

NO. 100-A

NICHOLLS

FRAMING SQUARE

This cut shows a portion of the back of body of our New Square No. 100-A. This square has the regular Nicholls Framing Rule for Common Roofs, on the face of the body, and the Octagon Roof Framing Rule on the back of the body.

This Octagon Framing Rule is not put on any square except the 100-A and is the only square ever manufactured which gives all cuts and lengths for all kinds of roofs.

A Weldless Square
