by their second class colonial cars across the continent, namely, furnishing, at the most notable points, of bed, bedding and cooking utensils in a clean and comfortable manner. They intend to attend to them. Those who cannot afford to pay first class will thus find the second not separated by nearly so wide a chasm as hitherto. The new arrangements apply especially to the excursions, which the company are establishing fortnightly during the coming season.

The Seattle Post-Intelligencer of Nov. 25th, says: Mr. E. P. Pisco and family are of the Tacoma, from Colombo, Ceylon. They brought with them two native servants from Ceylon, and Mr. Pisco contemplates establishing a tea agency here. Tacoma, on Puget Sound, in the new province of Washington, on the Pacific, is a rising town. Mr. E. P. Pisco is a native of this County.—New Star.

COURT FOR DIVORCE AND MATRIMONIAL CASES.—His Lordship Judge Graham held chambers in this court on Saturday, at 11 o'clock. The following cases being ready for trial were on motion of counsel set down for a day, viz: Mother and Mother and Roberts and Roberts, for Friday, the 6th of December, 1889.

The case of Jeffrey and Jeffrey, in which the evidence has been already taken before the registrar, was set down for a hearing on the 27th of December next. In the two first mentioned cases the evidence of the parties will be taken by the judge in open court. The counties Hants and Lunenburg are represented in the parties to these suits. Costs of parties pendente lite were ordered to be taxed by registrar.

For Frost Bites. There is no better remedy for frost bites, chilblains, and sores than the Hingham Yellow Oil. It also cures rheumatism, lumbago, sore throat, deafness, and lameness, and pain generally. Yellow Oil is used internally and externally.

For Prostrated. I can recommend Burdock Blood Bitters as a sure cure for scrofula. I had it for four years, and was troubled with Hingham's Yellow Oil. It also cures rheumatism, lumbago, sore throat, deafness, and lameness, and pain generally. Yellow Oil is used internally and externally.

Why do so many people we see around us seem to prefer to suffer and be made miserable by Indigestion, Constipation, Dizziness, Loss of Appetite, Coming up of the Food, Yellow Skin, when for 75 cents we will sell them Shick's System Vitalizer, guaranteed to cure them? Sold by DeBilis & Primrose, Bridgetown, and Dr. Morse, Lawrenceville.

Correspondence.

We do not hold ourselves responsible for the opinions of our correspondents.

Woman Suffrage Answered. I wonder what manner of man (or woman) it is that has dared to resurrect the Woman Suffrage question. We thought it forever silenced. Feb. when one of the wise men by name of "Nemo" published in the Halifax Herald a letter, or rather, sermonette, from the text, Mark, 16: 7, to the effect, "The stone is rolled away from the sepulchre."

In this he gave the words of the articles of his baptism, which articles, judging from his arguments, mean that Adam was the first man, therefore, he must have had most muscle and brain. And no one answered him, "Nemo," and he was alone in his glory. Did no one ever hear of a negro or a white man in this fair earth where women have to toil, not only like men, but like beasts of burden? I throw it were as easy to fire a gun or carry a knapsack as to haul coal from a mine. Would this elevation of woman entitle her to "Nemo's" baptism, and thus to the suffrage? But even suppose man has a right to the gunpowder and the mine, and the woman has the right to the country, and her country, and a Florence Nightingale and her band of nurses, or the man who betakes himself to sea in a country vessel, or the one who stays home with the "exemption papers" in a hacking (I cough, standing behind the counter, selling tape, hair pins, and candy).

And are the lame, the halt, and the blind; the poor, the ignorant and drunken, the inferior to the intelligent, the honest and industrious and interests are for purity and morality? The school-teacher, under whose care they place their children for education, the women who are the most prominent of temperance, the women, who, as an organized band, keep watch over the young stranger who comes away into the hands of the evil doer, the women who earn the family bread in more ways than one. Who shall say that these have not the right to vote?

Will some one give one reason why women shall not be allowed the franchise, besides this one that she is not a man? Why, Mr. Editor, I undertook to answer "Woman Suffrage," but I find those questions unanswered. I have no doubt, but I will kindly allow this a place in your valuable paper, perhaps some one will defend the faith by answering both "Woman Suffrage," and "U-MANTU."

A Plea for the Farmers. EDITOR MONITOR.—Being a young farmer, and as yet not having had much experience, I would like through the columns of your valuable paper to have the opinion of some experienced farmers and orchardists to a matter which has occupied my attention for some time. I have had five or six notices several letters to the press admonishing the farmers to pick and pack their apples carefully, so as to avoid bruises, which, of course, has a tendency to injure their keeping qualities. Now I will endeavor to prove that the farmers are not accountable for all the bruises that find their way into market, especially in England. In the present age, when every thing is done in the quickest manner, it is not, in intelligent person can deny that apples, being shipped, especially for foreign markets, are handled in a way that must be highly detrimental to their keeping qualities. To follow a barrel of apples, leaving the farmer's hands in perfect condition, and so on until it reaches the hands of the consumer, would be a serious task; and sufficient to say that every time those barrels strike one another, and the apples are bruised, and so on until it reaches the hands of the consumer, would be a serious task; and sufficient to say that every time those barrels strike one another, and the apples are bruised, and so on until it reaches the hands of the consumer, would be a serious task.

When, from any cause, the digestive and secretory organs become disordered, they may be stimulated to healthy action by the use of Ayer's Cathartic Pills. These Pills are prescribed by the best physicians, and are for sale at the drug stores.

THE INTEREST RATE.—The Montreal Gazette says: The normal rate of interest on capital in Great Britain is rapidly approaching 2 1/2 per cent. The present rate of interest on the conversion of the public debt fixes that figure for all consols after 1903, but already an issue of Government securities at 2 1/2 per cent. has been made. The price of which is 95, and anticipating events the London County Council have bought a consols at 95, and are now selling them at 95, and anticipating events the London County Council have bought a consols at 95, and are now selling them at 95.

Canada's Credit. In the course of his speech at the Victoria banquet in his honor, the Governor-General remarked that last year the Dominion floated a loan on the market at the same rate as the securities of the Imperial Government, and he said, "I think it is a day to-day, he said, could go into the money market, where no sentiment exists, and float their loans on equally favorable terms with many of the old world cities of far greater age and size. This would show that the progress of the Dominion was not only rapid, but that it was making a name for itself in the money market."

At the time of the late census the empire, now Republic of Brazil, had 13,000,000 inhabitants, the great bulk of them living on the sea coast. More than half of the population lived in the five provinces of Pernambuco, Bahia, Minas Geraes, San Paulo, and Rio de Janeiro. The capital, Rio de Janeiro, in 1888, had 300,000 inhabitants, and the province, including the city and its suburbs, 850,000. The population of the Empire, including the city and its suburbs, was 1,200,000. The population of the Empire, including the city and its suburbs, was 1,200,000.

A Chapter of Accidents.

NARROW ESCAPE.—On Thursday evening the schooner Georgiana arrived in port from Tuxet Widge with a cargo of fish. Her keel caught in the mud so she did not obey the helm and she ran into Lewis' wharf smashing in the end of the store on the wharf breaking off the schooner's bowsprit and cutter. Capt. N. B. Lewis was standing on the wharf when the accident occurred, and he was suddenly displaced. It seems a plank was started in the wharf by the collision and it tilted, dropping Mr. Lewis under the wharf, then came back into position. He was found under the wharf, but he was not hurt.

A PEELING ADVENTURE.—Mr. George Cremer of Morristown, had a narrow escape a few days ago. While hunting for a fox, he was caught in a tree. He was found by a neighbor, who was climbing the tree, and he was rescued. He was not hurt.

During the passage of the H. M. S. Albatross to Bermuda, Jamaica, St. John, a man, was lost overboard. The unfortunate man was standing on the deck of the vessel near the bow when the ship gave a lurch, and he fell overboard. He was not seen again.

KILLED ON "L'ELBECQUE."—A sad fatality occurred on board the French steamer "L'Elbeque" shortly after her departure from St. John. A man named Joseph Hanel, 26 years of age, was working on the hurricane deck. He had in his hands a coil of rope, and he was leaning over the side of the vessel when he fell overboard. He was not seen again.

DEATHS.—At Hillsboro, Nov. 24th, the wife of Wm. Snow of age 75 years. At Hillsboro, Nov. 24th, the wife of Wm. Snow of age 75 years. At Hillsboro, Nov. 24th, the wife of Wm. Snow of age 75 years.
