on messages between Canada and Altho there were six feet of show ever

that the probable reason for the West- the Porcupine Townsites at the north ern Union retaining their own lines in end of the lake are now dry.

Surplus of \$757,000.

Up to 1910 the total surpluses of the company amounted to \$757,266, which was subsequently reduced by the auditors by \$293,863, to allow for a reduction in the value of the lines of the waters have receded and boats are able to navigate the channels.

Portions of the line had been sold, and the amounts received credited to assets. While the company did not foisets. While the company did not foilow the instructions of the Western Union in the operations of its business,

showed a large surplus of \$424,000 on so soon forgotten and anxious ministers paid. I don't think you were very frank on that date?" he said.

action of the two alies in 1908 is not so soon forgotten and anxious ministers see danger signals in the immediate present.

Despite the declarations of newspa-Based on Local Rates.

Mr. Perry went on to explain that on interchange business between two companies the charge is based on the lo-cal rates of both to and from the point of connection. He understood that the Western Union had control of the G.N.W. stock, altho there was nothing to show that such was the case! He himself held 65 shares in trust. Mr. Perry produced copy of an agree-

business in Canada. In fact the company had no real competition until the advent of the C.P.R. telegraphs. In obligation of publicity beyond notifying the Western Union also secured 1882 the Western Union also secured control of certain cable connections, to which the G.N.W. became a consent ing party. The receipts from conjoint business in 1905 were \$487,788. The companies divided this revenue equally now, but at one time it was apportioned on the basis of 48 to 52. The Western Union only operates directly in those parts of Canada not covered by the charters of the original combatters. In the president of the council of ministers and minister of foreign affairs. This power was conferred by a secret vote, but the news soon leaked out, causing great dismay in Constantinople and Salonica, where there is a conviction that Austria-Hungary and Roumania are the governments with which the secret treaties are to be made.

But what is the object of such trea-

with which the secret treaties are to be made.

by the charters of Canada not covered by the charters of the original companies, so that the ten-word rate from Montreal to Monckton would be 30 cents, of which the G.N.W. would get 25 cents to a town outside of Monckton, and the Western Union 5 cents for the remainder of the distance.

Paid Fat Dividend in 1885.

The 1885 the G.N.W. paid a 50 per Towner this possibility the Turkish the secret treaties are to be made.

But what is the object of such treaties? To this question the Young Turkish leaders can see but one answer they are to free the hands of Bulgaria so that she may pick a quarterly and the G.N.W. paid a 50 per Towner this possibility the Turkish the charters of the original companies. In 1885 the G.N.W. paid a 50 per

Lake Captain Dead.

WILL PORCUPINE SURPASS THE RAND OF SOUTH AFRICA?

The Output of Gold From the Rand Last Year Was Valued at \$155,736,000 - And That's Going Some.

The following items were published in our DAILY PORCUPINE BULLETIN during the past

APRIL 24.—The opinion has been expressed by numerous writers on the Porcupine Camp, that the district would probably surpass the Rand of South Africa in the production of gold. Mr. William E. Soule, Financial Editor of THE BOSTON POST, in a signed article in his paper of April 23rd, says:

"The world's greatest authorities in gold mining-Wigmore of South Africa, Fleming of Mexico, Smith of Nevada, Trerise of Montana, Webb, Frechville and McArthur of England, Miller and Burrows of Canada, and Simon of France-are a unit in saying that this great region of the Ontario northland, with its rich showings of ore covering so great an area, is better than has ever been seen before; that Porcupine is to be a very large producer of gold, probably the largest in the history of the world, and LARGER EVEN THAN THE FAMOUS RAND MINES OF SOUTH AFRICA."

In order that our readers may realize the full meaning of the last sentence above quoted, we would say the gold output of the Rand of South Africa last year amounted to 7,533,000 ounces, valued at \$155,736,000. When the Porcupine district gets to a point where it is producing gold at the rate of over \$13,000,000 per month, there will be some sad lamentations among the people who had the opportunity and failed to buy Porcupine stocks at present levels. Porcupine may not surpass or equal the Rand, but there are good judges who claim it will. Under the circumstances it seems to us that an investment in the good Porcupine stocks at present prices presents a most unusual speculative opportunity.

APRIL 18.—It has been our contention all along that the slump was only temporary. Our reasons for this are many. Primarily, because of the fundamental values in the Porcupine Camp. Evidences are multiplying every day that Porcupine is one of the greatest gold deposits ever found in the world, and there are competent judges who maintain in Porcupine. that it will surpass even the Rand of South Africa. Its mining camp.

known area of mineralization is far greater than any other camp ever found on the American Continent. The veins are numerous, and free gold has been found in an area covering twenty miles square. The greatest mining men in the world have made investments in the camp running into millions of dollars in the aggregate, and there are said to be now between 7000 and 10,000 people in the district. The Government Railroad, which it is promised will be completed by the 1st of July, will enable people to reach the camp with ease. After that the news will spread by word of mouth, and the wonders of the camp will become more generally known, and a consequent buying of the stocks will follow. For these reasons we think that the present market offers exceptional opportunities for profitable invest-

APRIL 20.-The public will probably not commence buying Porcupines in great volume until the prices have advanced to higher levels. That's the usual way with the general public. More Goldfields Consolidated was bought by the people at between \$8 and \$10 than between \$4 and \$8. More Nipissing changed hands between \$15 and \$30 than between its initial price of \$4 and \$10. The fellow who buys at the high prices is generally the one to suffer loss. There are plenty of instances to prove this.

APRIL 21.-The market is well in hand, but there seems to be fimidity in buying. The orders are for small lots. Any considerable number of buying orders of thousand-share lots, which are likely to come into the market when a full realization of the importance of the Porcupine district has filtered through the public mind, would send prices upward with leaps and bounds. Porcupine has ten times the mineralized area of Goldfield, with larger veins and richer surface showings on the average. It has ten times the mineralized area of Cobalt. It has the most solid, substantial and wealthiest mining interests in the world developing it, while Goldfield was exploited by wildcatters and gamblers. There are no gambling houses nor saloons in Porcupine. Canadian law does not allow them in any

THE BEST PORCUPINE INVESTMENT

When a person has become convinced that Porcupine offers exceptional opportunities for speculation, the question naturally arises:

WHAT STOCK SHALL I BUY?

There are several good ones, but we suggest that your first choice be

PORCUPINE TOWNSITE MINES, LIMITED

for the following reasons:

1st.—BECAUSE the location of the property is most favorable, being east and south of the Hughes properties, where the most spectacular gold showings of the camp have been found, and adjoins the City of Porcupine on the north.

2nd.—BECAUSE the management is first class. The officers are men well and favorably known in Toronto and New York. Mr. C. J. Musson of the Musson Book Company of Toronto is President; Mr. Charles T. Lunt, Chief Accountant of the United States Sub-treasury, New York, is Vice-President. The other directors are A. J. Gillies of the well-known family of that name in Toronto; Hon. Amos H. Stephens, Chief Counsel of the Travellers' Insurance Company, New York, and George

Gouinlock of the Toronto Hardware Company. 3rd.—BECAUSE it is organized under the strict laws of Ontario.

4th.—BECAUSE its capital is comparatively low, \$1,000,000, divided into 1,000,000 shares of the par value of \$1.00 each. 5th.—BECAUSE one-half of the authorized capital is in the treasury-500,000 shares.

6th.—BECAUSE application will be made to list the stock in a few days, and it may reasonably be expected to sell at higher prices.

7th.—BECAUSE you can get into this company on practically the same basis as the underwriters (so-called) have in other popular Porcupine stocks. 8th.—BECAUSE—well, there are lots of things market-wise that had better not be tipped off in

the public press. SEND US YOUR ORDERS FOR PORCUPINE TOWN-SITE AT 35c A SHARE AND DO IT NOW.
