THE WORLD AND THE MONTREAL CITY COUNCIL

The World has at all times interested itself in the advancement of municipal ownership and municipal reform generally. Wherever questions at issue between municipalities and franchise-holding corporations have arisen it has sent its own commissioners to investigate. In Toronto, Hamilton, Ottawa, Kingston, Perth, Napanee, Smith's Falls and other places it has turned the searchlight of publicity on the methods of corporations and invariably the public has benefited from the exposures.

Following up this practice The World last winter interested itself in the attempt of the Montrel Street Railway to extend its franchise. Recently when the Montreal Light, Heat and Power Company brought the city council into line for the extension of the gas franchise, The World sent a commissioner to Montreal to bring out the facts in the case. Investigation brought to light evidence highly discreditable to members of the Montreal City Council. The publication of this evidence was resented by the implicated parties and at a meeting of the city council ten days ago a resolution was passed instructing the city attorneys to take action against The World for libel. So far The World has received no formal notice of the intended action, but it is

ready to defend itself when suit is entered.

The World would like nothing better than an opportunity to prove its charges by examination for discovery of the aldermen who are so anxious to take us into court. But as the city council shows no inclination to give us this opportunity, the independent action already taken will be followed up. The World has again sent a special commissioner to Montreal and the first of the second series of letters
