"PNEUMATIC" ENSILE AND STRAW CUTTERS

Our Cilmax "A" mounted is the only successful combination machine of this capacity. It will cut and deliver green or wilted silage, or dry straw or hay into the mow. 2nd month, rolls raised inches and set close to knives, making solid compact chaff of same capacity. No lost power. Direct pneumatic delivery. No worm gear or special blower attachment. Knife wheel also carries the fans. No loading on wheel arms, everything cut, wheel always in balance. Steel reach any size, also pipe rock, tools, etc. Ask your dealer about them and write for catalog. We also make a "B" machine unmounted.

"Hold Fast That Which is Good"

(Continued from page 5)
the majority of them are almost all black.

Take the present champion, Spring Farm Pontiac Lass, the only cow in the world to produce more than 44 grand cow in almost solid black on top with white confined to the legs, belly and udder. The chances are that her progeny, judging from the calves she has already had, will be the same color as she is. Banostine Belle DeKok, champion of the breed under a short time ago, is likewise largely on the black. And we might go on naming cow after cow that has won world honors in spite of her dark color.

CANADIAN HOLSTEINS TOO ARE DARK. When we come to Canada we find the same to be true. Take DeKok Mutual Countess with her four world records, and all Canadian records as a junior three-year-old. She is just as black as is Spring Farm Pontiac Lass. The calves she has had to date are just as black as she is.

A few weeks ago we visited Mr. W. E. Mason, at Tyrrell, Ont. We found that his world beating heifer, Arden DeKok Tensen, who produced 19.07 lbs. of butter in seven days 12 months after calving, is solid black except for the belly and udder. Another champion in Mr. Mason's herd, Daisy Tensen Poseh, is almost solid black, while a third, a heifer of great promise is blacker than either of the others.

Canadian records so fast this spring that it is difficult to keep track of them. There is Queen Butler Barones, Mr. Haley's great cow. She is very evenly divided between black and white, but very far from being as light as the faddists demand. Mr. Gordon H. Gooderham is very proud of his Lady Vincent, a 11-year-old cow that made 95.96 lbs. of butter at 11 years old and won a quarter million. Lady Vincent is about as black as you find them. So are some other of the choicest individuals at the Manor Farm.

Take a look at the photographs of this splendid heifer, owned by Mr. W. H. Cherry, has just set the Canadian 30-day record for two-year-olds a peg ahead. And she did it in spite of the fact that white is not her predominating color.

Brookdale Korndyke Netherlands, owned by W. C. Stevens, Phillipville, Ont., in the first Canadian cow to make over 30 lbs. of fat in seven days. She has set the 7-day record four pounds ahead of what it previously was. She is a grand milking machine. And notice her color as portrayed on page four of this issue. True she is not as black as some of the other records makers pictured. Nor is she as light as the fashion demands.

And now the question that every Holstein breeder must answer for himself is, "Are all of these great strains of producers that have made the breed famous to be discounted on account of their color?" For discounting for light coloring continues.

Holstein breeders are indeed face to face with a crisis. We have presented the subject as we see it. We invite discussion of the topic by all fanciers of the black and whites through the columns of Farm and Dairy.

The color fade has not yet been in vogue long enough to do any appreciable harm to the breed. Now, therefore, is the time for discussion and careful deliberation.—F. E. E.

What a temptation there is to give the driver an extra good feed of oats before a long drive. As a matter of fact the horse travels easier with less in its stomach.

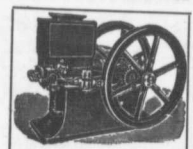

"MONARCHS" Cost You Less For Power

The special carburetor turns your gasoline into the greatest amount of power possible. The low fuel cost surprises all our customers experienced in ordinary farm engines. The fuel saving alone pays the cost of the "Monarch" long before it is worn out. This is the one engine to get, if you want the benefit of farm power—1½ to 35 h.p.

Threshers' Steel Tank

THIS Tank is for drawing a supply of water for use of Threshers' outfit. These Tanks are made so that they will carry a small quantity of fuel at top where traction engine is used. Made of heavy galvanized steel. Built on Steel Channel frame, strongly braced.

It is a clean, sanitary proposition. Does not get water-soaked like the wooden ones. Is light and easy to handle. Has large man-holes. Fitted with bulk-heads to prevent water rubbing backwards. Strongly riveted and soldered, so cannot leak. Send for illustrated *Price List and Catalogue*.

STEEL TROUGH & MACHINE CO., LTD., 6 JAMES STREET, TWEED, ONT.

PUMPING

With a "GOES LIKE SIXTY" Pumping Outfit

No more backaches. No more waiting for the wind. The **GOES LIKE SIXTY** is the ideal pumping engine. It "GOES" like your wash machine, cream separator, churn, electric light dynamo, wood saw, feed cutter, grinder, pulper, etc. It is mounted on wheels, complete with line shaft, five interchangeable pulleys and universal pumpjack. The only engine, fully equipped, ready to go into service. A powerful, durable engine, built to last a lifetime. The simplest engine on the market. A child can operate it.

Write for full particulars and also catalogue of pumps, pump jacks, wood saws, etc.

Gilson Manufacturing Co.

302 York St., Guelph, Ont.

ARE VERY DURABLE

Only Canadian Spruce lumber especially selected for our own use is employed. This is saturated with a solution which prevents rot and decay and reduces the tendency of the staves to swell or shrink and adds two to three times to the life of the silo.

Each silo hooped with heavy round iron hoops every 20 inches apart. Only malleable iron lugs are used.

We want you to have our Ideal Green Feed Silo Book

If you are a cow owner a postal card request will bring you the book free of charge.
