

TUESDAY MORNING

## Commercial Reports

Black Rust Damage Conceded  
And Wheat Gets Sharp AdvanceChicago Exchange Opens a Point Higher on Bullish Crop Reports  
—Northwest Exchanges Lead in Strength.

CHICAGO, Aug. 7.—Flurried by worse reports about black rust in Manitoba, the wheat market today made a violent upward jump. Closing prices were at nearly the top figures reached since 1907, 14c to 14 1/2c higher than 48 hours ago.

Corn finished a shade to 1/4c up, on a case of 56 to 54c, and provisions at an advance of 2/4c to 1 1/2c to 20c.

Today was the first time that Canadian authorities acknowledged the crop situation to be serious concerning the black-rust in wheat. At Chicago the admission caused less surprise and excitement than appeared to be the case at the market near the scene. According to the most accepted view, the area of the crop was following the same course as in 1907, when the rust plague ravaged the province—first, positive and rapid, and finally the facing of losses on a wide scale.

Bad Reports All Round.

Besides the ominous dispatches from the Canadian north, there were added reports from North Dakota that fields which had promised 30 bushels an acre shriveled to eight bushels this morning, and that half of the damage had been apparent until within the last two days.

It was also stated that the Kansas wheat crop had been damaged by the rust, and that the Kansas wheat crop had been damaged by the rust, and that the Kansas wheat crop had been damaged by the rust.

Profit-taking led to a reaction for a while, and so did Copenhagen advice that the shortage in Russia was exaggerated. Active buying was renewed, however, and the market right up to the stroke of the gong. During the day September wheat ranged from 92 1/2c to 93 1/2c, closing only 1/4c to 1/2c higher at 93 1/2c.

Corn Weakened.

General sales weakened corn, as compared with wheat. Better filling orders were made for the best filling grades of the developing ears. September corn ranged from 44 1/2c to 45 1/2c, closing at 44 1/2c, a net gain of 1/4c.

Cash grades were easy. The Liverpool market was closed today, bank hours being observed. The Liverpool market was closed today, bank hours being observed.

Receipts at Primary Centres.

Receipts of wheat in the primary centres, with comparisons, were as follows:

European Grain Markets.

The Liverpool market was closed today, bank hours being observed. The Liverpool market was closed today, bank hours being observed.

Visible Supplies.

The visible supply of wheat in the United States and Canada increased 1,138,000 bushels, corn decreased 1,138,000 bushels, and oats increased 1,138,000 bushels.

World's Shipments.

The world's shipments of grain are as follows:

Prussian Crop Report.

Prussia—Official August 1 winter wheat crop, against 12 per cent, July 1, and 10 per cent, July 15, 1910.

Broomhall's Cables.

Broomhall's cables as follows:

European Russia up to Aug. 4, gives rise to wheat about medium prospects. In the middle Volga, Transvolga, Ural Territory, southwest and Poland, the outlook is good. In parts of Little Russia, Central Caucasus and Don Territory, winter wheat is partly unsatisfactory and partly unsatisfactory to bad. Elsewhere wheat and rye is satisfactory. Oats—The general condition medium, south and west.

Siberia—Harvesting of all cereals is disappointing, and the yields are very poor. India—Our agent cables that the rain-fall up to date is about half of normal.

Argentina—The agricultural department has issued a big estimate of the wheat crop this year, taking as a basis the yield of 1907, and subject to a continuation of favorable weather conditions. Broomhall says: "I consider this estimate worthless as the crop of 1907 was an exceptionally large one, and it is hardly to be expected that the weather will continue ideal. The wheat crop of 1907 was 285,000,000."

Missouri Crops.

Missouri—Corn crop report makes condition of corn 81.2, against 82, in July, 32 last August and 82 in October, when the effort was 55,000 bushels. The crop is good, but no danger of failure. Government July condition 18.

GRAIN AND PRODUCE.

critical, was not disastrous to any extent. Fears are now expressed that since the harvest is a couple of weeks late, frost may come along in time to injure the crops, the weather during recent days indicating a strong possibility of this fact.

The northwest markets were decidedly strong, with Winnipeg showing an advance of nearly three cents a bushel in all options. Duluth and Minneapolis showed similar gains.

Local dealers followed the movement by raising prices for Manitoba wheat 2 1/2c a bushel, No. 1 northern getting up to \$1.00, a new record price for this year. Other grades were comparatively unchanged.

Local grain dealers' quotations are as follows:

Oats—Canadian western oats, No. 2, 80c to 81c; No. 3, 79c to 80c; No. 4, 78c to 79c; No. 5, 77c to 78c; No. 6, 76c to 77c; No. 7, 75c to 76c; No. 8, 74c to 75c; No. 9, 73c to 74c; No. 10, 72c to 73c;
