J. E. WETHERELL, B.A.

PRINCIPAL OF STRATHROY COLLEGIATE INSTITUTE,
— AND —

Selections from Addison's Essays
With Life of Addison and Critical Studies,
By F. H. SYKES, M.A.

TEACHER OF MODERN LANGUAGES IN PARKDALE COLLEGIATE INSTITUTE, TORONTO.

PRICE, - - 50 CENTS.

The attention of teachers is called to this new work. It has received the unqualified approval of all who have seen the advance sheets. It is confidently believed that there will be in the market no other work which will meet so well the new requirements of Toronto University and the Education Department. Mr. Wetherell is the editor who was last year chosen by the Department to edit the Departmental book, which has been so well received by the schools. Mr. Sykes is one of the most brilliant among the younger men of the profession, and we expect his part of the work to be warmly received. The Critical Introduction by Mr. Wetherell, and the Studies in Prose Style by Mr. Sykes, will be found alone worth the price of the book.

We take this opportunity of announcing that the work on English Literature now being issued will be the first of a series of which Mr. Wetherell will be editor-in-charge. As the principal editor, Mr. Wetherell will call to his aid the services of competent co-editors. We intend to make this new series of literature texts the very best ever issued by any Canadian publishing house. We shall shortly send to press the literature texts for matriculation and second-class candidates for 1891.

IMPORTANT TO MATHEMATICAL MASTERS IN CANADA.

Plan of Hamblin Smith's Editions of Euclid recently
Approved by Special Board for Mathematics
at Cambridge.

The following is an extract from a report issued by a Special Board for Mathematics on May 10, 1887. (See Cambridge University Reporter of May 31, 1887.)

"The majority of the Board are of opinion that the rigid adherence to Euclid's text is prejudicial to the interests of education, and that greater freedom in the method of teaching Geometry is desirable. As it appears that this greater freedom cannot be attained while a knowledge of Euclid's text is insisted upon in the examinations of the University, they consider that such alterations should be made in the regulations of the examinations as to admit other proofs besides those of Euclid, while following his general sequence of propositions, so that no proof of any proposition occurring in Euclid should be accepted in which a subsequent proposition in Euclid's order is assumed."

The Board gives effect to this view by proposing a change in the regulations for the Previous Examination, which will, if it is approved by the Senate, enact that "the actual proofs of propositions as given in Euclid will not be required, but no proof of any proposition occurring in Euclid will be admitted in which use is made of any proposition which in Euclid's order occurs subsequently."

This determination to maintain Euclid's order, and to allow any methods of proof consistent with that order, is in exact accordance with the plan and execution of my edition of Euclid's Elements.
