I notice that a few days ago an eminent naval authority visiting this country stated that the growth of the Canadian Navy since the beginning of the war had been almost a miracle.

Some Hon. SENATORS: Hear, hear.

Hon. Mr. KING: I am sure those of us who have familiarized ourselves with the development of our Naval Services will share his view. As is well known, at the beginning of the war we had some fifteen ships available, and officers and men numbered about 1,700. To-day we have some hundreds of ships, and officers and crews total more than 20,000. I understand that within the year more volunteers and ships will be added. Our naval forces are engaged day and night in protecting our coast-line and in the important duty of convoying transports across the Atlantic. The services thus rendered are, I think, such as Canadians may well be proud of.

Some Hon. SENATORS: Hear, hear.

Hon. Mr. KING: In the House of Commons on May 12 the Minister of National Defence for Air made a break-down of the Estimate of \$625,462,892 allotted to his department, as follows:

We are all familiar with the fact that the British Commonwealth Air Training Plan has been a tremendous undertaking. Only recently the United Nations opened an Air Training Conference in this Chamber. Subsequently committees were formed to consider co-ordinating the air training of the various Air Forces, to enlarge the general plan and arrange for its continuation up to 1945.

We have learned with pride that flyers of the Royal Canadian Air Force have recently been engaged with the British Air Forces in the tremendous bombing raids over Germany.

Some Hon. SENATORS: Hear, hear.

Hon. Mr. KING: As to the original Air Training Plan, I notice this morning in the Press a rather interesting statement which I should like to place on Hansard. The Right
