IMPORTANT TO FARMERS.
READ the following Letter from Mr.
 Geo. H. Pierce:

RICHMOND, C.E., March 17, 1866.
 DEAR SIR,—Last year I used two and a half tons of
 SUPER-PHOSPHATE upon fields of CORN, OATS and
 TURNIPS, and am happy to give you the results, which
 were as follows:—About 1½ acres of Corn were sown
 in drills 3 feet apart, for fodder, applying about 1½ bbls.
 of Phosphate to the acre, sprinkled in the drills and
 covered in with the seed. The variety was the "Yellow
 Dent Corn." The growth was remarkable, averaging
 ten feet high, and the product reached the extra-
 ordinary amount of 36 tons per acre of green crop, or
 18 tons per acre of dried fodder, (the shrinkage being
 50 per cent, according to the best authorities). I com-
 menced feeding ten cows upon this fodder, on the 15th
 of November last, giving them two feeds a day of the
 fodder, and one feed a day of either hay or mowed
 oats. In this way the product of 1½ acres has kept the
 ten cows until the 15th instant,—a period of four
 months. It will be seen that this a very economical
 feed, and I would recommend its general adoption by
 farmers who have stocks of cattle to winter.

On the Oats I applied the Phosphate upon two 6-acre
 fields, leaving occasional strips of land without its ap-
 plication. The results were, that upon one field where
 the soil was rather poor, the yield was doubled; and
 upon the other where the soil was rather better, the
 increase was fully 50 per cent.

Of Turnips, I had about five acres of poorish land,
 the whole being manured in the drill with common
 farm-yard manure. I applied Phosphate in the drill
 at time of sowing, to 4 acres, and obtained a yield of
 nearly 800 bush. per acre; while the acre left without
 Phosphate produced not over 300 bush.

Having used the article now for two years in a man-
 ner to test it well, I am convinced that it is not only
 efficient in producing large crops, but that it is also an
 economical fertilizer for ordinary farm crops.

I am yours truly,
 GEO. H. PIERCE

Mr. E. L. SNOW, Montreal.
 One ton of the CANADIAN SUPER-PHOSPHATE
 is equal to Two Hundred Loads of good Farm-yard
 Manure.
 It is easily applied, and is the most CERTAIN and
 ECONOMICAL means of producing LARGE CROPS.
 Farmers can obtain a supply at the stores where they
 are accustomed to trade.

Address, E. L. SNOW,
 Manufacturer,
 Montreal.
