

MANY DON'T KNOW HEART AFFECTED.

More People Than are Aware of It Have Heart Disease.

"If examinations were made of everyone, people would be surprised at the number of persons walking about suffering from heart disease."

This startling statement was made by a doctor at a recent inquest. "I should not like to say that heart disease is as common as this would imply," said the expert, "but I am sure that the number of persons going about with weak hearts must be very large."

"Hundreds of people go about their daily work on the verge of death, and yet do not know it. It is only when the shock comes that kills them that the unsuspected weakness of the heart is made apparent."

"But undoubtedly heart weakness, not disease, is more prevalent nowadays. I should think that the stress of living, the wear and rush of modern business life, have a lot to do with heart trouble."

There is no doubt but that this is correct, and we would strongly advise any one suffering in any way from heart trouble to try a course of **MILBURN'S HEART AND NERVE PILLS**.

Price 50 cts. per box or 3 boxes for \$1.25, at all dealers or will be mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

For sale: Young sows bred to farrow in May and June; bears fit for service; also young pigs farrowed in March and April. Imp. sires and dams. Pairs not akin. C.P.R. and G.T.R. Joshua Lawrence, Oxford Centre, Ontario.

NEWCASTLE TAMWORTHS, SHORTHORNS AND CLYDESDALES. Present offering: 3 Shorthorn cows with heifer calf at foot, 3, 4 and 5 months old respectively, and bred again; a choice lot of Tamworth boars and sows from 6 weeks to 5 months old, also a few really good sows bred during April and May. A. A. COLWILL, NEWCASTLE, ONT.

The demand that the Sultan of Turkey dispense with his harem recalls the story of the cannibal chief who became converted and asked the missionary to admit him to the church.

"But you have more than one wife," objected the missionary. "My church does not allow that."

The chief departed in dejection, but returned again in a few days and announced, with evident satisfaction, that he now only had one wife, and was ready for baptism.

"But," objected the clergyman, doubtfully, "where are your other wives?"

"Oh," replied the convert, "I have eaten them!"

ARE A FRIEND TO THE FISHERMAN

Dodd's Kidney Pills Cured Mr. C. Williams' Rheumatism.

He took the terrible disease in time and a single box made him a well man.

South Ingonish, Cape Breton, May 31. (Special.)—How easily and quickly Dodd's Kidney Pills banish rheumatism and other symptoms of kidney disease is well known in the case of Michael C. Williams, a fisherman living in this place.

"My kidney disease started from a strain," Mr. Williams says, "and I suffered from it for about three months. I had backache, stiffness in the joints and rheumatism. When I got up in the morning I had a bad taste in my mouth. I perspired freely with the least exertion, and I was always tired and nervous."

"One box of Dodd's Kidney Pills cured me, and I believe they will cure others who are suffering from kidney disease."

If you have any two of the symptoms mentioned by Mr. Williams, you may be sure of two things: One is that your kidneys are sick, and the other that Dodd's Kidney Pills will cure you.

Dodd's Kidney Pills have proved in thousands of cases all over Canada that they never fail to cure kidney disease of any kind or stage.

QUESTIONS AND ANSWERS. Miscellaneous.

FEEDING PIGS, COWS AND POULTRY.

My father died this spring, and I am only ten years old, and am trying to fill my father's place as best I can, and if I am not too much bother to your valuable paper I would like you to answer me the following questions:

1. How and what will I feed young pigs, just weaned, to give them a good start, and what is the best feed for pigs at any time, and what breed is the best to purchase to fatten quickly for market, and which sex is the most profitable? How much should young pigs, five weeks old, be fed at once?

2. How and what will I feed milking cows to produce the best flow of milk? Should they be fed as heavy as cattle preparing for the exhibition?

3. What is the best feed for Plymouth Rock hens? How much should be fed to forty hens, and should they be fed as much now as in the winter? My hens are not doing a bit well at present.

4. How can I keep corn in a silo all summer, have been feeding it all winter and have about five feet left in a large silo yet? Can it be kept successfully till next winter, if so, how can it be done? If there are not too many questions, I would be glad to have them answered, and I will do my best to follow your advice. W. G.

Ans.—This shows good grit, good judgment, and commendable enterprise, and we trust our young friend will succeed as he deserves. Answering the questions we would say:

1. For weanling pigs nothing can beat shorts or middlings and skim milk. If skim milk is not to be had, whey makes a good substitute. If one has neither skim milk, buttermilk, nor whey, oil-cake meal may be added to the shorts in proportion of one part oil cake to four of shorts or middlings, then mix with water to a moderately-thick slop. Feed young pigs four or five times a day, as much as they will eat up clean. Never feed pigs so much that they will leave feed over in their trough from time to time. After two or three months of age, feeding three times a day will be sufficient. As the pigs get older, some crushed barley may be added, and to finish off a mixture of shorts, barley, pea meal and corn meal will be found satisfactory, with a little oil cake added. Any of the common breeds in Canada, or their crosses, are satisfactory. A cross of Yorkshire and Berkshire cannot well be improved upon. Either barrow or sow pigs are satisfactory. If anything, thrifty barrows are to be preferred.

2. Good cows, fed as though being prepared for exhibition, should respond with a liberal mess of milk. Some cows will use a great deal more feed to advantage than others. Some will merely lay it on their backs, if fed well, and gradually dry up. With the pasture season coming on, nothing need be fed for a while but grass, although some dairymen make a practice of feeding a pound or two of grain to each cow all the year round, but only persistent milkers will stand it without heaving up. If the pasture fails, silage may be fed during the summer, along with a quart of bran and half a pound of oil cake, to each cow per day, or clover, alfalfa, or grain, may be cut and fed green.

3. Mixed grains, including wheat, or wheat screenings, the run of a grass lot or farmyard, oyster-shell to supply lime, and sharp sand or fine gravel for grit, and clean water, as well as meat scrap, should supply their immediate needs. The chances are the hens are lousy. Clean out the house, and follow instructions in the article, "Spring Suggestions in the Poultry Yard," issue April 8th. Dust the hens with insect powder. As to quantity of feed, this will depend upon how much they can pick up on the range. Do not feed all they want in the morning, but let the evening feed be sufficient to send them to roost with full crops.

4. Leave the silage as it is. Five or six inches on top will spoil; the rest will keep good.

SEA GREEN & PURPLE SLATE

SEA GREEN AND PURPLE SLATE is nature's own product—not man made. Quarried from solid rock—split into convenient form for laying, and then in its natural state ready for the roof. **SOLID ROCK CAN NOT WEAR OUT.** It can't burn, rust, warp, crack, tear, or decay. That's why Sea Green or Purple Slate Roofs never wear out and never require painting and repairing like all other roofing. Sea Green & Purple Slate Roofs are suitable for any building, new or old. Give perfect protection. Reduce insurance rates because spark and fire-proof. Afford clean cistern water. Not affected by heat or cold. First cost only a trifle more than short lived roofing. Settle your roof question for all time. Don't spend more money for poor roofing. Write to us for our free book "ROOFS"—it will save you money. Give name of your local roofer. Write today. **AMERICAN SEA GREEN SLATE CO., Box '3 Granville, N. Y.**

Imported and home-bred. Sows ready to breed. Bears fit for service, and younger ones either sex. Also Embden geese. **MAC CAMPBELL & SONS, HARWICH, ONT.**

WEAK MEN, LOOK!

Take This Belt for What it is Worth. Wear it Until You Are Cured—Then Pay Me My Price.

THE SPARK OF LIFE

Nature is the greatest doctor on earth. When she can't cure it is because she needs aid. Now, most people have an idea that this aid is drugs, and when they get sick and suffer from pain of any kind they proceed to dope their stomach with the stuff that is sold for medicine. That doesn't help any; in fact, it does a great deal of harm. The dope that you put into your stomach is poison, and poison weakens the organs and nerves of your body. What Nature needs is electricity.

When your stomach, kidneys, liver or digestive organs get out of order, it is because they lack the necessary electricity to make them perform their regular functions. The breaking down of one of these organs nearly always causes other trouble. Nature can't cure then, because your body hasn't enough electricity to do the work, so you must assist Nature by restoring this electricity where it is needed.

My Electric Belt does this while you sleep. It saturates the nerves with its glowing power, and these conduct the force to every organ and tissue of your body, restoring health and giving strength to every part that is weak. Electricity is a relief from the old system of drugging. It does by natural means what you expect drugs to do by unnatural means. It removes the cause of disease, and after the cause has been removed Nature will do the rest.

MR. THOS. JOHNSTON, Box No. 233, Deseronto, Ont., says: "It is some five or six years since I got your Belt. I am well satisfied with it. It cured me, and I have not been bothered since, and have not used it since then."

If you are skeptical, all I ask is reasonable security for the price of the Belt, and you can

PAY WHEN CURED.

FREE TO YOU.

Get my 80-page book describing my Electric Belt, with illustrations of fully-developed men and women, showing how it is applied.

If you can't call, I'll send this book, prepaid, free, if you will enclose this coupon. Consultation free. Office hours—9 a.m. to 6 p.m. Wednesday and Saturday till 8.30 p.m.
